

Economic Collapse Prepping For Tomorrow Book 2

"It does not take a majority to prevail... but rather an irate, tireless minority, keen on setting brushfires of freedom in the minds of men." Samuel Adams" In 2115, New England society is thriving a century after a worldwide economic and societal collapse. There are no borders, no states, and no coercive regulations, yet never has a more peaceful and prosperous place existed on earth. But there is unrest in this apparent paradise. Mr. Drake's third generation security company has seen better days, and his arbiter friend Mr. Barry is under investigation by Business Ethics Review for allegedly taking a bribe. Faced with the prospect of a crumbling business, and waning power, the two devise a plan to reform society to their liking. Mr. Drake and Mr. Barry intend to replace the anarchy of New England, with... a government! However, intrepid reporter Molly Metis, won't be intimidated by the pair. Despite attempts to stop her, she continues to dig deeper into recent events surrounding Drake and Barry. She is sure she can expose the dark plot, but will anyone listen? Will they care? And what will be the cost?

Whether you believe an economic collapse is imminent, the power grid is doomed to fail or you preparing because you see how unsustainable this system really is we need to be prepared for anything. We can't afford to get blindsided by something because we were looking in a totally different direction. Preparedness should be a mindset, not a fad. To become a seasoned prepper we need to start from ground zero and work our way up, and we need to do it in a way that doesn't put us in the poor house. Preparing is also very personalized, there is no one way to build your food storage and no one way to build your bug out bag. All of our situations are different and we need to plan accordingly. This is not your typical prepping book; you will not

find a list for items you need in the event of a disaster. What you will find is the information you need to build your supplies evenly over time, what to expect from others who are not prepared, form a plan based on our personal situation and do it in a way that helps you become more self-reliant over time. This is more than just another book because we are going to take this a step further and give you full access to the Survivalist Prepper Academy for 60 days. In the academy we have a list of downloadable files, survival courses, prepping courses, spreadsheets and other members only content.

Baking soda is one example of an item that you buy from the store regularly and take for granted. Chances are pretty good that you have at least one box of baking soda in your house somewhere. However, after reading this book, you will want to strongly consider stockpiling it as part of your survival and disaster preparedness plans. The reason why is because baking soda can be used for a variety of purposes in the event of a serious crisis, and it's those purposes that we are going to talk about in detail in this book. Examples of baking soda survival uses that this guide will outline and discuss in detail include, but are not limited to, the following: -How To Treat Heartburn -How To Treat Ulcers -How To Make DIY Deodorant -How To Make DIY Soap -How To Make DIY Shampoo -How TO Make DIY Toothpaste -How To Make DIY Floor Cleaner -How To Make DIY Dishwashing Soap -How To Treat Sunburns -How To Remove Splinters -How To Clean Batteries -How Treat Bug Bites -How To Treat Poison Ivy -How To Improve Your Overall Physical Endurance By the end of this book, you will have gained a wealth of knowledge on how to properly (and safely) use baking soda for survival purposes. The truth is that baking soda is one of the most versatile sanitation/personal hygiene/cleaning/medical products there are, and this book is going to prove that to you.

We always hear stories about how the stock market could crash, about the alarming number of bankruptcies and home foreclosures, inflation, and the skyrocketing national debt that could all cause our extremely fragile economic system to simply collapse. Have you ever asked yourself what you will do if you wake up one ordinary day only to find out that the paper money in your wallet no longer holds any value to it? There are many people and reputable economists today who believe that such a day is soon coming. Regardless of whether you believe the economy will collapse soon or not, one thing is certain: if it does collapse, it will easily create the biggest havoc throughout our country that we have ever seen. People will riot in the streets of big cities and small towns alike, and the world as you know it will completely change. No longer will you drive off to work each morning to earn money, no longer will you be able to buy what you need in the local grocery or convenience store, and no longer will you be able to enjoy food at restaurants. What's worse, is that an economic collapse will most certainly NOT be a short term disaster scenario. Rather, it will last several months if not years. What this means for you is what while there are many different potential disasters that could come your way, an economic collapse will easily be one of the most critical ones to prepare for. Once paper money becomes worthless, the items that will suddenly skyrocket in value are the ordinary items that we use every day. These are the items that you need to store not only for yourself, but for bartering and trading purposes as well, and they are the items we are going to cover in this book. Most survivalists and preppers will recommend to you that you stockpile supplies for you and your family to live off to outlast a disaster. I'm not at all disagreeing with that, but I would say that you should make a separate smaller stockpile of ordinary items that you could use for bartering and trading in a post-economic collapse world as well. The logic here is

