In *Doing Race*, scholars from across the disciplines have written original essays on race and ethnicity aimed at an undergraduate audience. The book provides a practical response to the view, common in American debates, that race and ethnicity no longer matter, or that race and ethnicity should not be taken into account when deciding how to structure society and formulate public policy. It also answers the question of why race and ethnicity play such a large role in fueling violence around the globe. *Doing Race* shows that race and ethnicity matter because they are important resources in answering the fundamental, even universal Who am I? and Who are we? questions. It demonstrates how understanding how identities are shaped by race and ethnicity is central to understanding individual and collective behavior in the United States and throughout the world. Drawing on the latest science and scholarship, these original essays provide undergraduates with an effective framework for understanding the persistence of racial inequalities and problems in the 21st century.

*Smoke and Mirrors* is a passionate, richly nuanced work that shows television as a circus, a wishing well, and a cure for loneliness. Ranging from Ed Sullivan to cyberspace, from kid shows to cable, and from the cheap thrills of "action adventure" to the solemn boredom of PBS pledge week, Leonard argues for a whole new way of thinking about television. For Leonard, the situation comedy is a socializing agency, the talk show is a legitimating agency, the made-for-television movie is the last redoubt of social conscience, and television criticism itself is the last refuge of time-serving thugs and postmodernists. Instead of scapegoating television as the cause of crime in our streets, stupidity in our schools, and spectacle rather than substance in our government, Leonard sees something else inside the box: an echo chamber and a feedback loop, a medium neither wholly innocent of nor entirely responsible for the frantic disorder it brings into our homes.

First published in 2016, *The Good Immigrant* has since been hailed as a modern classic and credited with reshaping the discussion about race in contemporary Britain. It brings together a stellar cast of the country's most exciting voices to reflect on why immigrants come to the UK, why they stay and what it means to be 'other' in a place that doesn't seem to want you, doesn't truly accept you – however many generations you've been here – but still needs you for its diversity monitoring forms. This 5th anniversary edition, featuring a new preface by editor Nikesh Shukla, shows that the pieces collected here are as poignant, challenging, angry, humorous, heartbreaking and important as ever.

Eighteen essays by prominent scholars reflect on the cultural, historical, political, personal, legal, sexual, and linguistic implications of the Thomas hearings and Hill's accusations

In this New York Times bestseller, Ijeoma Oluo offers a hard-hitting but user-friendly examination of race in America Widespread reporting on aspects of white supremacy -- from police brutality to the mass incarceration of Black Americans -- has put a media spotlight on racism in our society. Still, it is a difficult subject to talk about. How do you tell your roommate her jokes are racist? Why did your sister-in-law take umbrage when you asked to touch her hair -- and how do you make it right? How do you explain white privilege to your white, privileged friend? In *So You Want to Talk About Race*, Ijeoma Oluo guides readers of all races through subjects ranging from intersectionality and affirmative action to "model minorities" in an attempt to make the seemingly impossible possible: honest conversations about race and racism, and how they infect almost every aspect of American life. "Oluo gives us -- both white people and people of color -- that language to engage in clear, constructive, and confident dialogue with each other about how to deal with racial prejudices and biases." -- National Book Review "Generous and empathetic, yet usefully blunt . . . it's for anyone who wants to be smarter and more empathetic about matters of race and engage in more productive anti-racist action." -- Salon (Required Reading)

