Offering radically new Jungian theories of deconstruction, feminism, the body, sexuality, spirituality, postcolonialism, reader-response, the book also investigates the controversial occult and fascist heritage of Jung. By using the work of Derrida, Kristeva and Irigaray and examining Jungian fiction, this book transforms modern literary theory in ways which simultaneously critique Jung's work.

César Vallejo is one the greatest Spanish-language poets of the 20th century, his monument being the book-length sequence 'Trilce' (a translation of which is published simultaneously with this volume). After the publication of 'Trilce' he published numerous essays and a didactic novel, but did not collect any of his subsequent poems for book publication. Since his death, these poems have usually been referred to as the Posthumous Poems or, collectively, as the 'Poemas humanos' after the title of one of the posthumous collections. This volume brings together all of

the post-'Trilce' work that has been identified by the latest scholarship and included in the most recent Peruvian edition of the author's works. The Spanish texts have benefitted from a number of corrections, as compared to previous publications, and the poems are presented chronologically - in so far as the chronology can be ascertained. The book offers the most complete version yet of this magnificent body of work. The translations are by the award-winning Irish poet-translator, Michael Smith, and the Peruvian scholar Valentino Gianuzzi.