Download File PDF Economic Collapse Prepping For Tomorrow Book 2

simple: when paper money becomes worthless, the new currency will become simple items that we need to use every day (food, water, toilet paper, soap, medicines, etc.). The whole purpose of bartering is to trade something that you have but that isn't as valuable to you for something that is valuable to you but that you don't have. In a long term SHTF situation, bartering and trading is going to become a part of your everyday life. Since there will no longer be any stores where you can go to purchase whatever you want or need, you will be forced to negotiate with other people instead. If you are running low on a particular item that you need for your survival, you better have something valuable that you can give in return. This is why it's important to have trading commodities that are universally recognized for their value, and this book will go over fifty two of the most valuable commodities that you can barter in a post grid down world and the reasons for each.

Methods, Internet Communication & Entertainment, Bartering For Supplies

For decades US politicians have been kicking the federal deficit and overspending can down the road. No politician can get elected by running on a platform that will honestly fix the US economy. At no time in history has it been more crucial than now for each of us to understand our government. In order to do so, we must understand economics, politics, and the difference between the two. We are the richest country in history but yet we sit on the edge of financial disaster. How can we expect that to change if voters don't understand the very basics of economics? There has never been a source of information on economics that people can easily understand, UNTIL NOW. Author Marshall Payn, with a degree in Economics from M.I.T., believes that the current presentation of economics in our educational system is the biggest obstacle in understanding economics. He developed his unique approach while working in the field of vocational education, i.e. getting fundamental information from one mind to another. In clear and simple terms, this book separates truth from emotion, economics from politics, and offers undeniable proof of our country's destiny if each of us continues to elect politicians while lacking a clear understanding of basic economic principles. If you think you understand economics, think again. This book is an eye opener, not only with its content, but because these concepts are so simple. What is truly amazing is that the knowledge in this book is not common knowledge. You cannot call yourself a responsible citizen unless you read How to Understand Economics in 1 Hour prior to voting in the 2012 US election. It will change the way you see the government, politicians, and the future of our country.

THE U.S. ECONOMY IS A TICKING TIME BOMB! America's Economy is quickly reaching a point of no return. When the U.S. Economic collapse happens it will happen fast and with little or no warning. The few that are wisely prepared will survive while millions of others will face an uncertain future of poverty, war and daily stress and chaos. Chief Economist, Investor and Financial Author, Dr. Soloman Greenburg paints a shocking, yet very realistic picture of what many experts agree could happen in only a

fer mere months from now. Dr. Greenburg continues by laying out a simple, easy to follow battle plan you can use to build your own financial fortress using a mix of brilliant insight and actionable real world advice that every American citizen needs to know to be financially secure during the coming collapse. search this title economy economic trump banks bankers banking war international collapse failure bankruptcy bankrupt credit prepping prepper survival barter trade jp morgan chase bailout the fed

"Is Capitalism Forever?" takes a long view at our political and economic systems in the United States. From lifelong activism and study, the author argues for a future based in community and taking care of each other. The topics of equality, terrorism, social justice, and unions are all covered from the time of the Vietnam War through the present day election season. Thought-provoking and detailed, "Is Capitalism Forever?" should be read by every engaged citizen and student of history.

Disaster preparedness is no longer something that should solely be the concern of someone living on the coast who could be at risk of hurricanes or someone in the Midwest who has to live under constant fear of tornadoes. Rather, preparedness needs to account for all kinds of different disasters, including ones that are manmade such as an economic collapse, power grid down, or a nuclear power plant accident. A disaster can be something that's only untimely and inconvenient, but it can also be something that is destructive and life threatening. Regardless of the type of disaster you expect to face or will face, when it does strike you should only have one goal in mind: your

