Carter Oosterhouse knows how real people live and how intimidating home design can be. With his reassuring, "you can do it" attitude, he goes out of his way to show readers how to create realistic design elements that they can implement with basic tools and a little DIY experience. His mission is to bring people's imaginations to life. The design features he constructs use materials easily found, are budget-conscious, and whenever possible environmentally friendly. In Carter's Way, he decodes the time-tested principles of design, using specific examples and stunning photos to visually illustrate his points. Each chapter will cover a different area of the house, acknowledging the diversity of layouts in today's homes. For example, one chapter will focus on spaces for cooking, eating, and socializing to appeal both to people with a formal dining area and those with more open floor plans, with a design that is about comfort, entertaining, and practicality. Other chapters include: intimate bedroom spaces featuring beautiful and efficient storage for a sensual environment that becomes a sanctuary; living/family rooms with the kind of versatility that allows them to convert from game-playing rumpus rooms to elegant cocktail party spaces; luxurious bathrooms that provide a spa-like getaway from stress while also conserving energy and water; home offices/entryways/laundry rooms; and outdoor spaces that can serve as two- or three-season rooms for entertaining and relaxing. [excerpt] I'm writing this book because of all the people who come up to me at events, or write me, saying things like, "I wish I could make my kitchen look like the one on your last show," or, "If only I could have you work on my living room!" You don't need me in person. You don't need anybody else. You need my perspective and my method. My method is what I call "Carter's Way." It's a process that has worked for me in dozens of different rooms and homes. Now I want it to work for you!

Design Your Life is a series of irreverent and realistic snapshots about objects and how we interact with them. By leading design thinker Ellen Lupton and her twin sister Julia Lupton, it shows how design is about much more than what's bought at high-end stores or the modern look at IKEA. Design is critical thinking: a way to look at the world and wonder why things work, and why they don't. Illustrated with original paintings of objects both ordinary and odd, Design Your Life casts a sharp eye on everything from roller bags, bras, toilet paper, and stuffed animals to parenting, piles, porches, and potted plants. Using humor and insight Ellen and Julia explore the practical side of everyday design, looking at how it impacts your life in unexpected ways and what you can do about it. Speaking to the popular interest in design as well as people's desire to make their own way through a mass-produced world, this thoughtful book takes a fresh and humorous approach to make some serious points about the impact of design on our lives. Find out what's wrong with the bras, pillows, potted plants, and the other hopeless stuff you use, buy, clean, water, or put away everyday. Discover how to secretly control the actions of those around you by choosing and placing objects carefully. Find out how roller bags are threatening civilization, and how the layout of your own house might be making you miserable. Use the tools of self-publishing to take the power of branding into your own hands. Taking a fresh, funny look at parenthood, housekeeping, entertaining, time management, crafting, and more, Design Your Life shows you how to evaluate the things you use, and how to recognize forms of order that secretly inhabit the messes of daily life, be it a cluttered room or a busy schedule. Use this book to gain control over your environment and tap into the power of design to communicate with friends, family, and the world.

A comprehensive, step-by-step resource for fabric design and printing—including tips from top designers. If you've ever dreamed of showing your designs on fabric, textile aficionado Kim Kight, of popular blog True Up, is here to teach you how. Comprehensive and refreshingly straightforward, this impressive volume features two main parts. First, the Design and Color section explains the basics with step-by-step tutorials on creating repeating patterns both by hand and on the computer. Next, the Printing section guides you through transferring those designs on fabric—whether it's block printing, screen printing, digital printing or licensing to a fabric company—and how to determine the best method for you. Includes extensive photos and illustrations How social media and DIY communities have enabled new forms of political participation that emphasize doing and making rather than passive consumption. Today, DIY—do-it-yourself—describes more than self-taught carpentry. Social media enables DIY citizens to organize and protest in new ways (as in Egypt's "Twitter revolution" of 2011) and to repurpose corporate content (or create new user-generated content) in order to offer political counternarratives. This book examines the usefulness and limits of DIY citizenship, exploring the diverse forms of political participation and "critical making" that have emerged in recent years. The authors and artists in this collection describe DIY citizens whose activities range from activist fan blogging and video production to knitting and the creation of community gardens. Contributors examine DIY activism, describing new modes of civic engagement that include Harry Potter fan activism and the activities of the Yes Men. They consider DIY making in learning, culture, hacking, and the arts, including do-it-yourself media production and collaborative documentary making. They discuss DIY and design and how citizens can unlock the black box of technological infrastructures to engage and innovate open and participatory critical making. And they explore DIY and media, describing activists' efforts to remake and reimagine media and the public sphere. As these chapters make clear, DIY is characterized by its emphasis on "doing" and making rather than passive consumption. DIY citizens assume active roles as interventionists, makers, hackers, modders, and tinkerers, in pursuit of new forms of engaged and participatory democracy. Look around your office or home—at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve. In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products, and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise. A classic and indispensable account of graphic design history from the Industrial Revolution to the present Now in its third edition, this acclaimed survey explores the evolution of graphic design from the 19th century to the present day. Following an exploration of design's prehistory in ancient civilizations through the Industrial Revolution, author Stephen J. Eskilson argues that modern design as we know it grew out of the influence of Victorian-age reformers. He traces the emergence of modernist design styles in the early 20th century, examining the wartime politicization of regional styles. Richly contextualized chapters chronicle the history of the Bauhaus and the rise of the International Style in the 1950s and '60s, and the postmodern movement of the 1970s and '80s. Contemporary considerations bring the third edition up to date, with discussions of app design, social media, emojis, big data visualization, and the use of animated graphics in film and television. The contemporary phenomenon of the citizen designer, professionals who address societal issues either through or in addition to their commercial work, is also addressed, highlighting protagonists like Bruce Mau and the Center for Urban Pedagogy. This edition also features 45 additional images, an expanded introduction and epilogue, and revised text throughout. A newly redesigned interior reinforces the fresh contents of this now-classic volume.
