Deviations: Submission Chris Owen, Jodi Payne, 2019-12-31

Bareback Chris Owen, 2024-08-31 Jake Taggart's life was almost perfect. He'd worked hard to overcome his past, and he loved his job as foreman on a ranch in Arkansas. The only thorn in his side was a dark-eyed cowboy named Tornado whose stubborn attitude brought frustration and confusion to Jake's mostly happy existence. A late spring rainstorm brings out hidden passions and unleashes a chain of events neither of them expected--and eventually brings about events that threaten to destroy them and what they worked to create. Strong wills and forceful personalities make for intense encounters...but is it enough to keep love alive?

The Economics of Social Determinants of Health and Health Inequalities World Health Organization, 2013 This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy--

Soft Limits Jodi Payne, 2019-11-10 Fans of the iconic *Deviations* series will fondly recall Bradford as the beloved owner and Master of the elite and exclusively male BDSM club that anchors the series, and also as the wise man who introduced Tobias and Noah. Dominant Bradford's story is one defined by sudden opportunity, unimaginable heartbreak, and new-found purpose. His calling is to provide a safe and supportive environment for men in the lifestyle. Bringing Doms and subs together is his superpower, yet he feels fated to be alone himself. In this prequel to the series, you'll discover how Bradford is first drawn to Nikki, a beautiful and hungry young man living on the streets, and the unexpected ways Bradford grows and changes while helping Nikki understand a world of strange, new desires. *Deviations* readers already know outcome of Bradford and Nikki's journey together. *Soft Limits* is a deep-dive into Bradford's story, into what makes the Dom tick, and how he ended up with ownership of the club. It also introduces Nikki, the sub that tests Bradford's patience, steals his heart,

and soothes his soul.

Domination and the Arts of Resistance James C. Scott, 2008-10-01 Play fool, to catch wise.--proverb of Jamaican slaves Confrontations between the powerless and powerful are laden with deception--the powerless feign deference and the powerful subtly assert their mastery. Peasants, serfs, untouchables, slaves, laborers, and prisoners are not free to speak their minds in the presence of power. These subordinate groups instead create a secret discourse that represents a critique of power spoken behind the backs of the dominant. At the same time, the powerful also develop a private dialogue about practices and goals of their rule that cannot be openly avowed. In this book, renowned social scientist James C. Scott offers a penetrating discussion both of the public roles played by the powerful and powerless and the mocking, vengeful tone they display off stage--what he terms their public and hidden transcripts. Using examples from the literature, history, and politics of cultures around the world, Scott examines the many guises this interaction has taken throughout history and the tensions and contradictions it reflects. Scott describes the ideological resistance of subordinate groups--their gossip, folktales, songs, jokes, and theater--their use of anonymity and ambiguity. He also analyzes how ruling elites attempt to convey an impression of hegemony through such devices as parades, state ceremony, and rituals of subordination and apology. Finally, he identifies--with quotations that range from the recollections of American slaves to those of Russian citizens during the beginnings of Gorbachev's glasnost campaign--the political electricity generated among oppressed groups when, for the first time, the hidden transcript is spoken directly and publicly in the face of power. His landmark work will revise our understanding of subordination, resistance, hegemony, folk culture, and the ideas behind revolt.

The Wealth of Networks Yochai Benkler, 2006-01-01 Describes how patterns of information, knowledge, and cultural production are changing. The author shows that the way information and knowledge are made available can either limit or enlarge the ways people create and express themselves. He describes the range of legal and policy choices that confront.

Divided into four thematic sections, this special collection of essays surveys and analyzes the most important aspects of China's naval modernization.

24/7 Jonathan Crary, 2025-04-29 "A fascinating short book" on the perils of 21st-century capitalism and its near-complete takeover of our everyday lives (New York Times Magazine) 24/7: Late Capitalism and the Ends of Sleep explores some of the ruinous consequences of the expanding non-stop processes of twenty-first-century capitalism. The marketplace now operates through every hour of the clock, pushing us into constant activity and eroding forms of community and political expression, damaging the fabric of everyday life. Jonathan Crary examines how this interminable non-time blurs any separation between an intensified, ubiquitous consumerism and emerging strategies of control and surveillance. He describes the ongoing

management of individual attentiveness and the impairment of perception within the compulsory routines of contemporary technological culture. At the same time, he shows that human sleep, as a restorative withdrawal that is intrinsically incompatible with 24/7 capitalism, points to other more formidable and collective refusals of world-destroying patterns of growth and accumulation.

