Alternatively, a child of any age (even the child in you) can just look at the images and appreciate its beauty. Do enjoy!

A Hudson Booksellers Staff Pick for the Best Books of 2013 One of Publishers Weekly's Top Ten Spring Science Books A Bookshop Santa Cruz Staff Pick Dinosaurs, with their awe-inspiring size, terrifying claws and teeth, and otherworldly abilities, occupy a sacred place in our childhoods. They loom over museum halls, thunder through movies, and are a fundamental part of our collective imagination. In My Beloved Brontosaurus, the dinosaur fanatic Brian Switek enriches the childlike sense of wonder these amazing creatures instill in us. Investigating the latest discoveries in paleontology, he breathes new life into old bones. Switek reunites us with these mysterious creatures as he visits desolate excavation sites and hallowed museum vaults, exploring everything from the sex life of Apatosaurus and T. rex's feather-laden body to just why dinosaurs vanished. (And of course, on his journey, he celebrates the book's titular hero, "Brontosaurus"—who suffered a second extinction when we learned he never existed at all—as a symbol of scientific progress.) With infectious enthusiasm, Switek questions what we've long held to be true about these beasts, weaving in stories from his obsession with dinosaurs, which started when he was just knee-high to a Stegosaurus. Endearing, surprising, and essential to our understanding of our own evolution and our place on Earth, My Beloved Brontosaurus is a book that dinosaur fans and anyone interested in scientific progress will cherish for years to come.

At first grade, your child is expected to know all the continents of the world. But if he/she is lagging behind, don't worry because this educational book can help. Information presented here is done with the use of vibrantly colored pictures that call the attention. The use of colors and images allows for the better processing of memory and retention. Let's face it. Children love looking at big, exotic wildlife that roam about the African Serengeti. Even if our young ones cannot get to Tanzania to see these amazing creatures in person, they can observe and learn all about them in books. Kids adore safari animals like the great elephants, giraffe, zebra, wildebeest, cheetahs and lions which all co-exist along these beautiful landscapes. A great book allows children to dream.

One of Vox's Most Important Books of the Decade New York Times Editors' Choice 2017 Forbes Top 10 Best Environment, Climate, and Conservation Book of 2017 As new groundbreaking research suggests that climate change played a major role in the most extreme catastrophes in the planet's history, award-winning science journalist Peter Brannen takes us on a wild ride through the planet's five mass extinctions and, in the process, offers us a glimpse of our increasingly dangerous future Our world has ended five times: it has been broiled, frozen, poison-gassed, smothered, and pelted by asteroids. In *The Ends of the World*, Peter Brannen dives into deep time, exploring Earth's past dead ends, and in the process, offers us a glimpse of our possible future. Many scientists now believe that the climate shifts of the twenty-first century have analogs in these five extinctions. Using the visible clues these devastations have left behind in the fossil record, *The Ends of the World* takes us inside "scenes of the crime," from South Africa to the New York Palisades, to tell the story of each extinction. Brannen examines the fossil record—which is rife with creatures like dragonflies the size of sea gulls and guillotine-mouthed fish—and introduces us to the researchers on the front lines who, using the forensic tools of modern science, are piecing together what really happened at the crime scenes of the Earth's biggest whodunits. Part road trip, part history, and part cautionary tale, *The Ends of the World* takes us on a tour of the ways that our planet has clawed itself back from the grave, and casts our future in a completely new light.

Learn from home and explore the world with these fun and easy board books! All young children love dinosaurs. Here's a Hello, World! board book that teaches toddlers all about Triceratops, Stegosaurus, T-rex, and many more—with colors,

shapes, sizes, and super-simple facts. Hello, World! is a series designed to introduce first nonfiction concepts to babies and toddlers. And each sturdy page offers helpful prompts for engaging with your child. It's a perfect way to bring science and nature into the busy world of a toddler, where learning never stops. Look for all the books in the Hello, World! series: •Solar System •Weather •Backyard Bugs •Birds •Dinosaurs •My Body •How Do Apples Grow? •Ocean Life •Moon Landing •Pets •Arctic Animals •Construction Site •Rainforest Animals •Planet Earth •Reptiles •Cars and Trucks •Music •Baby Animals •On the Farm

