It's time to see granny hexagons in a whole new light with this inspired collection of modern crochet patterns for clothes, accessories and homewares. Quilters have always known the power of the hexagon but now crocheters can get in on the action too with a collection of step-by-step instructions for crochet hexagon motifs and crochet patterns. It's time for the granny square to move over and make way for the hexagon, the hottest new crochet motif! In this unique collection, popular crochet designer and author, Sarah Shrimpton reveals patterns for 10 unique crochet hexagon designs so you can pick your favourite. As well as the written pattern there are also crochet charts for each of the hexagons for extra clarity. Once you've practised your hexie skills you can choose from a collection of 20 step-by-step projects that you will be itching to stitch thanks to their simplicity and creativity. Hexagons are quick and easy to make and can be combined in a myriad of ways to create a huge range of projects – from garments and accessories to home décor and even toys. Sarah reveals how the humble hexagon can be used as the basis for a wide range of projects including a cute, retro mini skirt, a boho bag, cosy slipper socks and a boho daisy design wall hanging. These little motifs are so flexible that they lend

themselves to everything from a dainty shrug and a lacy summer top to a heavy wool rug and a cosy poncho depending on the size of yarn and crochet hook that you use, the possibilities are endless! Crocheting motifs is the ultimate portable crochet project - they are small enough to carry with you when you're on the move - and because each project is made using just hexies and some simple joining techniques, this collection is suitable even for complete beginners. Before you know it you will have stitched enough hexies to create the perfect gift to impress friends and family. This refreshing twist on the classic granny square will get you excited about the possibility of the humble six-sided polygon and how it can be used to create gorgeous projects... one little hexie at a time.

Bollywood Sounds focuses on the songs of Indian films in their historical, social, commercial, and cinematic contexts. Author Jayson Beaster-Jones takes readers through the highly collaborative compositional process, highlighting the contributions of film directors, music directors (composers), lyricists, musicians, and singers in song production. Through close musical and multimedia analysis of more than twenty landmark compositions, Bollywood Sounds illustrates how the producers of Indian film songs have long mediated a variety of musical styles, instruments, and performance practices to create a uniquely cosmopolitan music genre. As an exploration of the music of seventy years of Hindi films, Bollywood

Sounds provides long-term historical insights into film songs and their musical and cinematic conventions in ways that will appeal both to scholars and to newcomers to Indian cinema.

With the growth of practitioner research, this book leads the way by addressing key issues faced by 'insider researchers' – those doing research projects in the organizations and communities in which they themselves work, or where they are already familiar with the setting. The authors explore the implications of these research contexts, and discuss approaches and methodologies that researchers in these contexts might adopt, with a particular focus on ethics - one of the key concerns for students undertaking a research project of this type.

Stylish projects using this fast, easy technique! Corner to corner crochet—also known as C2C crochet—is the perfect way to create colorful, graphic designs without having to learn complex colorwork techniques. Using basic crochet stitches, you can create stunning, contemporary designs for home decor items and accessories. C2C projects also stitch up super-fast, so if you've been putting off tackling a crochet blanket because it would take too long, this is the technique for you! Author Jess Coppom has brought a fresh take to this style of crochet with a collection of fifteen modern projects, all made using the C2C technique.

Choose from patterns for six different afghans or blankets, including a monochrome chunky throw and a beautiful Mexican-style blanket. Other projects include pillows, a bathroom rug, and some stunning items to wear, such as a poncho, shawl, and cowl.

"Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."--

This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European

system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

The benefits of sewing are well known - nothing feeds the soul like the act of creativity and sewing garments and projects gives you a huge sense of satisfaction. Not to mention the enjoyment of wearing the finished garment! Sewing is good for the soul and this collection of relaxed garments, accessories and loungewear sewing patterns is designed to soothe the soul and lift the spirits. But this book isn't just about the clothes, it's about the power of sewing to help you relax and unwind: there are smaller projects for hand sewing, the ultimate mindful craft, and quick dressmaking patterns for times when you want a sewing 'fix' but are a bit pushed for time. As well as the sewing projects there is also a smattering of delicious recipes to feed more than just the soul! Sewing and baking have always been natural bed fellows and this collection features garments, cakes and drinks to celebrate every season whether it's 'Mullered Wine' in the winter or a delicious Lemon Drizzle Cake for the summer. There are full-size, graded patterns (up to a UK size 26/US size 22) for 10 easy-to-wear garments including pyjama pants, a linen T shirt, a summer dress and palazzo pants. This means that you can find your perfect size and get sewing straight away without having to print out the patterns. The designs are for relaxed-fit clothes and 'loungewear', which are suitable for