The Topkapi Scroll Gülru Necipoğlu, 1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “dead” drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll’s patterns could be used to design a three-dimensional vault.

A-10s Over Kosovo Phil M. Haun, Christopher E. Haave, Air University Press, 2011 First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, marked a real turning point . . . and proved that a war can be won by airpower alone. Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower—the members of the 40th Expeditionary Operations Group. Their descriptions—a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot—provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

Orientalism Edward W. Said, 2014-10-01 A groundbreaking critique of the West's historical, cultural, and political perceptions of the East that is—three decades after its first publication—one of the most important books written about our divided world. Intellectual history on a high order ... and very exciting. —The New York Times In this wide-ranging, intellectually vigorous study, Said traces the origins of orientalism to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined the orient simply as other than the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself,

prevents true understanding.

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

With his personal life in upheaval due to marital trouble, and his professional life uncertain with the assignment of a new partner, Gavin needs all the help he can get understanding the case. Enter Ben Haverson, a psychologist and a well known Dom. With Ben's help as a consultant and attention to Gavin's own murky truths, Gavin delves deeper than he ever thought he would into the world of restraints and paddles. Forced to scrutinize his true nature and his innermost desires, Gavin has a choice: keep the fear of submitting at bay, or dive in and solve the case with the knowledge he gains. When another victim is discovered, Gavin's choice is made for him, and he's pulled headlong into the deepest, most emotional journey of his life. Unfortunately for him and Ben, a killer has noticed, has taken stock, and has set his sights on the D/s pair. Can Gavin outwit him, or will his first exchange of power be his last?

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather

than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

By the Numbers Chris Owen, Tory Temple, 2011-09-01 When he realizes his apartment building's on fire, Nathaniel can only think of one thing: his pregnant dog, trapped inside. When firefighter Trey Donovan delivers Nathaniel's unharmed dog to him, Nathaniel is exceedingly grateful. After all, it isn't every day that he meets muscular, attractive rescue workers. Nathaniel manages to find out where Trey's station is with the idea of saying thank you and offering him a puppy, but discovers that he and Trey have something else between them that needs exploring.

Deviations Chris Owen, Jodi Payne, 2007-04 Tobias and Noah explore their relationships more deeply than they ever have, not just with their own dominance and submission, but with their friends. As Noah helps Tobias through the loss of someone dear, he finds Tobias helping him, too, leading him through some intense sexual games, breaking down the last of Noah's fears, and helping him face his biggest one. The cage. Meanwhile, Tobias's ex-lover, Phantom, becomes close friends with Noah as they discover and try to resist the simmering sexual tension between them. Their teasing turns to real support when Phantom reaches the breaking point thanks to the lack of a master in his life, something he desperately needs. While Bradford works to become that master, Tobias and Noah go to Paris, where they see the sights, go to sex clubs, and re-negotiate their contract. Returning from Paris to their own lives brings then all sorts of new difficulties, from deciding whether they should love together to trying to figure out just where Phantom belongs in their ever-changing relationship. *Deviations: Discipline* is the third book in the popular *Deviations* series, which begins with *Deviations: Submission*, and *Deviations: Dominance*. Chris Owen and Jodi Payne have another winner on their hands, a gripping, emotional tale that you won't want to miss!

Britain, France and the Decolonization of Africa Andrew W.M. Smith, Chris Jeppesen, 2017-03-01 Looking at

decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power. Praise for Britain, France and the Decolonization of Africa '...this ambitious volume represents a significant step forward for the field. As is often the case with rich and stimulating work, the volume gestures towards more themes than I have space to properly address in this review. These include shifting terrains of temporality, spatial Scales, and state sovereignty, which together raise important questions about the relationship between decolonization and globalization. By bringing all of these crucial issues into the same frame, Britain, France and the Decolonization of Africa is sure to inspire new thought-provoking research.' - H-France vol. 17, issue 205

Snakes Stephen J. Mullin, Richard A. Seigel, 2011-08-15 Destruction of habitat due to urban sprawl, pollution, and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all animals, despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent, therefore, to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each chapter provides an essential framework and indicates specific directions for future research, making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations.
