## Stefano Castriota

Economia del vino Stefano Castriota, 2015-11-02T00:00:00+01:00 L'Italia si trova da sempre ai vertici delle classifiche di produzione, consumo ed esportazioni di vino sia in volume che in valore. Il settore ha, però, subito negli anni significativi cambiamenti sia sul fronte dell'offerta che della domanda, interna e internazionale. L'importanza e la peculiarità del settore hanno portato alla creazione di una nuova area di studi economici, appunto l'economia del vino. L'Autore, economista del vino e sommelier, con ricchezza di dati e taglio rigoroso ma divulgativo, offre al lettore, sia esso un operatore o uno studioso, una ricca e completa analisi del settore vitivinicolo. Il libro è diviso in due parti: nella prima vengono mostrati i meccanismi di funzionamento del mercato del vino, mentre nella seconda ci si concentra sull'intervento delle autorità pubbliche nel regolamentare il mercato e correggerne i fallimenti. L'auspicio è quello di contribuire alla diffusione e allo studio dell'economia del vino, nonché di stimolare governo, associazioni di categoria e imprese a intraprendere azioni concrete ed efficaci volte a favorire la crescita del comparto e della cultura enologica nel nostro paese.

**Wine Economics** Stefano Castriota, 2020-11-17 A comprehensive and interdisciplinary approach to the economics of the production, distribution, and consumption of wine. Wine economics is a growing subfield that examines the economics of the production, distribution, and consumption of wine. In this book, Stefano Castriota takes a comprehensive and interdisciplinary approach to the study of wine economics, drawing on literature from industrial organization, welfare economics, economic policy, political economy, management, finance, health economics, law, and criminology. Castriota explores how wine markets operate and how they are regulated, covering such diverse topics as the health economics of wine consumption (both the positive health effects associated with moderate wine intake and the negative effects of alcohol abuse), the competition and profitability of wineries, the function of wine as an investment, and the quality of wine. He examines differences between the wine industries in the Old World and the New World, comparing small, family-owned wineries with larger conglomerates, and analyzes the regulation of wine in the United States versus the European Union. He concludes with a series of recommendations to ensure open and efficient wine markets while protecting public health. Originally published in Italy as *Economia del Vino*, this English translation has been extensively revised. It includes additional material focusing on the English-speaking countries of the New World, particularly the regulatory environment of the United

States and the lingering effects of Prohibition.

**La economía del conocimiento local en el vino de la D.O. Tierra de León, un modelo de generación de valor en construcción** Raúl Prieto Barba,2018 El estudio de la economía de una zona geográfica concreta, caracterizada por la existencia de conocimientos locales heredados generación tras generación, es algo que aún resulta muy complejo. Es difícil explicar por qué ciertos conocimientos pueden brindarle a algunos lugares un gran reconocimiento y dinamismo económico, mientras que otros con características similares o incluso mejores, no consiguen que sus productos sean aceptados por el mercado y obtener el rendimiento económico esperado. A continuación se realizará un estudio de esta problemática económica en la producción de vino de la Denominación de Origen Tierra de León, un lugar con una cultura vitivinícola centenaria con grandes superficies de tierra dedicadas al cultivo de la vid y enormes volúmenes de exportación de vino fuera de la provincia de León durante años, que, sin embargo ha obtenido una relevancia muy modesta en los mercados actuales. Palabras clave: Denominación de Origen, economía del conocimiento, vitivinícola, conocimientos locales.

Los reyes del vino Ana María Mateu,2022-07-06 La historia de los hermanos Arizu constituye uno de los variados casos de éxitos y fracasos económicos a los que dio lugar la inmigración en Argentina y, en particular, en Mendoza. En el itinerario que recorrieron estos hermanos, fundamentalmente el mayor de ellos, Balbino, desde su llegada de España, aplicaron los saberes traídos de su patria, adaptándose a los cambios que imponía la floreciente industria vitivinícola mendocina de principios del siglo XX, y desplegaron diferentes estrategias para un planificado desarrollo en etapas. Así, estos emprendedores encontraron y, a la vez, moldearon su espacio en esa estructura productiva en formación. Apoyándose en una investigación de años y en numerosas fuentes, entre ellas el valioso rescate de un importante fondo documental de la empresa, Ana María Mateu nos lleva a conocer los inicios y seguir el crecimiento de uno de los mayores emporios bodegueros que hubo en la provincia y el país. Con curiosos detalles sobre la gestión de la bodega, nos permite descubrir cómo llegaron a convertirse, según la prensa de la época, en «los reyes del vino».

