From driving, flying, and swimming, to digging for unknown objects in space exploration, autonomous robots take on varied shapes and sizes. In part, autonomous robots are designed to perform tasks that are too dirty, dull, or dangerous for humans. With nontrivial autonomy and volition, they may soon claim their own place in human society. These robots will be our allies as we strive for understanding our natural and man-made environments and build positive synergies around us. Although we may never perfect replication of biological capabilities in robots, we must harness the inevitable emergence of robots that synchronizes with our own capacities to live, learn, and grow. This book is a snapshot of motivations and methodologies for our collective attempts to

transform our lives and enable us to cohabit with robots that work with and for us. It reviews and guides the reader to seminal and continual developments that are the foundations for successful paradigms. It attempts to demystify the abilities and limitations of robots. It is a progress report on the continuing work that will fuel future endeavors. Over 1,000 total pages INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our

predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.

A middle-aged widow, commuter of Amsterdam goes to Pakistan and weds a gentleman. Soon as the groom arrives into The Netherlands for a family reunion, he shockingly discovers in her a 'spoilt' woman. The man tries to save his bond of marriage but the wronged woman neither wants to be tamed due to aspects of love, nor does she co-operate. Instead, she rather wants her man to close his eyes and to shut up his mouth if ever he wishes to become a legitimate resident in her country. The egoist man doesn't compromise on self-respect of a saintly husband and thus is thrown out into streets quite empty-handed and undocumented. Then he gets afraid

of going back to his homeland predicting a social ridiculous. Years passed in such a dreary and stoned life-style that one day the city police arrests him against his unlawful status and surrenders him to the foreign police who when fails to deport, sets him free like a squeezed lemon after he having served a year's custodial sentence. The author describes how a few Asian immigrants and their spoiled descendants who once get settled into the Western states . forget about their past of struggling. . trap and bait to their own continent/ country-fellows by showing on them a false fairyland. . and try to demoralize a Western society by using its culture as a shield or weapon to fulfill their own sensual curiosity which seems difficult to meet in their own sender lands. The author also regrets to inflexibility of the constitution and rejects to the old theory 'nobody is above law'. He urges on the law-makers must to defend on humanitarian grounds to those noble outlanders who become illegal by some accident, or by a misfortune befell on them and not by fraud or cheating like do often the professional invaders or regular tress-passers breaking into some country's barriers. The whole story convincingly draws a picture of human courage and endurance against all odds mixed in shadow of oppression and optimism by giving an entire message 'never quit'. A compulsively true heart saga with a positive energy_ readable, thought-provoking and enjoyable.
