A NATIONAL BESTSELLER * A NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE "An invigorating work, deadly precise in its skewering of people, places and things . . . Stylish, despairing and very funny, *Fake Accounts* . . . adroitly maps the dwindling gap between the individual and the world." —Katie Kitamura, *The New York Times Book Review* A woman in a tailspin discovers that her boyfriend is an anonymous online conspiracy theorist in this "absolutely brilliant take on the bizarre and despicable ways the internet has warped our perception of reality" (*Elle*, One of the Most Anticipated Books of the Year). On the eve of Donald Trump's inauguration, a young woman snoops through her boyfriend's phone and makes a startling discovery: he's an anonymous internet conspiracy theorist, and a popular one at that. Already fluent in internet fakery, irony, and outrage, she's not exactly shocked by the revelation. Actually, she's relieved--he was always a little distant--and she plots to end their floundering relationship while on a trip to the Women's March in DC. But this is only the first in a series of bizarre twists that expose a world whose truths are shaped by online lies. Suddenly left with no reason to stay in New York and increasingly alienated from her friends and colleagues, our unnamed narrator flees to Berlin, embarking on her own cycles of manipulation in the deceptive spaces of her daily life, from dating apps to

expat meetups, open-plan offices to bureaucratic waiting rooms. She begins to think she can't trust anyone--shouldn't the feeling be mutual? Narrated with seductive confidence and subversive wit, Fake Accounts challenges the way current conversations about the self and community, delusions and gaslighting, and fiction and reality play out in the internet age.

This Penguin Classics Graphic Deluxe Edition features an array of special features to supplement the novel, including a foreword by Lois Lowry, an introduction by Stephen King, an essay by E. M. "Dr Cecilia Acquarone's perceptive analysis of liminality in British postcolonial fiction from a gender perspective constitutes an innovative, thought-provoking and crystal-clear study of female 'versus' male responses to the challenges of postmodernity as exemplified by significant British postcolonial writers. The book can be justly praised for the lucid use of theoretical language and the exploration of modern and postmodern ideology in an unobstrusive form, pinpointing the most significant phenomena related to the topic in question. Dr Acquarone locates the relevance of barriers, borders and crossings with gender on the agenda within the realm of tragedy and comedy, providing a sensible and sensitive humanistic approach to the works of some of the most outstanding authors of British postcolonial fiction. In sum, Cecilia Acquarone's book is undoubtedly an invaluable contribution to the field of British postcolonial studies."

—Dr Antonio Ballesteros-Gonzalez, Spanish Open University "Cecilia Acquarone's *Barriers, Borders and Crossing in British Postcolonial Fiction: A Gender Perspective* is a particularly interesting contribution to the field of postcolonial criticism due to its perceptive intertwining of a sound theoretical background and a sensitive close reading of representative novels by major writers of contemporary multicultural Britain. ... In a clear prose, she sheds light on highly complex philosophical and sociological issues, expounding on what the feminine and the masculine perspective can contribute to the hard task of peaceful coexistence in contemporary British multicultural society." —Ángeles de la Concha, Catedrática de Filología Inglesa, Universidad Nacional de Educación a Distancia "Barriers, Borders and Crossing in British Postcolonial Fiction: A Gender Perspective provides an original attempt to map an increasingly visible body of writing in the UK in recent years. In her analysis of key novels by black and Asian British writers ... the author highlights an opposition between the predominantly tragic vision of life of the male authors and the fundamentally comic vision of life found in the women writers. ... The author offers a provocative reading of recent black and Asian British fiction as postmodernist works in which the writers respond differently to contemporary conditions. The volume is a significant contribution to the field of postcolonial studies and diaspora studies, and its use of the comedy-tragedy paradigm to understand recent fiction enriches more common approaches to the two major ways of experiencing and discussing diaspora." —Dr Sofía Muñoz-Valdivieso, Associate Professor, University of Malaga

This book constitutes the proceedings of the 19th International Conference on Conceptual Structures, ICCS 2011, held in Derby, UK, in July 2011. The 18 full papers and 4 short papers presented together with 12 workshop papers were carefully reviewed and selected for inclusion in the book. The volume also contains 3 invited talks. ICCS focuses on the useful representation and analysis of conceptual knowledge with research and business applications. It advances the theory and practice in connecting the user's conceptual approach to problem solving with the formal structures that computer applications need to bring their productivity to bear. Conceptual structures (CS) represent a family of approaches that builds on the successes of artificial intelligence, business intelligence, computational linguistics, conceptual modelling, information and Web technologies, user modelling, and knowledge management. Two of the workshops contained in this volume cover CS and knowledge discovery in under-traversed domains and in task specific information retrieval. The third addresses CD in learning, teaching and assessment.