Challenges narrow perceptions of Blackness as both an identity and lived reality to understand the diversity of what it means to be Black in the US and around the world What exactly is Blackness and what does it mean to be Black? Is Blackness a matter of biology or consciousness? Who determines who is Black and who is not? Who's Black, who's not, and who cares? In the United States, a Black person has come to be defined as any person with any known Black ancestry. Statutorily referred to as "the rule of hypodescent," this definition of Blackness is more popularly known as the "one-drop rule," meaning that a person with any trace of Black ancestry, however small or (in)visible, cannot be considered White. A method of social order that began almost immediately after the arrival of enslaved Africans in America, by 1910 it was the law in almost all southern states. At a time when the one-drop rule functioned to protect and preserve White racial purity, Blackness was both a matter of biology and the law. One was either Black or White. Period. Has the social and political landscape changed one hundred years later? *One Drop* explores the extent to which historical definitions of race continue to shape contemporary racial identities and lived experiences of racial difference. Featuring the perspectives of 60 contributors representing 25 countries and combining candid narratives with striking portraiture, this book provides living testimony to the diversity of Blackness. Although contributors use varying terms to self-identify, they all see themselves as part of the larger racial, cultural, and social group generally referred to as Black. They have all had their identity called into question simply because they do not fit neatly into the stereotypical "Black box"—dark skin, "kinky" hair, broad nose, full lips, etc. Most have been asked "What are you?" or the more politically correct "Where are you from?" throughout their lives. It is through contributors' lived experiences with and lived imaginings of Black identity that we can visualize multiple possibilities for Blackness.

Argues against racial political practices that promote "correctness" rather than directly addressing racial problems, encouraging consideration based upon actual merit

In this "vulnerable yet powerful and provocative collection of essays, Savala offers ... reflections on living between society's most charged, politicized, and intractably polar spaces: between black and white, between rich and poor, between thin and fat--as a woman"--

NEW YORK TIMES BESTSELLER New York Times bestselling author and acclaimed linguist John McWhorter argues that an illiberal neoracism, disguised as antiracism, is hurting Black communities and weakening the American social fabric. Americans of good will on both the left and the right are secretly asking themselves the same question: how has the conversation on race in America gone so crazy? We're told to read books and listen to music by people of color but that wearing certain clothes is "appropriation." We hear that being white automatically gives you privilege and that being Black makes you a victim. We want to speak up but fear we'll be seen as unwoke, or worse, labeled a racist. According to John McWhorter, the problem is that a well-meaning but pernicious form of antiracism has become, not a progressive ideology, but a religion—and one that's illogical, unreachable, and unintentionally neoracist. In *Woke Racism*, McWhorter

reveals the workings of this new religion, from the original sin of “white privilege” and the weaponization of cancel culture to ban heretics, to the evangelical fervor of the “woke mob.” He shows how this religion that claims to “dismantle racist structures” is actually harming his fellow Black Americans by infantilizing Black people, setting Black students up for failure, and passing policies that disproportionately damage Black communities. The new religion might be called “antiracism,” but it features a racial essentialism that’s barely distinguishable from racist arguments of the past. Fortunately for Black America, and for all of us, it’s not too late to push back against woke racism. McWhorter shares scripts and encouragement with those trying to deprogram friends and family. And most importantly, he offers a roadmap to justice that actually will help, not hurt, Black America.

These essays analyze how race affects people's lives and relationships in all settings, from the United States to Great Britain and from Hawai'i to Chinese Central Asia. They contemplate the racial positions in various societies of people called Black and people called White, of Asians and Pacific Islanders, and especially of those people whose racial ancestries and identifications are multiple. Here for the first time are Spickard's trenchant analyses of the creation of race in the South Pacific, of DNA testing for racial ancestry, and of the meaning of multiplicity in the age of Barack Obama. "A gathering of essays by the acclaimed Harvard legal scholar and public intellectual, that explores all the relevant cultural and historical issues of the past quarter century having to do with race and race relations in America. With a gimlet eye, decency and humaneness (and often courting controversy), Randall Kennedy chronicles his reactions over the past quarter century to arguments, events, and people that have compelled him to put pen to paper. Three beliefs that are sometimes in tension with one another infuse these pages. First, a massive amount of cruel racial injustice continues to beset the United States of America, an ugly reality that has become alarmingly obvious with the ascendancy of Donald J. Trump and the various political, cultural, and social pathologies that he and many of his followers display and reinforce. Second, there is much about which to be inspired when surveying the African American journey from slavery to freedom to engagement in practically every aspect of life in the United States. Third, an openness to complexity, paradox, and irony should attend any serious investigation of human affairs. Kennedy has tried to allow that sensibility ample leeway in the essays, prompting within himself surprise, ambivalence, and, on several occasions, a heartfelt need to express apology for prior oversights and mistaken judgments. *Say It Loud!* is nothing less than Randall Kennedy's magnum opus"--