This is a New York Public Library Outstanding Reference Book of 1998. While the inhabitants of the lost world have long held sway over our imaginations, in recent years dinosaur science has experienced an explosive growth. More books on dinosaurs have been published in the past decade than in all the previous 150 years since Richard Owen named these 'fearfully great lizards' (correctly, 'reptiles'), and dinosaur research continues to make headlines. Reporting the latest discoveries and research, this book is an exuberant celebration of dinosaurs and of our ongoing fascination with them. Here, in one volume, is the single, most-authoritative account of dinosaur paleontology for the general reader. So rapidly has the field expanded that no individual can hope to master all the aspects of dinosaur paleontology. For this book, the editors have brought together forty-six experts in subjects ranging from functional morphology and paleobiology to biogeography and systematics to present a thorough survey of the dinosaurs from the earliest discoveries through the contemporary controversies over their extinction. Where contention exists, as over the question of whether dinosaurs were warm-blooded or cold-blooded, the editors have let the experts agree to disagree. Throughout technical jargon is kept to a minimum, and there is also a glossary of less familiar terms. Readers will find a wealth of information on the study and classification of dinosaurs, on each of the dinosaur groups, and on dinosaur biology and evolution. Not the least among these riches are the more than 350 illustrations (including 16 pages of color plates), many prepared especially for this volume. The volume concludes with a survey of dinosaurs in the media and a chronology of the history of dinosaur science. This is the single most authoritative account of dinosaur paleontology for the general public, all in one volume. Sumptuously illustrated, with up-to-the-minute information, it features: more than 350 illustrations, including 16 pages in full color; each chapter written by an expert in dinosaur studies; includes the latest dinosaur discoveries; new information on the warm-blooded/cold-blooded debate; new insights on the possibility of isolating dinosaur DNA; what dinosaurs ate and how we know about it; dinosaurs in the media; a time-line of the history of dinosaur science; and much, much more!

Some dinosaurs had a deadly bite and others could run super fast. Some had club-like tails and some could make the smelliest of farts - POO-WEE! But wait, don't run away... Because dinosaurs are actually awesome! From the ferocious hunters like Spinosaurus and T.rex to the gentle giants like Diplodocus and Titanosaurus, the speedy raptors to the armoured Ankylosaurs, discover all the weird and wonderful things that made dinosaurs so AMAZING. Did you know that some dinosaurs laid eggs the size of footballs? Or that there's a fossilised dinosaur poo as long as your arm? And have you ever heard of a certain dinosaur that could outrun a racehorse? Find out about all this and more - and then decide: do YOU love dinosaurs?

Explores the history of dinosaurs and the discoveries that have been made about them, including how dinosaurs lived, why they went extinct, and what fossil evidence explains about them.

SNAKES: 101 SUPER FUN FACTS AND AMAZING PICTURES (FEATURING THE WORLD'S TOP 10 SNAKES) This book depicts the wonder of the world of Snakes in all its glory. Children are given a well-rounded understanding of this beautiful reptile: its anatomy, feeding habits and behavior. The following Snakes are featured: Anaconda Boa Constrictor Cobra Corn Snake Garter Python Rattlesnake Sea Snake California King Snake Milk Snake The description is in the large text and is simple enough for early readers or for a parent to guide a child through. There are also picture captions, which provides more information to talk about with your child. Alternatively, a child of any age (even the child in you) can just look at the images and appreciate its beauty. Enjoy!

Please scroll up and grab a copy today! Here are some of the comments on FaceBook... Hey John! I just downloaded and read your book to my daycare kids. They LOVED it! Especially my little guy, he's a alllll nature, can't keep him inside. I'm sharing with all my FB peeps and my daycare parents as well. Way to go, and good for you! Best wishes!!! John, I read your book prior to letting the kids read it. It was a good read and I definitely learned some things myself. I look forward to the kids reading it. I downloaded it to my phone and I will add it to my kids tablets they are getting from Santa.

