Just getting started with product research and sourcing? Stuck trying to find ideas or find that "perfect" winning product? Want to find good selling products that others are ignoring? Interested in wholesale or private label products? If you answered yes, then this book is for you. If you are an experienced seller or are looking to do arbitrage this book will have less value as I don't discuss sourcing by arbitrage. I don't do arbitrage, so I don't teach it. This book is written for the new or struggling seller wanting to source wholesale or private label products. What you will learn: Basic steps for finding top selling products How to generate product ideas and look for trends How to validate demand Tips for finding suppliers Analyzing data to help you pick a product It took me 5 months of research before I pulled the trigger on my first products to sell on Amazon. Five months and countless hours. I have pages of notes with product ideas in many different categories. Some were wholesale products, others were ideas for my own products. I had some money set aside to buy inventory. But I couldn't commit. I was looking for...not necessarily the perfect product, but, well yeah, the perfect product. Fear of choosing "wrong" was holding me back. I knew that product selection was key to success so I needed to choose right. Another part of the problem was I had bigger ideas-I wanted to create a brand and I had some ideas as to what sorts of products I would carry. But those ideas required more capital than I was willing to invest for my first product. As a result, I put so much pressure on myself to dream big and think towards the future that I did...nothing! Another hold up was I was a little skittish to follow the advice to source from Chinese suppliers. It seemed so complicated for a beginner. Could I not take a little less profit and source domestically? Were there not manufacturers that could produce my ideas in North America? Yes, and yes. Ultimately the delays helped me because I learned a lot by joining Facebook groups and listening to and learning from the experiences of others. I devoured the advice in forums as well as blogs, books, webinars, and courses. I learned of the pitfalls of private label that the gurus selling you the dream never talk about. And finally, I did pull the trigger. I put together this guide to help any of you who are feeling a little gun-shy too. I put this book together for all of you who have the brains to say "Hey, if everyone buys top 100 selling products won't that saturate the market?" I put this book together to help you find great products from many different approaches. After reading this, you should feel confident enough to

find a product and get started with your e-commerce business.

Perhaps the most essential advantage to dropshipping is that it's possible to launch an e-commerce store without the need to invest thousands of dollars in inventory to start with. Customarily, merchants have had to tie up vast amounts of capital when acquiring stock. But, this is unnecessary if you use dropshipping. With a dropshipping model, there is no need to purchase a product without you already having made the sale, and having been paid by your customer. Devoid of substantial up-front inventory investments, it is very possible to begin a thriving dropshipping business without minimal financial backup. It's Easy to Start Running e-commerce businesses is easier when you don't have to deal with handling physical products. When you dropship, you have no worries about \*Paying for, or managing a warehouse \*Packing and shipping your customers' orders \*Tracking the inventory for accounting purposes \*Handling inbound shipments or any returns, physically \*Repeatedly ordering products and maintaining stock levels \*Needing a storage place to hold physical products Low Overheads Because there is no reason to deal with purchasing any inventory or the management of a warehouse, your overheads and businesses expenses can be quite small. Many successful dropshipping companies are run from home offices with a single computer for less than \$100 per month. As your business grows, it's likely these expenses will increase, but nonetheless, they will still be low when compared to traditional brick-and-mortar companies. Dropshipping businesses can be run from almost anywhere as long as you have an internet connection. This is vital to allow communication with your suppliers and your customers, both quickly and efficiently. Many successful online stores are run by people when they live outside of their home country, too. Because there is no need to pre-purchase any items you sell, you can offer a broader array of products to potential customers. So, if your supplier stocks a certain product, you can list it for sale in your online store, or on the platform you use, at no additional cost. With conventional business types, if you have orders for three times as much business, it is likely you'll need to perform three times as much work. With the leveraging of dropshipping suppliers, the majority of the work in processing additional orders is borne by your suppliers. This allows you to expand your business with fewer growing pains. Sales growth always brings some extra work. In most cases, this is primarily related to customer service. Companies that exploit dropshipping as a necessity, scale exceptionally well, especially when compared to conventional e-commerce businesses. All of these benefits make dropshipping an advantageous and efficient model to both new and established merchants, alike. Regrettably, dropshipping isn't always a bed of roses, though. All this convenience and flexibility comes with a few disadvantages. Let's shed some light on these.