All the grief, grit, and unassailable dignity of the civil rights movement are evoked in this illustrated edition of James Baldwin's *The Fire Next Time*, with photographs by Steve Schapiro. Together, Baldwin's frank account of the black experience and Schapiro's vital images offer poetic and potent testimony to one of the most important...

In *Place, Race, and Story*, author Ned Kaufman has collected his own essays dedicated to the proposition of giving the next generation of preservationists not only a foundational knowledge of the field of study, but more ideas on where they can take it. Through both big-picture essays considering preservation across time, and descriptions of work on specific sites, the essays in this collection trace the themes of place, race, and story in ways that raise questions, stimulate discussion, and offer a different perspective on these common ideas. Including unpublished essays as well as established works by the author, *Place, Race, and Story* provides a new outline for a progressive preservation movement – the revitalized movement for social progress.

In this “urgently relevant”\* collection featuring the landmark essay “The Case for Reparations,” the National Book Award–winning author of *Between the World and Me* “reflects on race, Barack Obama’s presidency and its jarring aftermath”\*—including the election of Donald Trump. New York Times Bestseller • Finalist for the PEN/Jean Stein Book Award, the Los Angeles Times Book Prize, and the Dayton Literary Peace Prize Named One of the Best Books of the Year by The New York Times • USA Today • Time • Los Angeles Times • San Francisco Chronicle • Essence • O: The Oprah Magazine • The Week • Kirkus Reviews \*Kirkus Reviews (starred review) “We were eight years in power” was the lament of Reconstruction-era black politicians as the American experiment in multiracial democracy ended with the return of white supremacist rule in the South. In this sweeping collection of new and selected essays, Ta-Nehisi Coates explores the tragic echoes of that history in our own time: the unprecedented election of a black president followed by a vicious backlash that fueled the election of the man Coates argues is America’s “first white president.” But the story of these present-day eight years is not just about presidential politics. This book also examines the new voices, ideas, and movements for justice that emerged over this period—and the effects of the persistent, haunting shadow of our nation’s old and unreconciled history. Coates powerfully examines the events of the Obama era from his intimate and revealing perspective—the point of view of a young writer who begins the journey in an unemployment office in Harlem and ends it in the Oval Office, interviewing a president. *We Were Eight Years in Power* features Coates’s iconic essays first published in *The Atlantic*, including “Fear of a Black President,” “The Case for Reparations,” and “The Black Family in the Age of Mass Incarceration,” along with eight fresh essays that revisit each year of the Obama administration through Coates’s own experiences, observations, and intellectual development, capped by a bracingly original assessment of the election that fully illuminated the tragedy of the Obama era. *We Were Eight Years in Power* is a vital account of modern America, from one of the definitive voices of this historic moment.

In *Selected Writings on Race and Difference*, editors Paul Gilroy and Ruth Wilson Gilmore gather more than twenty essays by Stuart Hall that highlight his extensive and groundbreaking engagement with race, representation, identity, difference, and diaspora. Spanning the whole of his career, this collection includes classic theoretical essays such as “The Whites of Their Eyes” (1981) and “Race, the Floating Signifier” (1997). It also features public lectures, political articles, and popular pieces that circulated in periodicals and newspapers, which demonstrate the breadth and depth of Hall's contribution to public discourses of race. Foregrounding how and why the analysis of race and difference should be concrete and not merely descriptive, this collection gives organizers and students of social theory ways to approach the

interconnections of race with culture and consciousness, state and society, policing and freedom.

