This book is a quick and easy way to learn basic Chinese Characters. All beginning Chinese language learners struggle to memorize and learn to write Chinese characters. The First 100 Chinese Characters adopts a structural approach which helps students to quickly master the basic characters that are fundamental to this language. Intended for beginning Chinese students, this character book presents characters that have been carefully selected for rapid and effective learning. The English meanings, pronunciations in hanyu pinyin and alternate forms (if any) for each Chinese character are presented along with a stroke order guide and spaces for writing practice. Printed with gray guidelines, the stroke order guides are designed to be traced over to teach students the standard sequence of strokes used to write the character. Related compounds and phrases are given to assist in vocabulary building. Three

indexes at the back allow the characters to be looked up by their English meanings, hanyu pinyin pronunciations, or radicals. Extra practice sheets are also provided. This Chinese character book contains: Step-by-step stroke order diagrams show you how to write each character. Special boxes with grid lines help you practice writing them correctly. Compounds and sample sentences provide easy vocabulary building. Hanyu pinyin romanizations identify and help you pronounce every word.

The second volume in the Dalai Lama's definitive and comprehensive series on the stages of the Buddhist path, The Library of Wisdom and Compassion. Volume 1, Approaching the Buddhist Path, contained introductory material that set the context for Buddhist practice. This second volume, The Foundation of Buddhist Practice, contains the important teachings that will help us establish a flourishing Dharma practice. The Foundation of Buddhist Practice begins with the four seals shared by all Buddhist philosophies, and moves on to an explanation of the reliable cognition that allows us to evaluate the veracity of the Buddha's teachings. The book provides many other essential Buddhist teachings, including: the relationship of a spiritual mentor and student, clarifying misunderstandings about this topic and showing how to properly rely on a spiritual mentor in a healthy, appropriate, and beneficial manner; how to structure a meditation session; dying and rebirth, unpacking the often difficult-to-understand topic of multiple lives and explaining how to prepare for death and aid someone who is dying; a fruitful explanation of karma and its results; and much more. His Holiness's illumination of key Buddhist ideas will support Western and contemporary Asian students in engaging with this rich tradition.

'Chinese in Steps' is a series of textbooks designed for English-speaking adults who learn Chinese either as part of their degree study at university, or simply as part of their professional or self-development programme for practical purposes. Chinese Short Stories For Beginners is an excellent resource for Chinese (Mandarin) learners in the HSK1 to HSK 3 range. The book provides the student with 20 short stories in Chinese along with English and Pinyin parallel text. This is a challenging problem-solving book in Euclidean geometry, assuming nothing of the reader other than a good deal of courage. Topics covered included cyclic quadrilaterals, power of a point, homothety, triangle centers; along the way the reader will meet such classical gems as the nine-point circle, the Simson line, the symmedian and the mixtilinear incircle, as well as the theorems of Euler, Ceva, Menelaus, and Pascal. Another part is dedicated to the use of complex numbers and barycentric coordinates, granting the reader both a traditional and computational viewpoint of the material. The final part consists of some more advanced topics, such as inversion in the plane, the cross ratio and projective transformations, and the theory of the complete quadrilateral. The exposition is friendly and relaxed, and accompanied by over 300 beautifully drawn figures. The emphasis of this book is placed squarely on the problems. Each chapter contains carefully chosen worked examples, which explain not only the solutions to the

problems but also describe in close detail how one would invent the solution to begin with. The text contains a selection of 300 practice problems of varying difficulty from contests around the world, with extensive hints and selected solutions. This book is especially suitable for students preparing for national or international mathematical olympiads or for teachers looking for a text for an honor class.

2012 and all come with Pinyin and English translation. If you are just starting out preparing for an HSK test, this book is ideal to slowly and step by step build the vocabulary you need to successfully pass whatever level it is you are aiming for. Shortly before the test, the book can again be very helpful in acting as a checklist to see which words haven't been learned yet or need to be studied again. As common with most vocabulary books, it's possible to study from Chinese to English as well as English to Chinese. Chinese to English provides you with the opportunity to make quick progress in areas like listening and reading. English to Chinese on the other hand allows you to practice your writing and also has positive effects on your speaking skills. To successfully pass any of the 6 HSK levels there are further topics for you to consider like grammar or listening which are not covered in this book. This book concentrates on helping you to build the foundation that allows you to then accelerate further learning in courses, with mock exams or whatever other form of studying works best for you. Good luck!