family's survival. The good news for you is there are preparedness steps that you can take to minimize the effect a disaster has on your family and increase your chances of survival, and following those steps is what this book is about. Why should you bother to prepare for a disaster? The reason why is because the world is simply not as safe as you would want it to be or even believe it might be. On the contrary, we live in a chaotic and unpredictable world where literally anything can happen. When disaster does strike, it does so quickly and when you least expect it. It could force you to bug in at your home to outlast the chaos going on outside, or it could force you to evacuate your home entirely and hit it out on the open road. In an instant, all of the luxuries and services that you are used to such as running water, food, power and electricity, gas, and communications could become cut off and remain cut off for a long time. Ask yourself an honest question: in the event of a large scale and long term disaster where the world as you know it has suddenly changed in the blink of an eye, would you be able to guarantee your family's safety? Even if you answer with 'no,' the good news for you is that by working together as a team in advance of the disaster, the chances of survival for you and your family skyrocket dramatically. In this book, I'm going to walk you through a series of seven critical steps that you must follow in order to make your family more prepared for whatever disaster comes your way. These steps are:- Getting your spouse or partner onboard with prepping - Teaching your children about survival and disaster preparedness- Building a complete bug out bag for each of your children -

Stockpiling enough supplies to sustain your family over the long term- Bugging in with your family at home in the midst of a crisis - Writing an effective evacuation plan with your family to prepare you for the possibility of abandoning your home- Bugging out with your family should you indeed be forced to abandon your home and possessions Knowing what you need to do in a disaster situation and instructing your family on what to do is a massive responsibility that you have as a parent, and it will ensure that all of you remain prepared and protected when a massive catastrophe happens.

A necessary addition to any prepper's or survivalists's shelf! A one-year food supply means freedom. It means that you are less subject to the whims of the economy or personal financial emergencies. You can handle small disasters with aplomb. You aren't reliant on the government if a crisis strikes. You can't be manipulated because your family is hungry. This edition provides to a detailed compendium of all things food storage. Geared towards preppers, it teaches you: Why everyone needs a food supply in their homes How much food you need How your pantry is directly related to your health The components of a perfect pantry Prepping for those with dietary restrictions A thrifty new way of shopping so you can afford to build your pantry How to store the food you purchase to extend the shelf life for as long as possible A week-by-week plan, complete with shopping lists and menu ideas How to save money by making items most people purchase ready-made at the store Pantry inventory and maintenance Where to store all of that food Bonus: 25 frugal and delicious recipes If you're new at

this, you can take the most important step today--the step of getting started. You'll have a year's supply of food in no time at all! *This is the most updated and revised version of Daisy Luther's The Pantry Primer*

"8 Easy Steps to Disaster Prepping" is a survival book detailing eight simple steps to prepare for any short-term disaster. This book includes tips and suggestions to help the newbie get started in creating a solid prepping base that can eventually be built into a more long-term plan. The 8 steps are nicely detailed throughout the book and it includes the author's own personal Disaster Prepping List that readers can use as a template to tweak as they create their own versions of it. Tanyard Whitebloom is not new to survival prepping. In this introduction he admits, "I started this book not knowing that I was actually writing one. As I spoke to several friends about prepping, they all replied, "I know I have to do that, but I just don't know where to start!" So I thought I would write down a few survival tips for them. Those tips ended up being several pages long and the basis for this book. I guess I know so much about prepping because I have been interested in survival planning since before it was really popular. This comes from the fact that I have been in just about every type of natural disaster since I was a kid." In this book Whitebloom urges everyone to "start somewhere" and begin to prepare with simple survival plans for disaster. There are several scenarios Whitebloom mentions in this book for which to prep. These include Survival plans for economic collapse, prepping for floods, prepping for earthquakes, prepping for blackouts,

prepping for hurricanes, prepping for tornadoes, and prepping for civil unrest. Whitebloom's eight steps can be applied to them all.

Disaster preparedness is a major responsibility that you can undertake take for yourself and your family. All this means is that you take steps to ensure you and your family's safety and survival in the event of a major disaster or catastrophe, such as a natural disaster, an economic collapse, an EMP grid down disaster, a terrorist attack, a nuclear power plant accident, or whatever else you feel will strike. Being prepared will make you caught less off guard and put you at a distinctive advantage over the millions of other people who have not taken any preparation steps whatsoever. At the same time, it's also important that you are aware of simple yet potentially fatal mistakes that you can make while prepping and learn how you can avoid these mistakes. That's what this book is all about. The specific mistakes that we are going to discuss how to avoid in detail are the following: * Mistake #1: You Only Prepare For One Kind of Disaster * Mistake #2: You Store All Of Your Eggs In One Basket* Mistake #3: You Don't Build A Bug

