This study deals with a number of aspects of the words which are usually called adverbs in Latin. It contains on the one hand a critical discussion of their treatment in Latin grammatical studies -- the characteristics attributed to them, their relationship to other words -- and on the other hand a discussion of the conditions that have to be met in order to achieve a better (sub)classification -- general problems of classification as well as criteria for affecting such classification -- and a better description of the functions of adverbs in larger constructions. The study contains, therefore, both language-specific sections and more general ones. The author wrote the passages specifically dealing with Latin in such a way that they are clear enough to the non-Latinist, the more general passages in such a way that they are understandable for Latinists who are not acquainted with recent developments in linguistics.

Despite their removal from England's National Curriculum in 1988, and claims of elitism, Latin and Greek are increasingly re-entering the 'mainstream' educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom: community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends, in universities as part of outreach, and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities, and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined, as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated, with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors, who conjecture what strategies are conducive to success.

The book is designed to be used throughout the undergraduate nursing curriculum, as well as in traditional community health nursing theory and clinical courses. The Latin course is written entirely in Latin. It consists of two parts: I: Familia Romana -- the fundamental or elementary course. II: Roma Aeterna -- the advanced course, with Indices covering both parts. The direct method is based on the inductive principle of learning. In the text every sentence is intelligible per se, or self-explanatory, because the meaning and function of all new words and grammatical forms are made clear by the context in which they occur, or if necessary, by illustrations or marginal notes using vocabulary already learned. This demands a carefully graded text, but in order to make learning efficient the content should stimulate interest and curiosity and make it easy for the reader to visualise the scenes and situations described. To meet these demands the chapters of Lingva Latina I form a continuous narrative,

a sort of Latin novel, which captivates the students so that they look forward to reading the continuation of the story. While reading this story and learning facts about the Roman life and traditions, the students pick up the vocabulary and grammar that will enable them to go on, in Part II, to read a representative selection of Latin literature, both prose and poetry. Here, too, all new words and structures, if not immediately intelligible from the context, are explained by marginal notes or illustrations. In addition, factual information is given in the margin. Part I covers the essentials of Latin grammar and introduces a basic vocabulary of some 1600 words. The 35 chapters form a sequence of scenes and incidents from the life of a Roman family in the second century A.D. Each chapter is divided into 3 or 4 lessons (lectiones) and consists of several text pages followed by a section on grammar, three exercises, and a list of new words. At the end of the volume there is a survey of inflexions, a Roman calendar, and alphabetical word-list and a grammatical index.

Presents the first full-length, systematic study of the reception of Cicero's speeches in the Roman educational system.

Beneath the sewer grates and manholes of the city lies a strange and secret world called the Downside. Every Downsider knows that it's forbidden to go Topside, and most fear a collision of the two worlds. But fourteen-year-old Talon is curious about what goes on above ground, and one day he ventures out in search of medicine for his ailing sister. There he meets Lindsay, who is as curious about Talon's world as he is about hers. When Lindsay visits the Downside for the first time, she marvels at the spirit of the Downsidiers, and the way they create works of art from topside "trash," like old subway tokens and forgotten earrings. As awed as she is by the Downside, however, she also questions its origins, and when she finds out that this fantastic world is not all it appears to be, she is determined to tell Talon the truth. Then a construction accident threatens to crush Talon's world, and his loyalty is put to the test. Can the truth save the Downside, or will it destroy an entire civilization? Neal Shusterman takes readers on an amazing journey into a place that's only a few steps away, yet beyond their wildest dreams.

A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is

reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

Completely revised and restructured in the light of a nationwide survey of Classics teachers, it provides an exciting, stimulating approach to Latin based on the reading of original texts. The world's bestselling introductory Latin course.

Cicero composed his incendiary Philippics only a few months after Rome was rocked by the brutal assassination of Julius Caesar. In the tumultuous aftermath of Caesar's death, Cicero and Mark Antony found themselves on opposing sides of an increasingly bitter and dangerous battle for control. Philippic 2 was a weapon in that war. Conceived as Cicero's response to a verbal attack from Antony in the Senate, Philippic 2 is a rhetorical firework that ranges from abusive references to Antony's supposedly sordid sex life to a sustained critique of what Cicero saw as Antony's tyrannical ambitions. Vituperatively brilliant and politically committed, it is both a carefully crafted literary artefact and an explosive example of crisis rhetoric. It ultimately led to Cicero's own gruesome death. This course book offers a portion of the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard's volume will be of particular interest to