From one of our most important contemporary Chinese authors: a novel of language and love that tells one young Chinese woman's story of her journey to the West—and her attempts to understand the language, and the man, she adores. Zhuang—or “Z,” to tongue-tied foreigners—has come to London to study English, but finds herself adrift, trapped in a cycle of cultural gaffes and grammatical mishaps. Then she meets an Englishman who changes everything, leading her into a world of self-discovery. She

soon realizes that, in the West, “love” does not always mean the same as in China, and that you can learn all the words in the English language and still not understand your lover. And as the novel progresses with steadily improving grammar and vocabulary, Z’s evolving voice makes her quest for comprehension all the more poignant. With sparkling wit, Xiaolu Guo has created an utterly original novel about identity and the cultural divide.

the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

New Practical Chinese Reader is a new series of textbooks designed for native English speakers to learn Chinese. It consists of 70 lessons in six volumes, covering beginning to intermediate levels for three years of instruction. It has been compiled under the guidance of the new HSK Guideline and in consultation with NOTCFL Syllabus. The objective of this series is to develop the student's ability to communicate in Chinese through the study of language structure, language function, and related cultural knowledge along with the training of listening, speaking, reading and writing skills. In order to make the study of Chinese easier and more interesting, this textbook has the following features: The student will be in the cultural settings of Chinese society with several international students, Ding Libo (son of Gu Bo and Ding Yun), Lin Na and Ma Dawei. Through many interesting experiences, the student will not only learn authentic Chinese, but also understand Chinese society and culture. The instruction of functional items is emphasized. The student will learn to use Chinese from the very beginning of

the learning process. Attention is paid to the instruction of pronunciation, grammar, vocabulary and discourse and a gradual increase in difficulty, orderly advances and multiple repeats are stressed along with the usage of four large cycles to help students understand the language structure of Chinese. A new method of teaching Chinese characters is utilized to help students read and write intriguing characters. Combined instruction of the four basic skills, listening, speaking, reading and writing, is emphasized. It offers tremendous flexibility. The instructional materials are suitable for users at different starting points and with different goals. Abundant practice materials are supplied for the student to use inside and outside the classroom. Each volume comes with a Textbook,.

Samsara, Nirvana, and Buddha Nature takes up centrally important premises of Buddhism: the unsatisfactoriness (duhkha) of cyclic existence (samsara), the determination to be free of cyclic existence, and the mind as the basis for both the extreme dukkha of samsara and the bliss of nirvana. This volume shows us how to purify our minds and cultivate awakened qualities. Knowledge of buddha nature reveals and reconciles the paradox of how the mind can be the basis for both the extreme dukkha of samsara (the unpurified mind) and the bliss and fulfillment of nirvana (the purified mind). To illustrate this, Samsara, Nirvana, and Buddha Nature first takes readers through Buddhist thought on the self, the Four Noble Truths, and their sixteen attributes. Then, the Dalai Lama explains afflictions, their arising and antidotes, followed by an examination of karma and cyclic existence and, finally, a deep and thorough elucidation of buddha nature. This is the third volume in the Dalai Lama's definitive and comprehensive series on the stages of the Buddhist path, The Library of Wisdom and Compassion. Volume 1, Approaching the Buddhist Path, contained introductory material that sets the context for Buddhist practice. Volume 2, The Foundation of Buddhist Practice, describes the important teachings that help us establish a flourishing Dharma practice. Samsara, Nirvana, and Buddha Nature can be read as the logical next step in this series or enjoyed on its own.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough.

They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more,

but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

There are 12 wall charts closely related to Textbook 3, and illustrations on topics such as clothes, hobbies, school, food, etc. In each unit, questions related to the current text are provided to aid the teacher's teaching.

Emotion: Theory, Research, and Experience, Volume 1: Theories of Emotion, presents broad theoretical perspectives representing all major schools of thought in the study of the nature of emotion. The contributions contained in the book are characterized under three major headings - evolutionary context, psychophysiological context, and dynamic context. Subjects that are discussed include general psycho-evolutionary theory of emotion; the affect system; the biology of emotions and other feelings; and emotions as transitory social roles. Psychologists, sociobiologists, sociologists, psychiatrists, ethologists, and students the allied fields will find the text a good reference material.

complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.

In "A Book of Five Rings," Miyamoto Musashi takes the reader into a world filled to the brim with devotion, self-respect, discipline, honesty and purity of thought. Written originally for warriors and samurai in a completely different time and culture, Musashi's book provides a remarkable source of inspiration for self-development today. His teachings are concise and to the point. He uses phrases like "you must understand this" and "you must practice diligently" and explains only general, but unquestionable and fundamental, concepts of the Way of the
