Introduction:

Drawing with colored pencil is super easy if you use the right colors and have drawn a good sketch. Unlike the graphite pencils, colored pencils cannot be easily erased, so we have to draw carefully, particularly the darker areas. Always draw parts with colored pencil pressing down lightly and if it looks good, color over the same area pressing down hard. Buy a good brand of colored pencils and smooth paper. If you don't have a lot of red pencils, you can get more variations with only one pencil, by controlling how hard you press when you draw. In the image below I've drawn with one red pencil three nuances. In the first example I pressed hard, in the second I pressed normally and in the third example I pressed lightly. Even more variations of color can be created this way: This is just an example of what is inside the book.

"A comprehensive guide to quick sketching of landscapes. 5 Minute Sketching-Landscapes is about drawing what you see, mostly in settings away from the "modern world." It's especially appropriate for travelers. There are 60 exercises for new and aspiring artists which can be done in any number of locations and as often as desired. All will help to hone skills, increase speed, and help to promote a daily drawing routine. Sketchers will learn how look at a scene and deconstruct its elements quickly - for example, see natural features as colored geometric shapes; locate the source of light; divide the scene into planes (e.g., close, mid, far) for accurate perspective and color values; and note landmarks that support their observations. Readers will build an instinctive focus that pays off in speed and results. Experienced artists will refresh their skills, eliminate bad habits, and discover new ways of seeing. Landscapes, of course, feature color, and this is covered in some detail and with expert guidance throughout the book. There is advice on the types of media and their uses, including washes, pencils, charcoals, and pastels."