both work and home and all the garment instructions have written step-by-steps and diagrams making them suitable for all abilities. Unlike other sewing collections Sewing for the Soul takes you on a journey throughout the year with sewing patterns, projects, recipes and drinks to take you from season to season. Each season has a slow sewing project for when you have more time, a quick sewing project so that even the time-poor can get a therapeutic sewing 'fix' and either a hand sewing project, such as embroidering a decorative detail onto one of the garments, or a reinvention project. This means that, by the end of the year, you will have a whole new wardrobe to be proud of and will have spent many relaxing hours mindfully making.

A fascinating book full of insights into how the brain controls your actions, reactions, and emotions in ways you've never imagined. Discover why you can't tickle yourself, 40,000 year old brain surgery, why kids are "brainier" than their parents, the person who coped perfectly well with just a third of a brain, and the incredible story of Einstein's brain and how it was stolen, cubed, and hidden in jars in a basement for decades.

This collection gathers together an exciting new series of critical essays on the Romantic- and Victorian-period poet John Clare, which each take a rigorous approach to both persistent and emergent themes in his life and work. Designed to mark the

200th anniversary of the publication of Clare's first volume of poetry, *Poems Descriptive of Rural Life and Scenery*, the scholarship collected here both affirms Clare's importance as a major nineteenth-century poet and reveals how his verse continually provokes fresh areas of enquiry. Offering new archival, theoretical, and sometimes corrective insights into Clare's world and work, the essays in this volume cover a multitude of topics, including Clare's immersion in song and print culture, his formal ingenuity, his environmental and ecological imagination, his mental and physical health, and his experience of asylums. This book gives students a range of imaginative avenues into Clare's work, and offers both new readers and experienced Clare scholars a vital set of contributions to ongoing critical debates.

This work brings together the pivotal, scholarly essays responsible for the present resurgence in rhetorical studies. Assembled by one of the most respected senior scholars in the field of rhetoric, the essays chart a course from tradition-based theory of civic rhetoric to ongoing issues of figuration, power, and gender. Together with a lucid introductory essay, these studies help to integrate the still-volatile questions at the core of humanities scholarship in rhetoric. The introductory student as well as the seasoned scholar will gain familiarity and footing in this oldest--and still new--liberal art.

The book introduces modern high-order methods for computational fluid dynamics. As compared to low order finite volumes predominant in today's production codes, higher order discretizations significantly reduce dispersion errors, the main source of error in

long-time simulations of flow at higher Reynolds numbers. A major goal of this book is to teach the basics of the discontinuous Galerkin (DG) method in terms of its finite volume and finite element ingredients. It also discusses the computational efficiency of high-order methods versus state-of-the-art low order methods in the finite difference context, given that accuracy requirements in engineering are often not overly strict. The book mainly addresses researchers and doctoral students in engineering, applied mathematics, physics and high-performance computing with a strong interest in the interdisciplinary aspects of computational fluid dynamics. It is also well-suited for practicing computational engineers who would like to gain an overview of discontinuous Galerkin methods, modern algorithmic realizations, and high-performance implementations.

During a zombie apocalypse, the important thing is to not panic. Actually, that's not true. Definitely panic. These things are going to try to eat your face off! Sam and Arty are looking forward to summer vacation so much that they barely notice when their bumbling science teacher causes an explosion of purple goo that drenches their classmate, Simon. They're sure Simon will be fine—he looks a little gray, but things like this happen all the time in the town of Sitting Duck. But Simon is not fine—and totally loses his head when he becomes a zombie! Soon the town is crawling with rabid zombies looking for braaaaaains! The adults are busy panicking and screaming, so it's up to Sam (the leader) Arty (the brains), and their friend Emmie (the rebel) to take

charge. If they can't find a cure, it will be a disaster! Disaster Diaries: Zombies! is perfect for young readers, reluctant or otherwise, with a wacky sense of humor. The first in this hilarious middle grade series from author R. McGeddon will prepare you for your own zombie infestation, with handy tips like how to spot zombies. (Hint: their faces are falling off). An Imprint Book

