Merlin the wizard challenges readers to become wizards like himself by deciphering clues hidden in his guide to wizardry. This book argues that contemporary Italian history has been marked by a tendency towards divided memory. Events have been interpreted in contrasting ways, and the facts themselves often contested. Moreover, with so little agreement over what happened, and why it happened, it has been extremely difficult to create any consensus around memory. These divisions have been seen at all levels, but take on particular importance when linked to the great traumatic and life-changing events of the Twentieth century - war, terrorism, disaster - but can also be applied to more cultural fields such as sport and everyday life. Social change also has an impact on memory. This book will take the form of a voyage through Italy (and into Italy's past), looking at stories of divided memory over various periods in the twentieth century. These stories will be interwoven with analysis and discussion.

Dinosaur Tracks from Brazil is the first full-length study of dinosaurs in Brazil. Some 500 dinosaur trackways from the Cretaceous period still remain in the Rio do Peixe basins of Brazil, making it one of the largest trackways in the world. Veteran paleontologists Giuseppe Leonardi and Ismar de Souza Carvalho painstakingly document and analyze each track found at 37 individual sites and at approximately 96 stratigraphic levels. Richly illustrated and containing a wealth of data, Leonardi and de Souza Carvalho brilliantly reconstruct the taxonomic groups of the dinosaurs from the area and show how they moved across the alluvial fans, meandering rivers, and shallow lakes of ancient Gondwana. *Dinosaur Tracks from Brazil* is essential reading for paleontologists. Young readers may touch various surfaces on kittens that are not the one someone is looking for, until at last the right one appears. On board pages.

One of Italy's best-known writers takes a Grand Tour through her cities, history, and literature in search of the true character of this contradictory nation. There is Michelangelo, but also the mafia. Pavarotti, but also Berlusconi. The debonair Milanese, but also the infamous captain of the Costa Concordia cruise ship. This is Italy, admired and reviled, a country that has guarded her secrets and confounded outsiders. Now, when this "Italian paradox" is more evident than ever, cultural authority Corrado Augias poses the puzzling questions: how did it get this way? How can this peninsula be simultaneously the home of geniuses and criminals, the cradle of beauty and the butt of jokes? An instant #1 bestseller in Italy, Augias's latest sets out to rediscover the story-different from the history-of this country. Beginning with how Italy is seen from the outside and from the inside, he weaves a geo-historical narrative, passing through principal cities and rereading the classics and the biographies of the people that have, for better or worse, made Italians who they are. From the gloomy atmosphere of Cagliostro's Palermo to the elegant court of Maria Luigia in Parma, from the ghetto of Venice to the heroic Neapolitan uprising against the Nazis, Augias sheds light on the Italian character, explaining it to outsiders and to Italians themselves. The result is a "novel of a nation," whose protagonists are both the figures we know from history and literature and characters long hidden between the cracks of historical narrative and memory. The perfect follow-up to 'Egyptology' this is an entirely genuine course in the subject.
