Self assess yourself before actual exam. Practice with 200 MCQs of Pharmacology and compare your answers with the one given in answer book with explanation. Enhance your NEET PG score.

As the first revision text aimed specifically at the Knowledge-Based Assessment, Essential Revision Notes for Cardiology KBA is the cornerstone of your revision for this new and compulsory examination. Each chapter exactly maps the core cardiology training curriculum, giving measurable assurance that you are getting the information you need to pass. Each chapter is written by a senior cardiology trainee in collaboration with a senior consultant who has expertise in that specific field, ensuring that the content is both authoritative and accessible. Drawing on the latest guidelines and documents, the concise, bullet-pointed layout allows easy access to and digestion of the key points you'll need during revision. Numerous tables, boxes and figures make this the ideal accompaniment to retaining the large and varied amount of information needed to pass the examination.

Get Through MRCOG Part 1, Second Edition, provides a selection of questions covering the basic and applied sciences relevant to the clinical practice of obstetrics and gynaecology and mapped to the RCOG Knowledge Areas in the MCQ style. With appropriate explanations of the answers and references to the relevant guidelines, this

is a definitive resource for those taking the MRCOG Part 1 examination.

This is the first comprehensive book published from India which is based on MCQs, primarily for doctors appearing for competitive exams in critical care medicine. It is also a must have for every doctor and nurse working in the ICU, as the case scenarios and latest recommendations will help them to have a better approach towards complex situations and provide better care to the patients.

The book provides advice on how to prepare for the examination and how questions should be approached to obtain the highest marks. With more than 350 questions, preparation tips and extensive answer explanations, it is the definitive resource for those attempting the DRCOG. The book is comprehensive and authoritative: written by an experienced author and overseen by a well-respected expert in the field. It is the essential revision guide for those preparing for this examination.

Self-Assessment in Respiratory Medicine is an invaluable tool for any practitioner wishing to test and improve their knowledge of adult respiratory medicine. The updated, second edition includes 261 multiple-choice questions covering the full breadth of the specialty, using clinical vignettes that test not only the readers' knowledge but their ability to apply that knowledge in daily practice. The questions have been compiled and tested by the ERS adult HERMES examination committee specially for this book, making it the perfect revision aid for candidates for the European Diploma, as well as any specialists in respiratory medicine who wish to exercise and improve their skills.

Salient Features Conceptual approach to Radiology - 100 + CONCEPT BOXES 700+ Multimodality Original Images Includes all Recent (NEET / AIIMS / PGI / JIPMER) Pattern MCQs Standard Reference Books and Articles quoted throughout the book Topic-wise index for Integrated Learning with other subjects Includes Normal Cross-sectional imaging Atlas - FIRST and ONLY Book with this feature Tips-&-Tricks for exam preparation along with multiple Mnemonics Named sign and appearances and Investigations of choice are covered as appendices. The European Respiratory Society (ERS) Handbook of Respiratory Medicine, now in its third edition, is a concise, compact and easy-to-read guide to each of the key areas in respiratory medicine. Its 20 sections, written by clinicians and researchers at the forefront of the field, explain the structure and function of the respiratory system, its disorders and how to treat them. The Handbook is a must-have for anyone who intends to remain up to date in the field, and to have within arm's reach a reference that covers everything from the basics to the latest developments in respiratory medicine.

Legal issues in medical practice have been gripping medical doctors by surprise in recent years. Some decades ago legal issues in medical practice never created any problem. A greater awareness is being created by adding doctor's services within the ambit of Consumer Protection Act, 1986. Neither during the undergraduate training nor the postgraduate courses doctors have ever prepared themselves to deal with real-world situations of litigation related to allegations of negligence. While facing litigation related to allegation of negligence in law courts for the first time, a doctor realizes the importance of medical records, consent and expert witness and searches for help books. There are many books available for reference but this one is a handbook for

practising doctors and their lawyers grappled with legal issues culminating in litigations covering a vast number of medical specialties and systems. This book proposes to fill the existing vacuum by creating authentic base required to understand the legal issues in medical practice in India. The esteemed contributors have put in their best efforts to share their knowledge, experience and wisdom with the readers by discussing various landmark legal decisions in the field of (alleged) medical negligence. It aims to make the medical practice safe, ethical, reassuring and hassle-free by discussing various legal issues related to medical practice.