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy

Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

For many of us, afghans are the epitome of comfort. Colorful and inviting, they are a staple of the home, without which a living room or bedroom just wouldn't feel complete. And whether you're making one for yourself, as a housewarming gift, or to welcome a new baby into the world, the process of creating a handmade afghan can be as rewarding as the finished product. *Comfort Knitting and Crochet: Afghans* features 50 patterns for these cozy blankets, made with Berroco Comfort yarn—an affordable, ultra-soft acrylic/nylon blend—and designed by the Berroco team, headed by Norah Gaughan. The book includes something for everyone: The designs range from ultra-modern to traditional, from spare to embellished, and are inspired by sources as varied as Scottish tweeds, Japanese Ikat, and Delft pottery. Intended for knitters and crocheters of every skill level, this collection brings new life to the well-loved and versatile afghan.

This third book in the GISDATA series focuses on the widespread use of geographical information systems GIS in European local government. The editors include a wide range of applications carried out by different professional groups, and offer the opportunity of studying the extent to which diffusion of innovations

like GIS are sensitive to national issues such as cultural context, institutional setup and the availability of data.; The book answers key questions such as: what can be learnt from research on organizational behaviour in relation to technological innovation?; what are the classical features of the GIS diffusion process?; to what extent is the adoption and utilization of GIS facilitated - or impeded - by the organizational culture within which it takes place?; and what mechanisms can be applied to enhance the diffusion of GIS? The book covers aspects of diffusion in the following European countries: UK, France, Italy, Poland, Denmark, The Netherlands, Germany, Greece and Portugal.

We know what you're thinking. You've heard about AppleScript. You've heard that it can do amazing things. You've heard that it can automate away the tiring, redundant, repetitive tasks you do with the computer. All true. But you're not sure about what's involved with using it. Is it difficult? Is it programming? After all, you're just a better-than average computer user. You know what you know, and your expertise serves you pretty well. But recently you've reached the point of asking yourself "Is there a better way?" The answer is "Yes." And relax, you just got lucky. This book is for you. If you've never written a single line of computer code—this book is for you. If the most technical thing you do on the computer is calculate a column in Excel—this book is for you. If you're tired of doing the same thing over and over—this book is for you. It's about being

motivated to explore, understand, and take advantage of the tools you already own. AppleScript is free—the only price for its use is your desire to finally sit down and take a few moments to absorb and activate its magic. This book starts at square one and walks you through the process of understanding and writing AppleScript—step by step, one concept at a time—until you find yourself suddenly creating powerful and useful automated solutions. And the lessons in this book are based on a decade of experience teaching hands-on classes to folks just like you. You can do this. You can become Master of your Computer Universe! Still don't believe us? Open the first chapter and start reading. You'll see.

100 years ago, Einstein's theory of relativity shattered the world of physics. Our comforting Newtonian ideas of space and time were replaced by bizarre and counterintuitive conclusions: if you move at high speed, time slows down, space squashes up and you get heavier; travel fast enough and you could weigh as much as a jumbo jet, be squashed thinner than a CD without feeling a thing - and live for ever. And that was just the Special Theory. With the General Theory came even stranger ideas of curved space-time, and changed our understanding of gravity and the cosmos. This authoritative and entertaining Very Short Introduction makes the theory of relativity accessible and understandable. Using very little mathematics, Russell Stannard explains the important concepts of relativity, from  $E=mc^2$  to black holes, and explores the theory's impact on science and on our understanding of the universe. ABOUT THE

**SERIES:** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

This is the first multi-volume collection of major writings on cultural anthropology, the sub-field of anthropology which is concerned with how people in different places live and understand the world around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art, urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro, Marshall Sahlins, Laura Nader, Maurice Godelier, David Graeber, Suad Joseph and many more, this set is an

essential resource for scholars and students of the subject.