People who love kids spend a sizeable amount of their adult life obsessing about how their lives would be with kids in it. They wonder how they can be good parents and be their kids' ultimate companion. They actively or passively prepare for this period of their lives and try to figure out ways to connect with their kids. The kids came with a need to express themselves, and it turns out that drawing is one of these needs. Herein lies the problem; the parent cannot draw. If this is your story, we understand how hard it is for you to confront that wrong notion that you cannot be there for your kids. You do not have to feel this way because you can always get help. Now, that help has come in the form of this drawing book. You do not have to feel like you are not doing enough for your kids in the area of creative expression because now, you can always bring out this book and guide them on how to use it to fulfill their drawing needs. The best part of this is that you will be doing it together; you learn as they learn and at the same time, you get to connect with them on a deeper level. So yes, you may not have much artistic or drawing skill, but you can help your kids develop theirs, and this book and the drawing guides in it will help you get them there. You and your kids are about to have the most amazing creative experience - one that you will talk about for years to come.

Growl! There go the big, fierce and strong prehistoric animals! You have to thank our scientists for revealing to the world the dinosaurs that once walked the Earth. Learning can be made fun and easy with the help of books like this. Educational picture books tickle the imagination and make learning a lot easier. So what are you waiting for? Go ahead and grab a copy today!

Dig into the world of dinosaurs--meet the meat-eating carnivores! Did you know a Tyrannosaurus rex had an infectious bite? Or that the Guanlong could regrow its teeth like sharks do today? Dinosaurs were some of the most fascinating animals to ever walk the Earth--and some of the coolest dinos around were meat-eaters! From the massively long and tall Spinosaurus to the five-fingered, night-hunting Eoraptor, Dinosaurs! My First Book About Carnivores gets up close and personal with the clawed carnivores of the Mesozoic Era. Packed with amazing dinosaur facts and awesome illustrations, this book will uncover everything there is to know about these prehistoric predators. Dinosaurs! My First Book About Carnivores includes: Paleontology profiles--Explore the exciting lives of 30 fierce carnivores with easy-to-follow profiles featuring their sizes, where they lived, their favorite foods, and more! Colorful carnivores--Full-color illustrations of these smart predators in their natural habitats take you back millions of years to the age of the dinosaurs. Dino-mite facts--Did you know a Utahraptor is the official dinosaur of Utah? Dozens of interesting facts show what made these carnivores unique and how their features helped them hunt for prey. Set your time machine to the Mesozoic Era and walk alongside the carnivores with Dinosaurs!

Rebbachisaurus, Spinosaurus, Stegosaurus, Tyrannosaurus, Triceratops, Tylocephale, Urbacodon, Velociraptor, Wuerhosaurus, Xenotarsosaurus, Zephyrosaurus. Enjoy!

This valuable and beautiful book is the work of two animal lovers — James F. Coleman is a zoologist and the author of many books on prehistoric animals; Arthur Lobus is an illustrator of many popular encyclopaedias and books about the animal kingdom. His realistic and very graphic illustrations not only skilfully bring dinosaurs to life but lend an incredible atmosphere to the times in which these prehistoric animals lived. This encyclopaedia is intended for children from age 7 to 10, but has been designed to equally fascinate adults. It is the essential compendium of knowledge about dinosaurs. First of all, it introduces the reader to Prehistoric times by answering various questions, such as what happened on Earth

before the time of dinosaurs, how palaeontologists study these extraordinary animals and their time period, or what is the history of dinosaur discoveries. Next, the book describes the life of reptiles. Starting with the role of eggs in the reptilian reproduction cycle, the book goes on to describe the wide diversity of the Reptilian Family; non-dinosaur species that also lived on Earth in the very same era are similarly highlighted. Finally, the book addresses the dinosaurs themselves. First in line are the herbivorous dinosaurs, such as giant Stegosaur, armoured Ceratops, dome-headed and duck-billed Iguanodons, and bird-footed dinosaurs. These are closely followed by the mighty carnivorous dinosaurs — Tyrannosaurs, Spinosaur, Dromaeosaurids, Oviraptors and early birds. The final part of the book displays three practical study tools: a Q&A section, a glossary of noteworthy words and a special photo gallery of dinosaurs. The latest discoveries of modern palaeontology have been carefully featured in this book. These include how dinosaurs must have looked like, how they moved and what their habits were. A great advantage of this new volume is its modern and user-friendly presentation which showcases over 190 illustrations, diagrams, questions and answers area and photo gallery!