Perspectives on race today Featuring new and engaging essays by noted anthropologists and illustrated with full color photos, RACE: Are We So Different? is an accessible and fascinating look at the idea of race, demonstrating how current scientific understanding is often inconsistent with popular notions of race. Taken from the popular national public education project and museum exhibition, it explores the contemporary experience of race and racism in the United States and the often-invisible ways race and racism have influenced laws, customs, and social institutions.

The past decade has been one of the most racially turbulent periods in the modern era, as the complicated breakthrough of the Obama presidency gave way to the racially charged campaigning and eventual governing of Donald Trump. Keepin' It Real presents a wide-ranging group of essays that take on key aspects of the current landscape surrounding racial issues in America, including the place of the Obamas, the rise of the alt-right and White nationalism, Donald Trump, Colin Kaepernick and the backlash against his protests, Black Lives Matter, sexual politics in the black community, and much more. America's racial problems aren't going away any time soon. Keepin' It Real will serve as a marker of the arguments we're having right now, and an argument for the changes we need to make to become the better nation we've long imagined ourselves to be.

"Digital media technologies like the Internet create and host the social networks, virtual worlds, online communities, and media texts where it was once thought that we would all be the same, anonymous users with infinite powers. Instead, the essays in Race After the Internet show us that the Internet and other computer-based technologies are complex topographies of power and privilege, made up of walled gardens, new (plat)forms of economic and technological exclusion, and both new and old styles of race as code, interaction, and image. Investigating how racialization and racism are changing in web 2.0 digital media culture, Race After the Internet contains interdisciplinary essays on the shifting terrain of racial identity and its connections to digital media, including Facebook and MySpace, YouTube and viral video, WiFi infrastructure, the One Laptop Per Child (OLPC) program, genetic ancestry testing, DNA databases in health and law enforcement, and popular online games like World of Warcraft. Ultimately, the collection broadens the definition of the "digital divide" in order to convey a more nuanced understanding of usage, meaning, participation, and production of digital media technology in light of racial inequality."--

"Ross Gay's eye lands upon wonder at every turn, bolstering my belief in the countless small miracles that surround us." —Tracy K. Smith, Pulitzer Prize winner and U.S. Poet Laureate The winner of the NBCC Award for Poetry offers up a spirited collection of short lyric essays, written daily over a tumultuous year, reminding us of the purpose and pleasure of praising, extolling, and celebrating ordinary wonders. Ross Gay's *The Book of Delights* is a genre-defying book of essays—some as short as a paragraph; some as long as five pages—that record the small joys that occurred in one year, from birthday to birthday, and that we often overlook in our busy lives. His is a meditation on delight that takes a clear-eyed view of the complexities, even the terrors, in his life, including living in America as a black man; the ecological and psychic violence of our consumer culture; the loss of those he loves. Among Gay's funny, poetic, philosophical delights: the way Botan Rice Candy wrappers melt in your mouth, the volunteer crossing guard with a pronounced tremor whom he imagines as a kind of boat-woman escorting pedestrians across the River Styx, a friend's unabashed use of air quotes, pickup basketball games, the silent nod of acknowledgment between black people. And more than any other subject, Gay celebrates the beauty of the natural world—his garden, the flowers in the sidewalk, the birds, the bees, the mushrooms, the trees. This is not a book of how-to or inspiration, though it could be read that way. Fans of Roxane Gay, Maggie Nelson, and Kiese Laymon will revel in Gay's voice, and his insights. *The Book of Delights* is about our connection to the world, to each other, and the rewards that come from a life closely observed. Gay's pieces serve as a powerful and necessary reminder that we can, and should, stake out a space in our lives for delight.

