The protection and preservation of a product, the launch of new products or re-launch of existing products, perception of added-value to products or services, and cost reduction in the supply chain are all objectives of food packaging. Taking into consideration the requirements specific to different products, how can one package successfully meet all of these goals? Food Packaging Technology provides a contemporary overview of food processing and packaging technologies. Covering the wide range of issues you face when developing innovative food packaging, the book includes: Food packaging strategy, design, and development Food biodeterioration and methods of preservation Packaged product quality and shelf life Logistical packaging for food marketing systems Packaging materials and processes The battle rages over which type of container should be used for which application. It is therefore necessary to consider which materials, or combination of materials and processes will best serve the market and enhance brand value. Food Packaging Technology gives you the tools to determine which form of packaging will meet your business goals without compromising the safety of your product.

Forget the Fad Diets, Join the Food Freedom Movement! Counting calories is out. All the food groups are in. Becoming trim and healthy doesn't have to be difficult or painstaking anymore. After trying almost every fad diet out there, Serene Allison and Pearl Barrett, creators of the Trim Healthy Mama movement, took matters into their own hands. Through trial and error and much research, they created the Trim Healthy Mama Plan, the breakthrough lifestyle program to help readers of all ages and stages get healthy, slim down and keep off the weight once and for all. Based on the authors' successful self-published book, this simplified, improved, practical plan shows readers a unique way to lose weight and get healthy by eliminating sugar, and still eating hearty, delicious food. The biblically-sound and highly effective eating approach centers on Satisfying meals (which include more fats and protein) and Energizing meals (which include more carbs and protein), as they are the key to success. Scrumptious whole, unprocessed foods, including fats, blood sugar friendly grains, proteins, fruits, and vegetables, are eaten in a way that boosts metabolism, yet still fits into anyone's hectic lifestyle. It's family friendly and effective for pregnant and nursing mothers, pre or post- menopausal women, and also those without weight or health issues—even men and growing children. The book includes menu plans, a list of key super foods to eat on plan, time-saving tips, and pantry stocking and lifestyle advice to help readers successfully reach their goals. Join the Trim Healthy Mama movement and along with thousands of others, and discover the groundbreaking, easy-does-it, and delicious way to eat for health and weight loss.

"This book represents the most complete guidance on the design, installation, and operation and management of DOAS in nonresidential applications. With this book, any HVAC designer will be able to optimally incorporate a DOAS into their design. Architectural designers, building developers and owners, maintenance professionals, students, teachers, and researchers may also find the contents useful"--

This book is an exact replica of the original Grays Sports Almanac as seen in the 1989 film 'Back to the Future Part II' and contains 155 pages of sports statistics spanning 50 years. The cover has been painstakingly created in high-quality crisp graphics using a genuine prop which was used for filming as a reference to make this an exact replica. With 155 pages containing 50 years of sports statistics from 1950 to the year 2000, including American Football, Basketball, Horse Racing, Ice Hockey, Major League Baseball and others. This is the perfect book for anyone who appreciates the Back to the Future franchise, movie props, 80's movies or just sport in general.

Invention of the solid-state laser has initiated the beginning of the laser era. Performance of solid-state lasers improved amazingly during five decades. Nowadays, solid-state lasers remain one of the most rapidly developing branches of laser science and become an increasingly important tool for modern technology. This book represents a selection of chapters exhibiting various investigation directions in the field of solid-state lasers and the cutting edge of related applications. The materials are contributed by leading researchers and each chapter represents a comprehensive study reflecting advances in modern laser physics. Considered topics are intended to meet the needs of both specialists in laser system design and those who use laser techniques in fundamental science and applied research. This book is the result of efforts of experts from different countries. I would like to acknowledge the authors for their contribution to the book. I also wish to acknowledge Vedran Kordic for indispensable technical assistance in the book preparation and publishing.

?Frederik Drescher addresses the timing of non-mandatory insolvency filings based on threatening illiquidity (§ 18 InsO) with the aim of a company's restructuring as an agency problem between owners and management. The hypothesis of a tendency towards delayed insolvency filings, which was developed using a decision model, is experimentally confirmed. Moreover, the author analyzes different incentive instruments potentially leading to earlier insolvency filings.
