

Drilling Practices Manual By Preston L Moore

Issues for Feb. 1965-Aug. 1967 include Bulletin of the Institute of Management Sciences. What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope, and depth become fully evident in the Encyclopedia. Due to the interdisciplinary nature of the field, the Encyclopedia is divided not only by chronological and geographic boundaries, but also by related subfields such as agricultural history, demographic history, business history, and the histories of technology, migration, and transportation. The articles, all written and signed by international contributors, include scholars from Europe, Latin America, Africa, and Asia. Covering economic history in all areas of the world and segments of economies from prehistoric times to the present, The Oxford Encyclopedia of Economic History is the ideal resource for students, economists, and general readers, offering a unique glimpse into this integral part of world history.

This handbook reflects the petroleum engineering profession as a mature engineering discipline apart from other engineering fields.

Provides clear examples of projects and studies that have been made regarding current conservation and preservation efforts.

Proceedings of COMADEM 90: the Second International Congress of Condition Monitoring and Diagnostic Engineering Management

Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also contains at least 5000 titles published before 1876. Has many applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes.