Out Bag* Mistake #4: You Don't Prepare Your Family* Mistake #5: You Procrastinate * Mistake #6: You Focus On Gear and Supplies More Than Skills* Mistake #7: You Tell Everyone About Your Preparations * Mistake #8: You Don't Inspect and Rotate Your Food and Water * Mistake #9: You Don't Take Personal Hygiene and Sanitation Into Account* Mistake #10: You Don't Have a Backup Plan (and a Backup Plan to Your Backup Plan)For each of these mistakes, we'll establish why it's a mistake to begin with, the disastrous consequences that exist if you make it, and solutions for how you can avoid it. This knowledge alone will serve you well and increase your chances of survival in a disaster scenario. Note that thousands if not millions of people have recognized the need to prep and have taken the necessary steps, but a sizable percentage of those people have also unfortunately made these mistakes and the result is they will be at greater risk when disaster strikes. You cannot allow yourself or your family to become victims in a catastrophe, which is why I cannot enunciate enough about how knowledge of these mistakes and how to avoid them is imperative.

Economic CollapsePrepping for TomorrowCreatespace Independent Publishing Platform

BEFORE, DURING, AND BEYOND A MARKETPLACE MELTDOWN You're prepared for hurricanes, tornadoes, blizzards, earthquakes and other natural

disasters, but are you ready for the inevitable man-made disasters to come? This book teaches you the other half of disaster planning—how to survive the economic turmoil that hits regions and nations after the storm has passed. Prepper's Financial Guide will teach you how to:

- Become self-sufficient
- Purchase precious metals
- Safeguard your valuable possessions
- Invest in foreign and alternate currencies
- Barter and trade for needed supplies
- Build an off-grid marketplace
- Reduce debt so you can save for the future
- And much more

"Beguiling, sagacious, and thoroughly good fun." 'Home Economics for Girls' is a family drama dressed in comic clothes, masquerading as a country house murder mystery. Clever, funny and with just the right blend of sweet and sour, this is for daughters and their mothers, and anyone else who wants to learn the correct way to eat a scone. On a late summer weekend at home in grand but crumbling Garton Grange, Violet has to prepare for her Home Ec assessment, but with a house full of guests and a lunatic sister playing at detectives, how will she ever get it done? And if the dog did not destroy Mother's cake, who did? Did she really see someone lurking down at the gatehouse? Which one is the bay tree, and what does nutmeg look like anyway? Should self-confessed teachers be allowed out into society? All these questions must be answered before the weekend is over, with lessons to be learned along the way about baking, loyalty and just how

strong a Mother can be.

Emergency Drinking Water Storage: (FREE Bonus Included) 15 Proven Tips How to Store Water for Drinking and Cooking Next to Oxygen, water is the most vital resource that we need for survival. We can't go more than a few days without out, and for most of us, just a day or so with nothing to drink will leave us feeling pretty dry pretty fast. So how could you create your own water supply if you were in a pinch? Do you even know where to look? Not to worry my friends; just look in this book! This book is full of inventive ideas to store up water for tight situations. Whether you are waiting out a hurricane, power outage, or some other disaster related event, this book outlines exactly what you need to be able to store enough water to see yourself through the crisis. Using science and a bit of common sense, the writer of this book has documented 15 proven means of water storage that any good prepper anywhere can implement and utilize in the face of a serious emergency. In this book we will learn: How to safely sanitize and purify water. To utilize common household space for storage. What kind of auxiliary storage containers to use. How to store your water naturally outdoors. Download your E book "Emergency Drinking Water Storage: 15 Proven Tips How to Store Water for

Drinking and Cooking" by scrolling up and clicking "Buy Now with 1-Click" button!
A Beginners Guide To Christian Prepping: Learn How to Prepare for SHTF, Natural Disasters, Civil Unrest, Economic Collapse, an EMP Strike, and other Apocalyptic Events of the End Times This book,

The book makes a real connection for circumstances where cash has been rendered useless. The author covers all the major points of an inevitable economical collapse. This book takes you through the whole timeline of a collapse. This book is useful for someone who is wanting to put together a plan or at least have an idea so they are not blindsided. Also, useful for someone who is not a beginner at prepping that wants to double-check their plans in this particular situation. In this book, you will find: - Learn About The Global Fiat Currency Paradigm And Why Most Fiat Currency's Eventually End Up At Their True Worth - The possible causes of a financial collapse, including some of the historical precedents - What you can expect if your money becomes worthless - How to live in a world where money is of little or no value - About cash-free economics Much, Much More