This book is a compilation of expositions on race and ethnicity, written from multiple disciplinary approaches including history, sociology, women's studies, and anthropology. Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, *The Absolutely True Diary of a Part-Time Indian*, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. ? From the beginning, both Robert Kirkman's comics and AMC's series of *The Walking Dead* have brought controversy in their presentations of race, gender and sexuality. Critics and fans have contended that the show's identity politics have veered toward the decidedly conservative, offering up traditional understandings of masculinity, femininity, heterosexuality, racial hierarchy and white supremacy. This collection of new essays explores the complicated nature of relationships among the story's survivors. In the end, characters demonstrate often-surprising shifts that consistently comment on identity politics. Whether agreeing or disagreeing with critics, these essays offer a rich view of how gender, race, class and sexuality intersect in complex new ways in the TV series and comics.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black

body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

*Relational Formations of Race* brings African American, Chicana/Latina, Asian American, and Native American studies together in a single volume, enabling readers to consider the racialization and formation of subordinated groups in relation to one another. These essays conceptualize racialization as a dynamic and interactive process; group-based racial constructions are formed not only in relation to whiteness, but also in relation to other devalued and marginalized groups. The chapters offer explicit guides to understanding race as relational across all disciplines, time periods, regions, and social groups. By studying race relationally, and through a shared context of meaning and power, students will draw connections among subordinated groups and will better comprehend the logic that underpins the forms of inclusion and dispossession such groups face. As the United States shifts toward a minority-majority nation, *Relational Formations of Race* offers crucial tools for understanding today's shifting race dynamics.

Nella Larsen (1891-1964) occupies a central place in African-American and Modernist literature, and her status as a Harlem Renaissance woman writer is rivaled only by Zora Neale Hurston's. This Norton Critical Edition of Larsen's electrifying 1929 novel is accompanied by Carla Kaplan's insightfully detailed introduction, explanatory annotations, and a Note on the Text "Backgrounds and Contexts" connects *Passing* to the historical events of the day, most notably the sensational Rhinelander/Jones case of 1925. Fourteen contemporary reviews are reprinted, including those by Alice Dunbar-Nelson, W. B. Seabrook, Mary Griffin, and W. E. B. Du Bois. Little-known documents, including those by Juanita Ellsworth and Caleb Johnson, reveal America's fascination with-and fear of-the cultural phenomenon of passing. Also included are Larsen's statements on the novel and on passing, as well as a generous selection of her letters. The theme of "The Tragic Mulatto(a)" in American literature is explored through related writings by Lydia Maria Child, William Wells Brown, Kate Chopin, Mark Twain, Countee Cullen, and Langston Hughes, among others. Finally, Joseph Seamon Cotter, Jr., Jessie Redmon Fauset, Countee Cullen, W. E. B. Du Bois, Allen Semi [Nella Larsen], George S. Schuyler, Carl Van Vechten, and Langston Hughes voice their impressions of passing from the perspective of the Harlem Renaissance. "Criticism" provides sixteen diverse interpretations of *Passing*, among others, Deborah E. McDowell, Judith Butler, Cheryl A. Wall, Thadious M. Davis, George Hutchinson, Mary Helen Washington, Ann duCille, Gayle Wald, Claudia Tate, and Jennifer DeVere Brody. A Chronology and Selected Bibliography are also included. Book jacket.

2019 Best-Of Lists: 10 Best Science Books of the Year (Smithsonian Magazine) · Best Science Books of the Year (NPR's Science Friday) · Best Science and Technology Books from 2019" (Library Journal) An astute and timely examination of the re-emergence of scientific research into racial differences. *Superior* tells the disturbing story of the persistent thread of belief in biological racial differences in the world of science. After the horrors of the Nazi regime in World War II, the mainstream scientific world turned its back on eugenics and the study of racial difference. But a worldwide network of intellectual racists and segregationists quietly founded journals and funded research, providing the kind of shoddy studies that were ultimately cited in Richard Herrnstein and Charles Murray's 1994 title *The Bell Curve*, which purported to show differences in intelligence among races. If the vast majority of scientists and scholars disavowed these ideas and considered race a social construct, it was an idea that still managed to somehow survive in the way scientists thought about human variation and genetics. Dissecting the statements and work of contemporary scientists studying human biodiversity, most of whom claim to be just following the data, Angela Saini shows us how, again and again, even mainstream scientists cling to the idea that race is biologically real. As our understanding of complex traits like intelligence, and the effects of environmental and cultural influences on human beings, from the molecular level on up, grows, the hope of finding simple genetic differences between "races"—to explain differing rates of disease, to explain poverty or test scores, or to justify cultural assumptions—stubbornly persists. At a time when racialized nationalisms are a resurgent threat throughout the world, *Superior* is a rigorous, much-needed examination of the insidious and destructive nature of race science—and a powerful reminder that, biologically, we are all far more alike than different.