Covering both common and uncommon conditions this book highlights an authentic evidence-based approach for the management of skin disorders. It presents the disorders in an alphabetical order and discusses their clinical features followed by a quick exposition of the relevant aetiology and pathogenesis. It then explains clinical diagnosis with the help of photographs vividly illustrating the features of the disorder. Management of the disorder has then been lucidly explained by organising the therapeutic data into a three-layered evidence-based approach. A large number of flowcharts summarising this approach have been included to serve as quick reference points for the busy clinician.

Revise and prepare for surgical finals with a wide range of questions and

comprehensive answers that test your knowledge and help you learn EMQs and MCQs for Surgical Finals is a unique study and revision resource for final examination practice covering all surgical sub-specialties. Each section of the book begins with a brief outline of the surgical topic followed by a range of clinically based questions to test both knowledge and understanding. The final chapter contains a range of clinical cases that guide you through a real-life scenario on core knowledge tested earlier in the book. This is an essential resource for surgical finals preparation and will assist in providing a rapid refresher, testing understanding, identifying areas of weaknesses and consolidating knowledge. All in all, a real must-have for any student sitting final surgical examinations.

Third in a series of textbooks on pediatric disease primarily based on annual seminars held at the Gant in Aspen, Colorado as part of the Aspen conference on Pediatric Diseases, directed by the Institute for Pediatric Medical Education founded in 1981.

MCQs on cancer staging for NEET-SS is available at: <https://www.amazon.in/dp/B0846RY856>
When I was preparing for DM entrance, I experienced a dearth of books on the subject of oncology and

the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. I have written this book purely from the perspective of an oncologist and by relying on the highest quality material, most importantly the Bible of oncology: DeVita, Hellman, and Rosenberg's Cancer Principles & Practice of Oncology 11th edition. The NCCN guidelines and high impact journals were also referenced as and when needed. The result is this book, which will serve the purpose of equipping the exam going (NEET-SS and board review, along with any other entrance exam where questions about oncology are asked) doctors with the right tool to test and build their knowledge. As the knowledge in the field of oncology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. I will be updating this book periodically for this purpose and I would implore readers to keep themselves updated by going through the quarterly updates of DeVita's oncology that are included with the purchase of the 11th edition and also the NCCN guidelines. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology

and his papers have been published in renowned journals of medical literature. This review guide contains approximately 700 questions, answers and explanations covering a wide range of topics in the field of pediatrics. All questions are organized according to subject matter. The guide also includes two sample test papers.

- More than 5700 Practice Qs with Explanations
- 700 Most Recent Pattern/ New Qs added (New Feature)
- Most Important Topics for Last Minute Revision
- Fully Colored Layout with Special Features (Also Know, Must Know)
- 200+Image-based questions with their Explanations
- Latest Updates from Standard Textbooks
- 4000 Additional Practice Qs in App (New Feature)

Fully revised, this second edition presents trainees with the latest guidance on preparation for OSCE examinations. Comprised of fourteen chapters, the book covers all the key learning points and provides an understanding of the basic concepts behind the OSCE and advice on appropriate response. The new edition includes many new cases and covers numerous topics including genetics, neurology, drugs and vaccines, neonatology, cardiovascular system, endocrinology and much more. Enhanced by nearly 240 clinical photographs and illustrations, the book also includes multiple choice questions to help students prepare for MRCPCH and US Specialty Board examinations. "Critical Care MCQs" is the perfect companion for anyone sitting exams in intensive care, as a training resource or just wanting to improve their knowledge in this constantly developing area of medical practice. Written by critical care doctors with experience of UK and European examination formats, this book leads the reader through 450 true/false questions with referenced explanations, covering core syllabus topics and key influential papers to date. A detailed list of further resources and recommendations relevant to critical care revision is also provided to enable readers to further their knowledge and understanding. It is hoped that this book will prove invaluable for preparation and success in upcoming intensive care exams for both candidates and trainers. This book would be useful for not only candidates sitting the UK Final Fellowship of Intensive Care Medicine (FFICM) and European Diploma of Intensive Care (EDIC) exams, but also the Indian Diploma in Critical Care Medicine (IDCCM), the Diploma of the Irish Board of Intensive Care Medicine (DIBICM), the Australia and New Zealand Fellowship of the College of Intensive Care Medicine (CICM), American Board and any other examinations related to intensive care.