The Death of Money Sale price. You will save 66% with this offer. Please hurry up! The Prepper's Guide to Survive in Economic Collapse and How to Start a Debt Free Life (dollar collapse, prepping, debt free, how to get out of debt) The Death of Money The

Prepper's Guide To Survive in Economic Collapse and What to do right now. While living the happier and worryless life, no one can even want to think about the intervening dreadful economic collapse and the tough time, but thinking about this aspect and doing preparatory measures can save from the big destruction and it may turn out the enormous deterioration into smaller one. For dealing with these entire situations bravely and boldly, then this book is the one stop shop for resolving the economic related problems and tackling measures. But the main spotted areas of this book are:

- Exhibiting the economic collapse and its causes
- Showcasing the after effects of the economical collapses
- Elaborating the preparatory guidelines to confront the financial problem
- Unveiling the main strategies to implement in the future economic constriction
- Directing the main steps for the secured survival in the severe condition
- Informing the warning signs to pack the bags and be prepared

If you've been told it's too late to start prepping ... If you've been told it's too expensive to start prepping ... If you think most prepping guides are too complicated ... If you have little ones, not just yourself to think of ... If you think most preppers seem, well-a little

obsessive ... THIS is the prepping guide for you! PREPPER PARENTS! is a brief, easy-to-understand guide designed to walk you through preparedness for everything from short-term natural disasters to long-term economic collapse. This guide uses flagged action items as well as common sense tips to help you decide on a plan for you and your family. You'll see checklists to follow for getting a bug-out bag stocked on a budget, defense, heat and shelter, medical and dental supplies, personal hygiene, finance and bartering and much more! Chapters on food and water will teach you quickly how to achieve a clean, drinkable water supply and which food items taste best, carry lightest and store longest. Filled with special ideas for parents with children, this guide is your starting place for common sense readiness.

Maximize Utility ("MU") is, on the surface, a review of contemporary monetary and macroeconomics ("M&M"). It is really a broader summary of the economy, markets, investing and government economic policy, and how these economywide forces affect the lives of everyday people and the economic success of households. MU highlights the limitations of M&M fiscal and monetary policies, active investment management and the myriad government programs designed to improve the economic well-being of people. MU reveals the tenuous nature of the models historically taught in M&M, that our current M&M canon is defunct and that we instituting ad hoc M&M policy with the hope that our future economic output will suffice for all the commitments we have made. Indeed, M&M parables and models are insightful about national economies,

especially their historical development. M&M does not, however, constitute a body of scientific ideas to perform successful proactive government M&M policy and to engender greater economic output by the macroeconomic manipulations of interest rates and aggregate demand. Economic policy advocates, whether conservative or liberal, break on prejudices. The prevailing intellectual economic prejudice in America today, perhaps more than in any other society, is Keynesianism. American society perceives spending as the source of greater economic output. The other major player in our economic lives - the investment community or "Wall Street" - has been inordinately successful in the period from about 1980 until the present, i.e. over the lifetimes of the people who currently run America. Portfolios of assets, including stocks, bonds and real estate, have yielded high rates of return. This era was a unique period of asset price increases motivated by a fortuitous combination of underlying economic and social conditions. Through Wall Street and our central bank we have valued every asset to its maximum. We bet our economic future on the continuation of rising asset valuations. Future returns will be much lower, however, and we will face constant government budget shortfalls and related insolvencies like those of many pensions. In America we admire our central bank for managing the macroeconomy and we admire Wall Street for providing high rates of return but both are illusions. Our M&M story is largely a generational story about a generation that borrowed against the future of its children. Maximize Utility reveals the rightness of microeconomics. People are competent to

manage their lives. To the extent they cannot, it is largely the result of a plethora of government interventions into education, family formation, healthcare, retirement, housing and labor markets. Our government patronizes our people extremely. Microeconomic parables are singular. Substitution, choice, preferences, technology, profit, marginal product, optimality, etc. are great ideas to think about our economic lives and how to run a household and live a fulfilling life. People need no nudges or supervisions of their choices. MU is three thrusts. It is a review of current economic conditions, a short text on M&M concepts and a section on methods in social and business science. MU is designed to be a reference book to accompany a textbook in course like economics, macroeconomics, monetary economics and various finance and international economics courses. MU is updated through 2016.

