Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate's ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai's real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured.

Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations,

In any kind of organization, learning has become a vital part of the growth and development process, but it only produces effective results if it is pursued strategically and embedded deeply into the culture of the workplace. In recent years, there has been a growing consensus that, for many organizations, learning is their only sustainable competitive advantage – ensuring a committed and engaged workforce that is positioned to identify and exploit business opportunities in an increasingly volatile and uncertain world. This makes it essential for leaders and senior managers to investigate the full range of learning processes and to understand exactly how individual, group, machine and organization-wide learning can produce long-lasting results for individuals as well as for the company itself. Backed by new academic theory, yet designed to be completely accessible to a business readership, *The Learning-Driven Business* highlights the importance of Organizational Learning (OL) for organizations which wish to remain competitive and profitable, before clarifying the various pathways and frameworks that can lead to success. With the onset of automation and artificial intelligence, as well as the proliferation of redundancies and the economic instability of modern times, organizations and their employees must prioritise effective OL in order to overcome these challenges and remain competitive and relevant in the 21st century. This book is a guide for all business leaders and academics looking to adapt to the changing world through OL, using Garand & Golds' unique and original academic model.

Dubai thrives at broadband speed - blink and you'll miss the opening of the most fantastical mall, the most orgiastic hotel or the weirdest theme restaurant. But sunshine, nightlife and a touch of the exotic East are guaranteed year-round. *Best of Dubai* selects the best of the true and the new for the discerning traveller.

Situating safari tourism within the discourses and practices of development, *Selling the Serengeti* examines the relationship between the Maasai people of northern Tanzania and the extraordinary influence of foreign-owned ecotourism and big-game-hunting companies. It looks at two major discourses and policies surrounding biodiversity conservation, the championing of community-based conservation and the neoliberal focus on private investment in tourism, and their profound effect on Maasai culture and livelihoods. This ethnographic study explores how these changing social and economic relationships and forces remake the terms through which state institutions and local people engage with foreign investors, communities, and their own territories. The book highlights how these new tourism arrangements change the shape and meaning of the nation-state and the village and in the process remake cultural belonging and citizenship. Benjamin Gardner's experiences in Tanzania began during a study abroad trip in 1991. His stay led to a relationship with the nation and the Maasai people in Loliondo lasting almost twenty years; it also marked the beginning of his analysis and ethnographic research into social movements, market-led conservation, and neoliberal development around the Serengeti.

The true story of an adventurer-turned-warrior fighting poachers and traffickers to protect animals from extinction. Staging heart-pounding, espionage-style raids, Ofir Drori and his organization, The Last Great Ape (LAGA), have put countless poachers and traffickers of endangered species behind bars, and they have fought back against a Kafkaesque culture of corruption. Before Ofir arrived in Cameroon, no one had ever even tried. The Last Great Ape follows a young Ofir on fantastical adventures as he crosses remote African lands by camel, on a horse, and in dug-out canoes, while living with exotic tribes and struggling against nature at its rawest: charging elephants and hyenas, flash floods, and the need to eat river algae and snails to stay alive. The story moves from places of extreme beauty to those of the darkest horror: the war zones of Sierra Leone and Liberia. Ofir begins to work as a photojournalist in order to expose his shocking encounter with war victims and child soldiers. His experiences forge in him a resolution to become an activist and to fight for justice. The search for a cause eventually leads him to Cameroon. When Ofir discovers that no one is fighting to disprove Jane Goodall's dark prophesy that apes in the wild will be extinct in twenty years, he decides that he is the man to step in; because he knows he can make a difference, he sees it as his responsibility. And LAGA is born. The Last Great Ape is a story of the fight against extinction and the tragedy of endangered worlds, not just of animals but of people struggling to hold onto their culture. This book reveals the intense beauty and strife that exist side by side in Africa, and Ofir makes the case that activism and dedication to a cause are still relevant in a cynical modern world. This dangerous and dramatic story is one of courage and hope and, most importantly, a search for meaning.
