304 color pages, paperback, improved print quality, and a lot more plant identification details. This unique book is written by Dr. Nicole Apelian, an herbalist with over 20 years of experience working with plants, and Claude Davis, a wild west expert passionate about the lost remedies and wild edibles that kept previous generations alive. The Lost Book of Herbal Remedies has color pictures of over 181 healing plants, lichens, and mushrooms of North America (2-4 pictures/plant for easy identification). Inside, you'll also discover 550 powerful natural remedies made from them for every one of your daily needs. Many of these remedies had been used by our forefathers for hundreds of years, while others come from Dr. Nicole's extensive natural practice. This book was made for people with no prior plant knowledge who are looking for alternative ways to help themselves or their families. This lost knowledge goes against the grain of mainstream medicine and avoids just dealing with symptoms. Instead, it targets the underlying root cause and strengthens your body's natural ability to repair itself. With the medicinal herbal reference guide included, it's very easy to look up your own condition and see exactly which herbs and remedies can help. Let me just offer you a small glimpse of what you'll find inside: On page 145 learn how to make a powerful "relieving" extract using a common backyard weed. This plant acts directly on the

central nervous system to help with all kinds of pain and discomfort. You'll also discover the most effective natural antibiotic that still grows in most American backyards (page 150). Turn to page 43 for the natural protocol Dr. Nicole is recommending for a wide range of auto-immune conditions, after falling prey to MS herself at age 29. I could go on and on because this book contains no less than 800+ other medicinal plants and natural remedies.

Herbal medicine can seem daunting, but you are probably using medicinal herbs in more ways than you realize. If you've ever brewed a cup of tea, drizzled an infused dressing over a salad, or relaxed in the tub with a bath bomb, you've likely been using herbs of some kind. There is a multitude of high-quality herbal medicine remedies you can buy, yet you can also apply basic culinary skills to create homemade and effective herbal remedies - and probably save a little bit of money in the process! In this book, you will be given 30 Best Recipes for Herbal Remedies. You will be proud of making your own herbs.

The author of Sweet Remedies offers a straightforward, empowering guide to homegrown herbal remedies for illness injuries, and preventative health. Most of us understand the value of eating and buying local. Taking back our food, goods, and

services from multinational corporations and sourcing them from small growers, producers, artisans, and entrepreneurs benefits our families, our environment, and our communities. Heal Local argues that “100-mile healthcare” can be equally valuable in terms of how we treat illness and injury and maintain wellness. This innovative guide demonstrates that by harnessing multifaceted whole plants, we can rely on homegrown or regionally produced herbs rather than importing exotics and non-natives. Based on the small apothecary model, author Dawn Combs explains how to:

- Maximize the benefits of homegrown first aid, from increased freshness, potency, and effectiveness to community resilience and local economic growth
- Make home herbal healthcare less intimidating and more attainable, by focusing on twenty herbs to effectively treat most common injuries and ailments
- Implement a local medicine culture safely and sustainably, while protecting and respecting wild plant populations

Many herbals overwhelm their readers, presenting a list of hundreds of herbs, each with a different purpose. Heal Local empowers readers by showing that you don't need to know everything about every herb on the planet to create a complete home apothecary. Anyone can be self-sufficient with their wellness, regardless of their previous knowledge, experience, or available space.