When faced with the possibility of a disaster ever happening in their life, most people respond with something along the lines of, "It won't ever happen to me" or "it can't ever happen to me." But the truth is you or anyone else cannot foretell the future. You can't honestly say that there will never be a food shortage or a cash shortage in the future. To prepare for such a scenario, you always have a choice to make: you can either prepare and be frugal now, or you can do nothing and have frugality forced upon you and your family. Frugal living is easily one of the best disaster preparations a true survivalist can make. For one thing, it enables you to spend additional resources towards your survival plan, but it also greatly lessens the surprise or the shock when a disaster scenario

comes our way. A financial collapse or recession is just one of the many disasters that can and will be forced upon us. We already had one major recession back in 2008, but a future economic collapse will be far worse than that. Economic collapses and recessions are both noted for their high unemployment levels, bankruptcies of major businesses and companies, a significant lowering of consumer spending, and even hyperinflation which can lead to a multitude of other problems such as civil unrest. Can you honestly say you are prepared for an economic collapse? If not, then this book will be perfect for you. In this book, we are going to discuss how to begin preparing financially for a major disaster such as an economic collapse from a beginner's perspective. The specific subjects that we are going to cover include each of the following: * Why A Complete Financial Collapse Is Coming * The Benefits Of Preparing Financially Now * Setting A Budget and Getting Out Of Debt * Easy Ways To Make More Money * Living Frugally * Making A Survival Emergency Fund

When people think about preparing for disaster, they often think about hoarding food and water and other necessities, putting together a bug out bag, finding a suitable bug out location, and so on. That's all great, but at the same time, you have to adequately prepare your finances for disaster as well. It's one of the most overlooked aspects of prepping, but at the same time, it's also one of the most critical.

All empires collapse eventually, and America is no exception. Their reign ends when they are defeated by a larger, and more powerful enemy, or when their financing runs

out. From the bestselling author of CYBER WARFARE and EMP: Electromagnetic Pulse, Bobby Akart undertakes a detailed review of the history of empires and nation-states, and their ultimate demise. ECONOMIC COLLAPSE is a primer on the reality that our nation will ultimately perish at the hands of economic and societal collapse. The United States economy can collapse as a result of our own government's mismanagement of our national debt or external factors such as a global financial meltdown, an attack on the US Dollar, and other predictable events. Why do you think the Federal Reserve is so frightened of raising interest rates despite apparent underlying inflation data? Our economy is a house of cards. We are just a few steps away from a collapse of the dollar and hyperinflation. History is replete with the rise and fall of empires. Are Americans so arrogant, or oblivious, to realize that we are in a stage of decline and collapse? Some of the signs of decline include a downward cultural spiral, an over-reliance on government and the inability to protect the integrity of a nation's borders. Sound familiar? All empires collapse eventually. There have been no exceptions in the history of humanity. None. All empires end when a more vigorous empire defeats them-or when their financing runs out. If you think the scenarios contained in The Big Short by Michael Lewis opened eyes, Economic Collapse by Bobby Akart will keep you up at night thinking about prepping. Because you never know when the day before, is the day before. Prepare for tomorrow! ABOUT THE PREPPING FOR TOMORROW SERIES Freedom Preppers came together in 2011 to share

research with others on the subject of prepping. Originally designed as an informational website, FreedomPreppers.com quickly grew in prominence as its articles on preparedness were shared around the web. The goal of the Prepping for Tomorrow series is twofold. First, provide a detailed analysis of the threats we face as Americans. Second, give new and seasoned preppers alike the opportunity to enhance their preparedness plan with this knowledge. PRAISE FOR THE AUTHOR and PREPPING FOR TOMORROW SERIES Bobby Akart possesses the analytic capability of a supercomputer coupled with the expressiveness of an exceptional writer." ~ Amazon Reviews "A terrifyingly realistic, prescient new series ... which can only be described as prophetic." - G. Michael Hopf, best selling author of The New World series.