The classic, bestselling book on the psychology of racism -- now fully revised and updated *Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem to address or a coping strategy? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about enabling communication across racial and ethnic divides. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand the dynamics of race in America.*

Doing Race 21 Essays for the 21st Century W W Norton & Company Incorporated

By turns heartbreaking and hilarious, troubling and uplifting, these "electric" essays come together to create a provocative, conversation-sparking, multivocal portrait of modern America (The Washington Post). From Trump's proposed border wall and travel ban to the marching of white supremacists in Charlottesville, America is consumed by tensions over immigration and the question of which bodies are welcome. In this much-anticipated follow-up to the bestselling UK edition, hailed by Zadie Smith as "lively and vital," editors Nikesh Shukla and Chimene Suleyman hand the microphone to an incredible range of writers whose humanity and right to be here is under attack. Chigozie Obioma unpacks an Igbo proverb that helped him navigate his journey to America from Nigeria. Jenny Zhang analyzes cultural appropriation in 90s fashion, recalling her own pain and confusion as a teenager trying to fit in. Fatimah Asghar describes the flood of memory and emotion triggered by an encounter with an Uber driver from Kashmir. Alexander Chee writes of a visit to Korea that changed his relationship to his heritage. These writers, and the many others in this urgent collection, share powerful personal stories of living between cultures and languages while struggling to figure out who they are and where they belong.

As a young militant in the 26th of July Movement, Esteban Morales Domínguez participated in the overthrow of the Batista regime and the triumph of the Cuban Revolution. The revolutionaries, he understood, sought to establish a more just and egalitarian society. But Morales Domínguez, an Afro-Cuban, knew that the complicated question of race could not be ignored, or simply willed away in a post-revolutionary context. Today, he is one of Cuba's most prominent Afro-Cuban intellectuals and its leading authority

on the race question. Available for the first time in English, the essays collected here describe the problem of racial inequality in Cuba, provide evidence of its existence, constructively criticize efforts by the Cuban political leadership to end discrimination, and point to a possible way forward. Morales Dominguez surveys the major advancements in race relations that occurred as a result of the revolution, but does not ignore continuing signs of inequality and discrimination. Instead, he argues that the revolution must be an ongoing process and that to truly transform society it must continue to confront the question of race in Cuba.

Personal essays exploring identity, work, family, and community through the prism of race and black culture.

Philosophers on Race adds a new dimension to current research on race theory by examining the historical roots of the concept in the works of major Western philosophers.

