Edward Gibbon's *Decline and Fall of the Roman Empire* compresses thirteen turbulent centuries into an epic narrative shot through with insight, irony and incisive character analysis. Sceptical about Christianity, sympathetic to the barbarian invaders and the Byzantine Empire, constantly aware of how political leaders often achieve the exact opposite of what they intend, Gibbon was both alert to the broad pattern of events and significant revealing details. Two opposing views of the future in the Middle Ages dominate recent historical scholarship. According to one opinion, medieval societies were expecting the near end of the world and therefore had no concept of the future. According to the other opinion, the expectation of the near end created a drive to change the world for the better and thus for innovation. Close inspection of the history of prognostication reveals the continuous attempts and multifold methods to recognize and interpret God's will, the prodigies of nature, and the patterns of time. That proves, on the one hand, the constant human uncertainty facing the contingencies of the future. On the other hand, it demonstrates the firm belief during the Middle Ages in a future which could be shaped and even manipulated. The handbook provides the first overview of current historical research on medieval prognostication. It considers the entangled influences and transmissions between Christian, Jewish, Islamic, and non-monotheistic societies during the period from a wide range of perspectives. An international team of 63 renowned authors from about a dozen different academic disciplines contributed to this comprehensive overview.

Marketing and consumer research has traditionally conceptualized consumers as individuals- who exercise choice in the marketplace as individuals not as a class or a group. However an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social, and that who we are is an inherently social phenomenon. It is the tribus, the many little groups we belong to, that are fundamental to our experience of life. *Tribal Marketing* shows that it is not

individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships. The social 'links' (social relationships) are more important than the things (brands etc.) The aim of this book is therefore to offer a systematic overview of the area that has been defined as "cultures of consumption"- consumption microcultures, brand cultures, brand tribes, and brand communities. It is though these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour. It will be essential to everyone who needs to understand the new paradigm in consumer research, brand management and communications management.

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs,

and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

The Constitution of Shambhala The subject of Shambhala (the planetary Head centre, or theistically, the kingdom of 'God') has been previously veiled in such texts as the K?lachakra Tantra, but the true esoteric lore has only been provided gradually, first tentatively through the works of Blavatsky, and then in greater detail via Alice Bailey's writings. This volume continues along this vein, presenting far more detail concerning this kingdom, and also of the Hierarchy of enlightened being (the planetary Heart centre) than hitherto revealed. A considerable compendium of revelation and esoteric knowledge is presented for the world's esotericists to digest and the enlightened to expand upon.

The World as Will and Representation is the central work of the German philosopher Arthur Schopenhauer. One of the most important philosophical works of the nineteenth century, the basic statement of one important stream of post-Kantian thought. It is without question Schopenhauer's greatest work. Conceived and published before the philosopher was 30 and expanded 25 years later, it is the summation of a lifetime of thought. "...This book will be of interest to general readers, undergraduates, graduates, and scholars in the field."