"Considering how intertwined financial markets and computers are these days, Bobby Akart's warning resonates like Paul Revere riding through the streets of Boston." - Joseph Souza, award winning author of Unpaved Surfaces "Being a fellow Tennessean, not too far from my neck of the woods, I can tell you he is one individual I plan to link up with when/if "it hits the fan." - Steve Bird, Author of the New Homefront series

Are you, along with thousands if not millions of other everyday people, hugely concerned about the way things are going in our unstable and unpredictable world? Are you worried about the possibility of a natural catastrophe, an EMP attack that would cause the power grid to collapse, a government takeover in the form of martial law, an

economic collapse that could be worse than the Great Depression, a nuclear power plant accident, or any other kind of devastating disaster that you can think of? And most importantly, do you have the skills and knowledge you need to protect your family and friends in the event that such a nationwide wide calamity does indeed happen? If so, there is no reason to deny that you aren't. Millions of people throughout the world, and especially in the United States, have spent the last several years taking very drastic and critical steps to prepare themselves and their families for a large scale and long term emergency scenario. It's never too late to start doing so yourself. So what can you do to start preparing yourself and your family for disaster? The very first thing you need to do is start accumulating knowledge. Only after you have gained knowledge will you be able to convert that knowledge into a useful and lifesaving skill set. This book will serve as an excellent introduction to many of the different hacks that will come in handy during any kind of a survival or disaster situation. Prepping in general is a massive responsibility that you take not only for yourself but for your loved ones as well. Ultimately, how much knowledge you have about survival and disaster preparedness and how well you are able to turn that knowledge into skills will definitely mean the difference between life and death. Now is it possible that a large scale disaster may never happen, at least not in your lifetime? Sure, but that doesn't mean that you shouldn't prepare yourself anyway. After all, the old saying goes that it's always better to be safe than sorry. A scary aspect of disaster preparedness is that we have

absolutely no control over when, where, or how it will happen. When it does occur, it will take us by completely surprise and throw us into survival mode in the blink of an instinct. This is why it is always better to be prepared than to not be prepared. The very fact that you're reading this book right now is evidence that you agree with what I am saying in this introduction. You agree that a massive disaster could indeed impact you and your family, and you agree that you need to start gathering knowledge so that you can start to take action immediately. In this book, we're going to go through specific categories (or perhaps more appropriately, priorities) that are related to survival and specific hacks, tips, and strategies that you can follow for each one, including:- Hacks For Adopting the Survival Mentality- Hacks For Avoiding Common Survival Mistakes- Hacks For Gathering and Storing Food- Hacks For Collecting and Storing Water- Hacks For Applying First Aid- Hacks For Home Security and Personal Defense

By the end of this book, you will be much more knowledgeable on survival and disaster preparedness, and you will then be able to start transforming that knowledge into a valuable skill set. Now granted, should this book be the only survival or prepping book that you read in your entire life? Of course not. You can never learn too much information and therefore you should never stop reading. The purpose of this book is solely to introduce you to disaster preparedness hacks or to otherwise teach you some hacks you may not have thought of even if you already have begun learning.

The prepper's pantry is a very important part of their survival kit. It usually consists of a large refrigerator that stores a lot of perishables and canned goods, a small stove with stoves, some utensils such as knives, large pots, pans, baking pans and the most important, a collection of freeze dried foods. They have a variety of different foods to provide for different needs for example, if someone in the family is diabetic they may need a special type of diabetic food or they may just need something to keep them warm during severe weather. This guide will give you some tips on what foods you should have on hand. This guide will also give you information on what foods you should avoid having in your preppers pantry. This will help ensure that you are providing for your family's needs instead of just going off half-cocked when disaster strikes. You want to be prepared so that you do not have to rely on others to feed you. Following this guide will ensure that you have enough food storage to last you through at least two weeks without any problems. If you have a prepper in your family, it is very important to talk to him or her about the type of pantry they have. In fact, many preppers are starting to do their own grocery shopping so that they know where to buy the best foods at all times. This will save them a lot of money. Some families even go so far as to buy freeze dried foods that are packed in cans. It saves them time, because it can get overwhelming to sort through all of the different brands. Another thing you should have in your hidden preppers pantry bed are multiple cans of powdered drinking water. Many preppers depend on canned foods for their survival food supply. However,

most people that live in an area where there is no running water do not know how to properly store the canned foods. With the proper pantry and a good storage system, you can easily prepare healthy meals for your family.

This is a modern tale of a family and town that faced economic collapse along with an EMP event. Tabitha tried for many years to teach the families to put up foods and other supplies in case of emergencies. It wasn't about zombies, she just wanted folks to have enough to feed themselves. No one listened, most even mocked her. That is until it all fell apart - the economy, the weather, and finally the grid. They learn to survive and flourish thanks to the efforts of a woman named Tabitha. She is stronger than anyone ever expected as she leads a town to their future.