Many Americans, holding fast to the American Dream and the promise of equal opportunity, claim that social class doesn't matter. Yet the ways we talk and dress, our interactions with authority figures, the degree of trust we place in strangers, our religious beliefs, our achievements, our senses of morality and of ourselves—all are marked by social class, a powerful factor affecting every domain of life. In *Facing Social Class*, social psychologists Susan Fiske and Hazel Rose Markus, and a team of sociologists, anthropologists, linguists, and legal scholars, examine the many ways we communicate our class position to others and how social class shapes our daily, face-to-face interactions—from casual exchanges to interactions at school, work, and home. *Facing Social Class* exposes the contradiction between the American ideal of equal opportunity and the harsh reality of growing inequality, and it shows how this tension is reflected in cultural ideas and values, institutional practices, everyday social interactions, and psychological tendencies. Contributor Joan Williams examines cultural differences between middle- and working-class people and shows how the cultural gap between social class groups can influence everything from voting practices and political beliefs to work habits, home life, and social behaviors. In a similar vein, Annette Lareau and Jessica McCrory Calarco analyze the cultural advantages or disadvantages exhibited by different classes in institutional settings, such as those between parents and teachers. They find that middle-class parents are better able to advocate effectively for their children in school than are working-class parents, who are less likely to challenge a teacher's authority. Michael Kraus, Michelle Rheinschmidt, and Paul Piff explore the subtle ways we signal class status in social situations. Conversational style and how close one person stands to another, for example, can influence the balance of power in a business interaction. Diana Sanchez and Julie Garcia even demonstrate that markers of low socioeconomic status such as incarceration or unemployment can influence whether individuals are categorized as white or black—a finding that underscores how race and class may work in tandem to shape advantage or disadvantage in social interactions. The United States has one of the highest levels of income inequality and one of the lowest levels of social mobility among industrialized nations, yet many Americans continue to buy into the myth that theirs is a classless society. *Facing Social Class* faces the reality of how social class operates in our daily lives, why it is so pervasive, and what can be done to alleviate its effects.

Since its launch in 2006, Twitter has served as a major platform for political performance, social justice activism, and large-scale public debates over race, ethnicity, gender, sexuality, and nationality. It has empowered minoritarian groups to organize protests, articulate often-underrepresented perspectives, and form community. It has also spread hashtags that have been used to bully and silence women, people of color, and LGBTQ people. *#identity* is among the first scholarly books to address the positive and negative effects of Twitter on our contemporary world. Hailing from diverse scholarly fields, all contributors are affiliated with The Color of New Media, a scholarly collective based at the University of California, Berkeley. *The Color of New Media* explores the intersections of new media studies, critical race theory, gender and women's studies, and postcolonial studies. The essays in *#identity* consider topics such as the social justice movements organized through *#BlackLivesMatter*, *#Ferguson*, and *#SayHerName*; the controversies around *#WhyIStayed* and *#CancelColbert*; Twitter use in India and Africa; the integration of hashtags such as *#nohomo* and *#onfleek* that have become part of everyday online vernacular; and other ways in which Twitter has been used by, for, and against women, people of color, LGBTQ, and Global South communities. Collectively, the essays in this volume offer a critically interdisciplinary view of how and why social media has been at the heart of US and global political discourse for over a decade.

*\*A Vintage Original\** From the much-acclaimed novelist and essayist, a beautifully rendered, poignant collection of personal essays, chronicling immigrant and Iranian-American life in our contemporary moment. Novelist Porochista Khakpour's family moved to Los Angeles after fleeing the Iranian Revolution, giving up their successes only to be greeted by an alienating culture. Growing up as an immigrant in America means that one has to make one's way through a confusing tangle of conflicting cultures and expectations. And Porochista is pulled between the glitzy culture of Tehrangeles, an enclave of wealthy Iranians and Persians in LA, her own family's modest life and culture, and becoming an assimilated American. Porochista rebels--she bleaches her hair and flees to the East Coast, where she finds her community: other people writing and thinking at the fringes. But, 9/11 happens and with horror, Porochista watches from her apartment window as the towers fall. Extremism and fear of the Middle East rises in the aftermath and then again with the election of Donald Trump. Porochista is forced to finally grapple with what it means to be Middle-Eastern and Iranian, an immigrant, and a refugee in our country today. *Brown Album* is a stirring collection of essays, at times humorous and at times profound, drawn from more than a decade of Porochista's work and with new material included. Altogether, it reveals the tolls that immigrant life in this country can take on a person and the joys that life can give.

In these essays, brought together by the scholar Wahneema Lubiano, some of today's most respected intellectuals share their ideas on race, power, gender, and society. The authors, including Cornel West, Angela Y. Davis, and Toni Morrison, argue that we have reached a crisis of democracy represented by an ominous shift toward a renewed white nationalism in which racism is operating in coded, quasi-respectable new forms.
