National Book Award Finalist: A "brilliant" study of the science and mythology of the wolf by the New York Times–bestselling author of *Arctic Dreams* (The Washington Post). When John Fowles reviewed *Of Wolves and Men*, he called it "A remarkable book, both biologically absorbing and humanly rich, and one that should be read by every concerned American." In this National Book Award–shortlisted work, literary master Barry Lopez guides us through the world of the wolf and our often-mistaken perceptions of another species' place on our shared planet. Throughout the centuries, the wolf has been a figure of fascination and mystery, and a major motif in literature and myth. Inspiring fear and respect, the creature has long exerted a powerful influence on the human imagination. *Of Wolves and Men* takes the reader into the world of the *Canis lupus* and its relationship to humankind through the ages. Lopez draws on science, history, mythology, and his own field research to present a compelling portrait of wolves both real and imagined, dispelling our fear of them while celebrating their place in our history, legends, and hearts. This ebook features an illustrated biography of Barry Lopez including rare images and never-before-seen documents from the author's personal collection.

On July 22, 2011, Anders Behring Breivik detonated a car bomb in downtown Oslo, Norway. He didn't stop there, traveling several hours from the city to ambush a youth camp while the rest of Norway was distracted by his earlier attack. That's where the facts end. But what motivated him? Did he have help staging the attacks? The evidence suggests a startling truth: that this was the work of one man, pursuing a mission he was convinced was just. If Breivik did

indeed act alone, he wouldn't be the first. Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations. Eric Robert Rudolph embarked on a campaign of terror over several years, including the Centennial Park bombing at the 1996 Olympics. Ted Kaczynski was revealed to be the Unabomber that same year. And these are only the most notable examples. As George Michael demonstrates in *Lone Wolf Terror and the Rise of Leaderless Resistance*, they are not isolated cases. Rather, they represent the new way warfare will be conducted in the twenty-first century. *Lone Wolf Terror* investigates the motivations of numerous political and ideological elements, such as right-wing individuals, ecoextremists, foreign jihadists, and even quasi-governmental entities. In all these cases, those carrying out destructive acts operate as "lone wolves" and small cells, with little or no connection to formal organizations. Ultimately, Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere.

Feared and revered, the wolf has been admired as a powerful hunter and symbol of the wild and reviled for its danger to humans and livestock. Garry Marvin reveals in *Wolf* how the ways in which wolves are imagined has had far-reaching implications for how actual wolves are treated by humans. Indigenous hunting societies originally respected the wolf as a fellow hunter, but with the domestication of animals the wolf became regarded as an enemy due to its attacks on livestock. Wolves, as a result, developed a reputation as creatures of evil. In children's literature, they were depicted as the intruder from the wild who preys on the innocent. And in popular culture, the wolf became the creature that evil humans can transform into—the dreaded werewolf. Fear of this enigmatic creature, Marvin shows, led to an attempt to eradicate it as a species. However, with the development of scientific understanding of wolves and their place in ecological systems and the growth of popular environmentalism, the wolf has been

rethought and reimagined. The wolf now has a legion of new supporters who regard it as a charismatic creature of the newly valued wild and wilderness. Marvin investigates the latest scientific understanding of the wolf, as well as its place in literature, history, and folklore, offering insights into our changing attitudes towards wolves.

'A fine, comprehensive survey of the ecology and habits of the wolf - his food, habitat, hunting, mating, social behavior and much more. Written in non-technical language, the book sets down just about everything that we know about this beautiful and - propaganda aside - shy animal, who, authorities agree, has never in this country attacked a man.' - The New York Times Book Review

Helen and Bill Thayer, accompanied by their part-wolf, mostly Husky dog, Charlie, set out to live among wild wolf packs—first in the Canadian Yukon and then in the Arctic. When they set up camp within 100 feet of a wolf den, they were greeted with apprehension. But they establish trust over time because the wolves accept Charlie as the alpha male of the newly arrived "pack." Readers travel with the Thayers as they learn about wolf family structure, view the intricacies of the hunt, the wolves' finely honed survival skills, and playfulness.

