Across the world, companies are forming some of the most complex and exciting collaborations in the business world: cross-border alliances (CBAs). Yet while this offers multinational companies a way into the global marketplace, there is no guarantee of success. This book looks at the business and human resource issues arising in these complex collaborations, putting forward the case that the handling of these issues can determine the CBA's success. The book takes readers through the two main kinds of CBA - International Joint Ventures (IJV), and International Mergers and Acquisitions (IMA) - explaining how each type works and which human resource issues will arise. As well as analyzing these issues and explaining the relevant management, economics and sociological theories, this impressive text uses short end-of-chapter case studies and in depth end-of-text case studies to provide numerous practical examples. The first major textbook that seriously studies human resource issues in a CBA context, this book offers both students of human resource / international business and practicing human resource professionals alike the frameworks for truly understanding the complexities of the area.

The study guide is designed to accompany *Management, 9e* reinforcing key concepts and theories. For each chapter of the text it provides additional exercises, activities, and outlines, helping learners identify and capture the key ideas. Study guides are perfect to prepare for a lecture, reinforce chapter material, or review for an upcoming exam.

Maximizing the Triple Bottom Line through Spiritual Leadership draws on the emerging fields of workplace spirituality and spiritual leadership to teach leaders and their constituencies how to develop business models that address issues of ethical leadership, employee well-being, sustainability, and social responsibility without sacrificing profitability, growth, and other metrics of performance excellence. While this text identifies and discusses the characteristics necessary to be a leader, its major focus is on leadership—engaging stakeholders and enabling groups of people to work together in the most meaningful ways. The authors offer real-world examples of for-profit and non-profit organizations that have spiritual leaders and which have implemented organizational spiritual leadership. These cases are based on over ten years of research, supported by the International Institute of Spiritual Leadership, that demonstrates the value of the Spiritual Leadership Balanced Scorecard Business Model presented in the book.

"Pracademic" in its orientation, the book presents a general process and tools for implementing the model.