The essays in this collection address the current preoccupation with neurological conditions and disorders in contemporary literature by British and American writers. The

book places these fictional treatments within a broader cultural and historical context, exploring such topics as the two cultures debate, the neurological turn, postmodernism and the post-postmodern, and responses to September 11th. Considering a variety of materials including mainstream literary fiction, the graphic novel, popular fiction, autobiographical writing, film, and television, contributors consider the contemporary dimensions of the interface between the sciences and humanities, developing the debate about the post-postmodern as a new humanism or a return to realism and investigating questions of form and genre, and of literary continuities and discontinuities. Further, the essays discuss contemporary writers' attempts to engage the relation between the individual and the social, looking at the relation between the "syndrome syndrome" (referring to the prevalence in contemporary literature of neurological phenomena evident at the biological level) and existing work in the field of trauma studies (where explanations tend to have taken a psychoanalytical form), allowing for perspectives that question some of the assumptions that have marked both these fields. The current literary preoccupation with neurological conditions presents us with a new and distinctive form of trauma literature, one concerned less with psychoanalysis than with the physical and evolutionary status of human beings. Julian Barnes's work has been marked by great variety, ranging not only from conventional fiction to postmodernist experimentation in such well-known novels as *Flaubert's Parrot* (1984) and *A History of the World in 10 1/2 Chapters* (1989), but also from witty essays to deeply touching short stories. The responses of readers and critics have likewise varied, from enthusiasm to scepticism, as the substantial volume of critical analysis demonstrates. This Readers' Guide provides a comprehensive and accessible overview of the essential criticism on Barnes's work, drawing from a selection of reviews, interviews, essays and books. Through the presentation and assessment of key critical interpretations, Vanessa Guignery provides the most wide-ranging examination of his fiction and non-fiction so far, considering key issues such as his use of language, his treatment of history, obsession, love, and the relationship between fact and fiction. Covering all of the novels to date, from *Metroland* (1981) to *Arthur and George* (2005), this is an invaluable introduction to the work of one of Britain's most exciting and popular contemporary writers.

The subject of the passions has always haunted Western philosophy and, more often than not, aroused harsh judgments. For the passions represent a force of excess and lawlessness in humanity that produces troubling, confusing paradoxes. In this book, noted European philosopher Michel Meyer offers a wide-ranging exegesis, the first of its kind, that systematically retraces the history of philosophic conceptions of the passions in the work of such thinkers as Plato, Aristotle, Augustine, Spinoza, Descartes, Hobbes, Rousseau, Kant, and Freud. The great ruptures that led to passion's condemnation as sin, and to its romantic exultation as the truth of existence, are meticulously registered and the logic governing them astutely explicated. Meyer thus provides new insight into an age-old dilemma: Does passion torture people because it blinds them, or, on the contrary, does it permit them to apprehend who and what we really are?

The only information we have on Atlantis is from a very ancient Egyptian account that describes it as bigger than all their neighbours combined. Why is this fact ignored by most of the fanciful theories? From Atlantis to our current scientific predictions, the truth about so many things becomes clear and obvious only if all the facts are collected and examined, yet many people just select those that agree with their thinking. The resulting conflict between experience and belief, truth and distortion or good and bad, is only resolved when science, philosophy and theology are harmonized and examined as aspects of one universal truth. Don't miss Selznick's other novels in words and pictures, *The Invention of Hugo Cabret* and *Wonderstruck*, which together with *The Marvels*, form an extraordinary thematic trilogy! What are "essential questions," and how do they differ from other kinds of questions? What's so great about them? Why should you design and use essential questions in your classroom? Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to designing curriculum, instruction, and assessment, the authors

- *Give a comprehensive explanation of why EQs are so important;
- *Explore seven defining characteristics of EQs;
- *Distinguish between topical and overarching questions and their uses;
- *Outline the rationale for using EQs as the focal point in creating units of study; and
- *Show how to create effective EQs, working from sources including standards, desired understandings, and student misconceptions.

Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages. The series follows the 5E model (engage, explore,

explain, elaborate, evaluate). The Matter kit provides a complete inquiry model for the exploration of the structure and properties of matter through supported investigation. Encourage students through activities such as studying the chemical properties of matter and investigating whether household items are acids and bases. The search for life in the Universe, once the domain of science fiction, is now a robust research program with a well-defined roadmap, from studying the extremes of life on Earth to exploring the possible niches for life in the Solar System and discovering thousands of planets far beyond it. In addition to constituting a major scientific endeavor, astrobiology is one of the most popular topics in astronomy, and is of growing interest to a broad community of thinkers from across the academic spectrum. In this volume, distinguished philosophers, theologians, anthropologists, historians and scientists discuss the big questions about how the discovery of extraterrestrial life, whether intelligent or microbial, would impact society. Their remarkable and often surprising findings challenge our foundational concepts of what the discovery of alien life may hold for humankind. Written in easily accessible language, this thought-provoking collection engages a wide audience of readers from all backgrounds.

According to the traditional view, meaning presents itself under the form of some

kind of identity. To give the meaning of a sentence amounts to being capable of producing some substitute based on the identity of the terms of the sentence. Is then the meaning of a book, or of any text, the capacity of rewriting it? Instead of retaining a double-standard theory of meaning, one for sentences and another for texts, that would allow for an ad hoc gap, the author provides a unified conception, called the question view of language he has developed, known as problematology. He pursues a systematic analysis of questioning in literature and shows how questioning makes the understanding process possible.