This book offers a panoramic view of the emerging eco-paradigm of Translation Studies, known as Eco-Translatology, and presents a systematic study of the theoretical discourse from ecological perspectives in the field of Translation Studies. Eco-Translatology describes and interprets translation activities in terms of the ecological principles of Eco-holism, traditional Eastern eco-wisdom, and 'Translation as Adaptation and Selection'. Further, Eco-Translatology approaches the phenomenon of translation as a broadly conceived eco-system in which the ideas of 'Translation as Adaptation and Selection', as well as translation as a 'textual transplant' promoting an 'eco-balance', are integrated into an all-encompassing vision. Lastly, Eco-Translatology reinforces contextual uniqueness, emphasizing the deep embeddedness of texts, translations, and the human agents involved in their production and reception in their own habitus. It is particularly encouraging, in this increasingly globalised world, to see a new paradigm sourced from East Asian traditions but with universal appeal and applications, and which adds to the diversity and plurality of global Translation Studies. This book, the first of its kind, will substantially expand the horizons of Translation Studies, a field that is still trying to define its own borders, and will open a wealth of new possibilities. Destined to become a milestone in the field of Translation, Interpretation and Adaptation Studies, as well as eco-criticism, it will introduce readers to a wholly new epistemological intervention in Translation Studies and therefore will open new vistas of thoughts, discussion and criticism.

“*The Alienist* set in eighteenth-century Stockholm: Brawny, bloody, intricate, enthralling—and the best historical thriller I’ve read in twenty years.” —A.J. Finn, #1 bestselling author of *The Woman in the Window* “Thrilling, unnerving, clever, and beautiful.” —Fredrik Backman, #1 bestselling author of *A Man Called Ove* “Chilling and thought-provoking. Relentless, well-written, and nearly impossible to put down.” —Kirkus Reviews (starred review) One morning in the autumn of 1793, watchman Mikel Cardell is awakened from his drunken slumber with reports of a body seen floating in the Larder, once a pristine lake on Stockholm’s Southern Isle, now a rancid bog. Efforts to identify the bizarrely mutilated corpse are entrusted to incorruptible lawyer Cecil Winge, who enlists Cardell’s help to solve the case. But time is short: Winge’s health is failing, the monarchy is in shambles, and whispered conspiracies and paranoia abound. Winge and Cardell become immersed in a brutal world of guttersnipes and thieves, mercenaries and madams. From a farmer’s son who is lead down a treacherous path when he seeks his fortune in the capital to an orphan girl consigned to the workhouse by a pitiless parish priest, their investigation peels back layer upon layer of the city’s labyrinthine society. The rich and the poor, the pious and the fallen, the living and the dead—all collide and interconnect with the body pulled from the lake. Breathtakingly bold and intricately constructed, *The Wolf and the Watchman* brings to life the crowded streets, gilded palaces, and dark corners of late-eighteenth-century Stockholm, offering a startling vision of the crimes we commit in the name of justice, and the sacrifices we make in order to survive.

When one looks at the history of English Studies there has been a noticeable proliferation of research interests since the 1970s. As a result of such development, attempts have been made to create a new basis for communication and cooperation inside Anglistics and across disciplines. Making a case for a Dialogic Anglistics is such an attempt. A Dialogic Anglistics is based on a normative concept of dialogue aiming for egalitarian forms of cooperation both inside, between and across disciplines leading to the redefinition of old and creation of manifold new directions for English Studies. In the nineteen articles presented in this volume dialogic encounters are encouraged both within and between different fields within Anglistics. Furthermore, dialogic links are created with colleagues from other academic disciplines.

Red wolves are shy, elusive, and misunderstood predators. Until the 1800s, they were common in the longleaf pine savannas and deciduous forests of the southeastern United States. However, habitat degradation, persecution, and interbreeding with the coyote nearly annihilated them. Today, reintroduced red wolves are found only in peninsular northeastern North Carolina within less than 1 percent of their former range. In *The Secret World of Red Wolves*, nature writer T. DeLene Beeland shadows the U.S. Fish and Wildlife Service's pioneering recovery program over the course of a year to craft an intimate portrait of the red wolf, its history, and its restoration. Her engaging exploration of this top-level predator traces the intense effort of conservation personnel to save a species that has slipped to the verge of extinction. Beeland weaves together the voices of scientists, conservationists, and local landowners while posing larger questions about human coexistence with red wolves, our understanding of what defines this animal as a distinct species, and how climate change may swamp its current habitat.

They draw their theoretical inspiration from the vitality of emerging critical discourses, such as new materialism, ecofeminism, critical animal studies, food studies, object-oriented ontology and affect theory. This timely volume looks back at the early decades of the Anthropocene to query the agency of visual culture to critique, create and maintain more resilient and biologically diverse local and global ecologies.