*The Palgrave Handbook of Wine Industry Economics* Adeline Alonso Ugaglia,Jean-Marie Cardebat,Alessandro Corsi,2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What

are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

**Wine Globalization** Kym Anderson,Vicente Pinilla,2018-02-22 In this anthology, editors Kym Anderson and Vicente Pinilla have gathered together some of the world's leading wine economists and economic historians to examine the development of national wine industries before and during the two waves of globalization. The empirically-based chapters analyze developments in all key wine-producing and consuming countries using a common methodology to explain long-term trends and cycles in wine production, consumption, and trade. The authors cover topics such as the role of new technologies, policies, and institutions, as well as exchange rate movements, international market developments, evolutions in grape varieties, and wine quality changes. The final chapter draws on an economic model of global wine markets, to project those markets to 2025 based on various assumptions about population and income growth, real exchange rates, and other factors. All authors of the book contributed to a unique global database of annual data back to the mid-nineteenth century which has been compiled by the book editors.

*A History of Wine in Europe, 19th to 20th Centuries, Volume I* Silvia A. Conca Messina,Stéphane Le Bras,Paolo Tedeschi,Manuel Vaquero Piñeiro,2019-11-01 This two-volume collection analyses the evolution of wine production in European regions across the nineteenth and twentieth centuries. France and Italy in particular have shaped modern viticulture, by improving oenological methods and knowledge, then disseminating them internationally. This first volume looks closely at the development of winegrowing, with cases ranging from Italian and French regions to smaller producers such as Portugal and Slovenia.

Agritourism, Wine Tourism, and Craft Beer Tourism Maria Giulia Pezzi,Alessandra Faggian,Neil Reid,2020-07-23 This book delves into the development opportunities for peripheral areas explored through the emerging practices of agritourism, wine tourism, and craft beer tourism. It celebrates the entrepreneurial spirit of people living in peri-urban regions. Peripheral areas tend to be far from urban hubs, providing essential services but also typically suffering from marginalisation and remoteness, despite the access to environmental, cultural, and social resources. In this sense, this book investigates the linkages between local agency and tourism in peripheral areas, the role of existing policies, and the evolving bottom-up

practices in fostering local development. The basic aim is to disestablish the dichotomies that often emerge when dealing with issues of rural-urban and/or centre-periphery relationships; innovation vs tradition; authenticity vs mise en scène; agency vs inertia; and social, cultural, economic mobility vs immobility; etc. With focused attention on the possible compliance or conflicting strategies of local actors with the existing policies, the book considers how local actors and communities respond to the implications of peripherality in areas often impacted by marginalising processes. Drawing upon case studies from North America and Europe, this book presents this connection as a global phenomenon which will be of interest to community and economic development planners and entrepreneurs.

*Food and Agrarian Orders in the World-Economy* Philip McMichael, 1995-01-30 The emergence of a world economy depends on the reorganization of agriculture and food systems to provision the work force and the industries associated with the division of labor. This work emphasizes the central role played by food and agriculture in the world economy. The book includes a historical dimension along with the formulation of the challenges that face the world today. Social scientists of all kinds, but especially economists, sociologists, environmentalists, and political scientists, should be interested in this volume.

**Handbook of Research on Sustainability Challenges in the Wine Industry** Marco-Lajara, Bartolomé, Gilinsky, Armand, Martínez-Falcó, Javier, Sánchez-García, Eduardo, 2023-04-18 In the wine industry, sustainability is an extremely important issue for two main reasons: Firstly, the industry faces serious threats as a consequence of climate change, as well as water and energy scarcity. Secondly, proper sustainable management of wineries can mean obtaining a competitive advantage by allowing them to increase market share and organizational innovation processes. In this sense, previous work has shown that customers tend to select wines that have been developed following sustainable practices, despite not knowing what this means in practice. The Handbook of Research on Sustainability Challenges in the Wine Industry serves as a guide for study, reflection, and critique to understand sustainability in the wine industry in its triple aspect (economic, social, and environmental). The book sheds light on the new trends and challenges of the wine industry, making it a must-read for academicians and managers who want to deepen their knowledge of the wine industry as well as its link with sustainability. Covering key topics such as wine tourism, green innovation, and consumer behavior, this major reference work is ideal for industry professionals, business owners, managers, entrepreneurs, researchers, scholars, academicians, practitioners, instructors, and students.

*A History of Italian Wine* Manuel Vaquero Piñeiro, Paolo Tedeschi, Luciano Maffi, 2022-08-31 This book analyzes the evolution of Italian viticulture and winemaking from the 1860s to the new Millennium. During this period the Italian wine sector experienced a profound modernization, renovating itself and adapting its products to international trends, progressively building the current excellent reputation of Italian wine in the world market. Using unpublished sources and a vast bibliography, authors highlight the main factors favoring this evolution: public institutional support to viticulture; the

birth and the growth of Italian wine entrepreneurship; the improvement in quality of the winemaking processes; the increasing relevance of viticulture and winemaking in Italian agricultural production and export; and the emergence of wine as a cultural product.
