With the completion of my last publication, the AP Calculus prep book, all of my math books, including SAT Math, SAT II Math Level I and II, and AP Calculus AB/BC are now complete. While creating this series of math texts has brought great pleasure to my career, my only wish is that these books will help the many students who are preparing for college entrance. Since 1992, I have had the honor and the pleasure of working with numerous students

and realized the need for prep books that can simply explain the fundamentals of mathematics. These books are built on many years of research and experience in each field. Most importantly, the questions in these books focus on building a solid understanding of basic mathematical concepts. Without understanding these solid foundations, it will be difficult to score well on these exams. These books emphasize that any difficult math question can completely be solved with a solid understanding of basic concepts. As the old proverb says, "Where there is a will, there is a way." I still remember vividly one fifth-grader who was the last in his class who eventually ended up at Harvard University seven years later. I cannot stress enough how such perseverance of the endless quest to master mathematical concepts and problems will triumph. Persistent effort in finding answers to simple and complex mathematical questions is guaranteed to yield fruitful results. You may sometimes find that the explanations in these books might not be sufficient. In such a case, you can email me at drjcmath@gmail.com and I will do my best to provide a more detailed explanation. Additionally, as you work on these books, please notify me if you encounter any grammatical or typographical errors so that I can provide an update version. Per requests from students all over the world who have benefitted from my publications, I am currently working on a

video of this series. You will be able to view my classes via internet in 2013. It is my great wish that all students who work on these books can reach their ultimate goals and enter the college of their dreams.

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed" (Bill Gates, "Top 5 Books of the Year"). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of

Award-winning director Guillermo del Toro and starring Bradley Cooper, Cate Blanchett, Rooney Mara, and Toni Collette. *Nightmare Alley* begins with an extraordinary description of a carnival-show geek—alcoholic and abject and the object of the voyeuristic crowd's gleeful disgust and derision—going about his work at a county fair. Young Stan Carlisle is working as a carny, and he wonders how a man could fall so low. There's no way in hell, he vows, that anything like that will ever happen to him. And since Stan is clever and ambitious and not without a useful streak of ruthlessness, soon enough he's going places. Onstage he plays the mentalist with a cute assistant (before long his harried wife), then he graduates to full-blown spiritualist, catering to the needs of the rich and gullible in their well-upholstered homes. It looks like the world is Stan's for the taking. At least for now.

Exploring how neoliberalism has discovered the productive force of the psyche Byung-Chul Han, a star of German philosophy, continues his passionate critique of neoliberalism, trenchantly describing a regime of technological domination that, in contrast to Foucault's biopower, has discovered the productive force of the psyche. In the course of discussing all the facets of neoliberal psychopolitics fueling our contemporary crisis of freedom, Han elaborates an analytical framework that provides an original theory of Big Data and a lucid phenomenology of emotion. But this provocative essay proposes counter models too, presenting a wealth of ideas and surprising alternatives at every turn.
