"Despite the modern trend towards empowering patients and giving them more choice, the nuts and bolts of medical practice largely remain a mystery - a closed box. In fact, the more health information is available on the internet, the more patients can feel swamped and confused. The Appointment offers an intimate and honest account of how a typical GP tries to make sense of a patient's health problems and manage them within the constraints of their health system and the short ten minute appointment. We have always been fascinated by our own health but in recent years, especially for older people, seeing the GP has become a regular activity. In the past decade the average number of times a patient visits his or her GP has almost doubled. Despite this increasing demand, getting to see a GP is not always easy so those intimate ten minutes with the doctor are extremely precious, and there's more than ever to cram in. Taking the reader through a typical morning surgery, The Appointment shines a light onto what is really going on in those central ten minutes and lets the reader, for the first time, get inside the mind of the person sitting in front of them - the professional they rely on to look after their health. Experienced GP Dr Graham Easton shows how GPs really think, lays bare their professional strengths and weaknesses, and exposes what really influences their decisions about their patients' health."--Publisher's description.

The biography of a medical maverick who is challenging scientific convention with his astounding approach to achieving and maintaining health. Dr. Irving Dardik's radical notions about how all matter moves in interconnected waves has

drawn deep skepticism from physicists, and his early attempts to put his theory into practice in the field of health care got him banned from practicing medicine in the 1990s. But now, after a decade's worth of rigorous research that seems to support Dardik's SuperWave theory, scientists at such esteemed institutions as MIT, Harvard, and Stanford Research International are signing on with Dardik's team to probe the possibilities. For example, Dardik's unique approach to physical exercise, based on his Principle, has achieved some remarkable successes in reversing symptoms of chronic disease. *Making Waves* weaves together two fascinating stories: Dardik's personal progression from vascular surgeon to scientific iconoclast and pioneer, chronicling his struggle to convince the scientific community to take him seriously; and the evolution of his mind-expanding SuperWave Principle. Colleagues--skeptics as well as supporters--consider the impact of SuperWave theory on current thinking about nature on all scales, from the universe to the subatomic world, and in the realms of biology, applied science, and medicine. The resulting read will interest those concerned with their own health and vitality as well as those curious about the fundamental workings of nature.

By the New York Times bestselling author of *The Bone Clocks* | Shortlisted for the Man Booker Prize A postmodern visionary and one of the leading voices in twenty-first-century fiction, David Mitchell combines flat-out adventure, a Nabokovian love of puzzles, a keen eye for character, and a taste for mind-bending, philosophical and scientific speculation in the tradition of Umberto Eco, Haruki Murakami, and Philip K. Dick. The result is brilliantly original fiction as profound as it is playful. In this groundbreaking novel, an influential favorite among a new generation of writers, Mitchell explores with daring artistry fundamental questions of reality and identity. *Cloud Atlas* begins in 1850 with Adam Ewing, an American notary voyaging from the Chatham Isles to his home in California. Along the way, Ewing is befriended by a physician, Dr. Goose, who begins to treat him for a rare species of brain parasite. . . . Abruptly, the action jumps to Belgium in 1931, where Robert Frobisher, a disinherited bisexual composer, contrives his way into the household of an infirm maestro who has a beguiling wife and a nubile daughter. . . . From there we jump to the West Coast in the 1970s and a troubled reporter named Luisa Rey, who stumbles upon a web of corporate greed and murder that threatens to claim her life. . . . And onward, with dazzling virtuosity, to an inglorious present-day England; to a Korean superstate of the near future where neocapitalism has run amok; and, finally, to a postapocalyptic Iron Age Hawaii in the last days of history. But the story doesn't end even there. The narrative then boomerangs back through centuries and space, returning by the same route, in reverse, to its starting point. Along the way, Mitchell reveals how his disparate characters connect, how their fates intertwine, and how their souls drift across time like clouds across the sky. As wild as a videogame, as mysterious as a Zen koan, *Cloud Atlas* is an unforgettable tour de force that, like its incomparable author, has transcended its cult classic status to become a worldwide phenomenon. Praise for *Cloud Atlas* “[David] Mitchell is, clearly, a genius. He writes as though at the helm of some perpetual dream machine, can evidently do anything, and his ambition is written in magma across this novel’s every page.”—The New York Times Book Review “One of those how-the-holy-hell-did-he-do-it? modern classics that no doubt is—and should be—read by any student of contemporary literature.”—Dave Eggers “Wildly entertaining . . . a head rush, both action-packed and chillingly ruminative.”—People “The novel as series of nested dolls or Chinese boxes, a puzzle-book, and yet—not just dazzling, amusing, or clever but

heartbreaking and passionate, too. I've never read anything quite like it, and I'm grateful to have lived, for a while, in all its many worlds."—Michael Chabon "Cloud Atlas ought to make [Mitchell] famous on both sides of the Atlantic as a writer whose fearlessness is matched by his talent."—The Washington Post Book World "Thrilling . . . One of the biggest joys in Cloud Atlas is watching Mitchell sashay from genre to genre without a hitch in his dance step."—Boston Sunday Globe "Grand and elaborate . . . [Mitchell] creates a world and language at once foreign and strange, yet strikingly familiar and intimate."—Los Angeles Times

"In a university on planet Sweeney Earth, Paul and Arlene Cole have designed TITAN -- designed to penetrate the vortex and access the very foundations of reality. The Master, who is being pursued by the Chronivores, thinks that TITAN could be the perfect means of revenge. Mel's old friend Anjeliqua also works at the university and the Master charms her into giving him access to TITAN. He recalibrates its settings and locates the Quantum Archimage, the power source of the Chronivores. When this energy is channeled into Anjeliqua herself, she is transformed into the Quantum Archangel, the living embodiment of the Chronivores' power source. With her new-found power, her plan is to 'make things better. For everyone.' If she goes ahead, reality will begin to fracture, as conflicting realities struggle to coexist. Otherwise, when the Chronivores detect the alternate timelines, they will consume every last bit of it. Can the Doctor intervene before the universe disintegrates?"--Amazon.com.

A Tale of Two Cities (1859) is a historical novel by Charles Dickens, set in London and Paris before and during the French Revolution. The novel tells the story of the French Doctor Manette, his 18-year-long imprisonment in the Bastille in Paris and his release to live in London with his daughter Lucie, whom he had never met. The story is set against the conditions that led up to the French Revolution and the Reign of Terror.

The fourth volume in the popular series that began with *Ten Poems to Change Your Life*, *Ten Poems to Last a Lifetime* focuses on what it means to be truly human. In it, Roger Housden offers us poems on life and death, happiness, seeing ourselves in relation to the world, and, of course, the ineffable—the things that really matter when the chips are down. He describes these passionate poems as “bread for the soul and fire for the spirit.” The poets Housden has chosen are Billy Collins, Hayden Carruth, Dorianne Laux, James Wright, Naomi Shihab Nye, and Mary Oliver from the United States, D. H. Lawrence and John Keats from England, Rainer Maria Rilke from Germany, Fleur Adcock from New Zealand, and Seng-Ts’an from sixth-century China. And yes, that adds up to eleven, not ten. Housden decided to include a bonus poem for his faithful readers in this, the final volume of the series. As before, Housden’s luminous essays provide an elegant and easy passage into the sometimes daunting world of poetry, enabling readers to feel that in him they have found a trusted guide and mentor.
