Explore different perspectives and approaches to create more effective visualizations #MakeoverMonday offers inspiration and a giant dose of perspective for those who communicate data. Originally a small project in the data visualization community, #MakeoverMonday features a weekly chart or graph and a dataset that community members reimagine in order to make it more effective. The results have been astounding; hundreds of people have contributed thousands of makeovers, perfectly illustrating the highly variable nature of data visualization. Different takes on the same data showed a wide variation of theme, focus, content, and design, with side-by-side comparisons throwing more- and less-effective techniques into sharp relief. This book is an extension of that project, featuring a variety of makeovers that showcase various approaches to data communication and a focus on the analytical, design and storytelling skills that have been developed through #MakeoverMonday. Paging through the makeovers ignites immediate inspiration for your own work, provides insight into different perspectives, and highlights the techniques that truly make an impact. Explore the many approaches to visual data communication Think beyond the data and consider audience, stakeholders, and message Design your graphs to be intuitive and more communicative Assess the impact of layout, color, font, chart type, and other design choices Creating visual representation of complex datasets is tricky. There's the mandate to include all relevant data in a clean, readable format that best illustrates what the data is saying—but there is also the designer's impetus to showcase a command of the complexity and create multidimensional visualizations that "look cool." #MakeoverMonday shows you the many ways to walk the line between simple reporting and design artistry to create exactly the visualization the situation requires.

This book contains two high-quality practice tests of 80 questions each - with answers and explanations - to help you pass or improve your score on the free online Neo4j Certified Professional exam. * All questions are closely emulated from those currently found in the actual exam, so you'll not waste time on anything else. * Unlike the real exam, you'll know right away what questions you missed, and what the correct answers are. * Detailed explanations with external references for any possible choice, in each practice test question. * Quiz types distributed close to 50% multi-choice + 25% multi-select + 25% True/False. * Domains distributed close to the real exam: 40% Cypher + 30% Intro + 20% Modeling + 10% Developer. * Questions will test you on Neo4j version 3.x, but explanations will have updates on deprecated features and change history. Why not just trying again and again the free online exam, until I pass? * Because starting May 2020, you can try only once a day the real online exam. * Because the high number of multi-answer questions and the gotcha tricks may give you no idea what went wrong. * Because it is time consuming and you can easily get stuck at the same low scoring mark. * Because nothing tells you where and what you failed, and next time you will likely make the same wrong choices. * Because you can hardly improve without knowing what went wrong. * Because you may want to get a

better passing score anyway, as long as it appears on your issued certificate. Same e-book as LIVE practice tests on Udemy: "Neo4j Certified Professional - Practice Exams".

The number of questions for each Domain Topic is chosen to match the current Tableau Desktop Specialist Exam Guide. IF YOU KISS A FROG, HE JUST MIGHT TURN INTO A PRINCE. IF YOU KISS A TOAD, HE'LL JUST PEE ON YOUR HAND. This is the book emotionally abusive partners do NOT want you to read. It sounds so simple -- get out of a harsh relationship, remove the shrapnel, and move on. But some guys don't make that possible. Sometimes you get out of the relationship, like with a narcissist, but you can't recover because he doesn't give you a chance. He won't leave you alone long enough. Alexandra Nouri knows that personality-disordered people, psychopaths, sociopaths, and their ilk, in fact make leaving as difficult as possible. Getting out of a relationship with a narcissist is excruciating, but staying out of one takes the resolve of an Army. A narcissist is constantly pushing and pulling, devaluing you and everything about you, sucking you back in and making you believe the two of you have a chance, and basically pushing some very tender buttons, all in a big fat confusing and chaotic mess. When a relationship is ending, feeling hurt and angry is normal, but if you feel like you're losing your mind, like your very survival is being threatened, then this book is written with you in mind. Those feelings mean he's messing with your head. And that's not cool. "Life," Aunt Alex says, "is uncertain, and mysterious. However, when it comes to life, you can count on three things. The sun will always rise in the East. If you hold up a cast iron frying pan and then let it go, it will not hover in the air and make a tweety sound. And if you go back to a guy with a personality disorder, he WILL hurt you again." Their breakups are all the same. Idealize, devalue, annihilate, string along, devalue, string along, annihilate, string along. The toad modus operandi gets very old and very boring, very fast. When he manipulates, deceives, and encroaches on your boundaries, that's not a power struggle. Or an argument. That's abuse. Aunt Alex's Army is the answer. The Army will brief you, train you, and give you your marching orders to a toad-free life. This is Aunt Alex's Army Manual, and here she musters the troops to lift up and empower the reader. You'll learn: * Who Toads Are * Who Kisses Them * Why Moving Forward Takes An Army * The Three Toad Truths * The Five Toad Motivators for Getting Into Relationships * What Toadspeak is, and Why It Drives People Crazy * What To Do About It * Your Psyche's Information Highway, and How to Pave New Roads to Health * The Five Army Maneuvers In Reality * Why It's Mandatory to Be All You Can Be There's nothing wrong with believing in epic love. There's just something wrong with expecting to get it from a narcissist. "You lost him because you're not good enough" is the #1 most toxic, worthless lie an ex sometimes hears from the toad, from other people, and even the gremlins inside her head. These are lies a toad wants you to believe -- that the reason you two aren't together right now in utter bliss is because you're not good enough. Not attractive enough, not interesting enough, not smart, happy, compatible, sexy, open, fun enough, doesn't matter: He wants you to believe the reason you two aren't working out is because of a serious shortcoming in YOU. Usually this is very vague, with hints and shrugging dissatisfaction. And he's really hoping this vagueness takes the focus off of the real causes of all the destruction: His absence of empathy. In the book Toads, and the Women Who Kiss Them Aunt Alex's Army Manual, Alexandra Nouri gives legions of examples of their confusing, bizarre ways, and straightens them out for you. She supports you in your new quiet disregard for BS, and helps you rise above the chaos and neurosis of his weird behavior. She translates the Toadspeak. She teaches you how to remove the shrapnel of his abuse so your broken heart can heal. A portion of the proceeds goes to the Futures Without Violence Fund. Dashboards have become popular in recent years as uniquely powerful tools for communicating important information at a glance. Although dashboards are potentially powerful, this potential is rarely realized. The greatest display technology in the world won't solve this if you fail to use effective visual design. And if a dashboard fails to tell you precisely what you need to know in an instant, you'll never use it, even if it's filled with cute gauges, meters, and traffic lights.