Orthopedics Quick Review for NEET/DNBJAYPEE BROTHERS

PUBLISHERS Microbiology NEET PG Mock Test 200 MCQs Question paper and Answer booklet Q world

This book describes vascular conditions faced by general surgeons, helping them understand the latest techniques, investigations and treatments in vascular surgery. It contains 25 chapters dealing with clinical examination, imaging, surgical exposure of blood vessels, vascular trauma, operative techniques and a variety of conditions commonly dealt with by general surgeons with an interest in vascular surgery. The comprehensive text enables the trainee to relate the large body of factual knowledge to practical application.

The third edition aims to fulfil the long-standing need of the medical students for a concise textbook of community medicine, which makes it an easy and interesting reading, in lucid and simple English. Contributed by 14 eminent teachers, It comprehensively covers all the required topics, explaining the concepts at length and stimulates analytical thinking. The book seeks to encourage students to approach the subject with scientific logic and apply the learned concepts appropriately in the future during his/her professional career.

"This book provides a selection of representative MCQs together with a detailed explanation of each answer covering the topic in depth. Each chapter has been written

by experienced Urological surgeons who have already been successful in passing the examination. In addition to the FRCS(Urol) examination MCQs form the basis of equivalent postgraduate Urological examinations internationally and the scope of this book will be an invaluable addition to individuals sitting the FEBU and similar exams in the USA, Australia and Asian countries. Established consultants may also find the text useful as a 'refresher' in areas outside their subspecialist interest"--

Written in question-answer form, the book covers all the topics of pathology asked repeatedly in University examinations. Flowcharts, figures and microphotographs have been added to help the student cover/revise the subject in a limited time and earn valuable marks in theory, practical and viva-voce examinations.

Intensive care medicine is a dynamic and evolving specialty, requiring its practitioners to be part physician, physiologist and anaesthetist. This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple-choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice.

The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. In addition, it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development, and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine, general surgery and anaesthesia. This new book will complement the existing international best-selling title 'Multiple Choice Questions in Intensive Care Medicine' (ISBN 978 1 903378 64 9), also written by Dr Steve Benington.

This text book is a comprehensive, user friendly and easy to read resource on Biostatistics and Research Methodology. It is meant for undergraduate and post

graduate students of medical and biomedical sciences. Health researchers, research supervisors and faculty members may find it useful as a reference book. This comprehensively updated new edition provides a thorough and dynamically-illustrated overview of the female reproductive organs, care of the female during pregnancy, childbirth and the postnatal period. It is clinically relevant, with a focus on diagnosing, managing and treating disorders and abnormalities and is fully aligned with medical school curricula. **Obstetrics and Gynecology at a Glance:**

- Recaps basic history taking, anatomy and endocrinology and focuses on clinically relevant information
- Covers each topic in a double-page spread, packed with charts, graphs, photographs and visuals
- Includes thoroughly updated sections on reproductive endocrinology, infertility and urogynecology

The companion website at www.ataglanceseries.com/obgyn features interactive flashcards, case studies and multiple-choice questions (MCQs). **Obstetrics and Gynecology at a Glance** is the perfect guide for medical students, junior doctors and midwives, and is ideal for those embarking on clinical rotations and the clerkship.

With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to **Bailey & Love's Short Practice in Surgery**. The book assists readers in their preparation for examinations and to test their