Money is the key to learning economics. If the monetary system is well understood, it will clarify seemingly impenetrable economic events. *The History of Money for Understanding Economics* is indeed the indispensable reference to decrypt economics, and it does so in an enthralling way, from antiquity to the present day, with readily accessible language. This book answers questions such as: How did money and banking appear? Why did gold coins vanish after circulating for centuries? What is inflation? What is the IMF? *The History of Money for Understanding Economics* also explains new interpretations of history that have underscored how monetary changes have catalyzed events from the

fall of the Roman Empire to World War II and beyond. Considering such past monetary influences, Lannoye challenges the reader with a monetary innovation to speed up the economy (and finance a green economy).

If the 20th Century was the century of growth, the 21st Century will be the century of declines. This will be due to the imminent collapse of the World's current financial system, which is based on nothing but inter-related debt, along with the effects of climate change, and resource depletion, particularly liquid fossil fuels. These will be in addition to many other sub-crises, now taking place. Suburban Survival: Preparing for Socio-Economic Collapse will show you

how to not only survive, but thrive during a period which is not simply another economic cycle, but very likely the peaking and decline of our current industrialized civilization. The author addresses many popularly held misconceptions within the survivalism movement, as they pertain to long-term food storage, and the "bugging out" concept, while placing emphasis on real-world, contemporary issues, such as debt elimination, physical fitness, mental preparation, etc.

When the 10 largest corporations have more combined economic power than 92% of all countries on Earth combined, the 50 largest financial corporations control wealth equal to 90% of Earth's GDP, the richest 1% of humans have more wealth than 99% of the world combined, and the eight richest humans have more wealth than the bottom 50% of Earth's entire population combined . . . it's safe to say humanity is in trouble. This is the only book you ever need to read to understand exactly what is wrong with our global economy today and how to fix it. Written by International Political Economy expert and former U.S. Government Intelligence operative, Ferris Eanfar. All proceeds go to the nonprofit, nonpartisan AngelPay Foundation.

Survival Preparedness: A Beginners Guide to Survival Prepping What would happen to you and your family if suddenly one day you woke up and realized

there was no electricity or information grid, and that there was no end to the situation in sight? Would you be able to survive? If you have concerns as to how you and your family would be able to survive in situations such as natural disasters, terrorist attacks, or even economic collapse, then **WAIT NO LONGER!** Survival Preparedness is an **ABSOLUTE MUST READ** if you wish to learn how to handle and survive in these emergency situations. Don't think that these things can't happen to you, because every day on the news we hear about everything from wildfires and hurricanes to rampant diseases, terrorist attacks, and wars. Nothing is worse or causes more panic than finding yourself in one of these emergency situations without the proper supplies, survival skills, and without a plan. There are several reasons why thinking about preparing in advance for situations such as a short term emergency or long term crisis can be intimidating and cause for concern. After all, chances are that no one else you know is doing it and you probably don't even know where to begin. It can become an overwhelming task when you consider the large number of supplies you may need and the cost involved in organizing this amount of supplies and equipment. You may also wonder where you are going to store all of these supplies and equipment in a small to average size home. Having a simple plan in place to prepare for disaster before it actually happens is essential. When you are

prepared, you'll be able to sleep much better at night knowing you have a plan of action in place. If you wait until an actual disaster happens, chances are it might be too late to ensure the safety and well being of your family. This is why it is essential to read *Survival Preparedness* and be prepared! *What Makes Survival Preparedness Different?* While other survival books may offer some useful information, they often neglect to tell you exactly what you need to do and how to go about it, so it doesn't seem like such a daunting task. All of this information is provided with *Survival Preparedness*, including a comprehensive prepper list, gear, and supplies. *What Does Survival Preparedness Offer?* *Survival Preparedness* provides readers with a step by step plan to use to prepare for survival in times of crisis. By following everything in the book, you can be sure to have most of what you will need to survive a short term crisis situation or long-term survival situation. Specific instructions are provided as to what items to purchase or collect, how much of it to store, as well as how to store it. *Survival Preparedness Works With Your Timeline* Trying to prepare for long term survival all at once is virtually impossible, which is why *Survival Preparedness* allows readers to tailor their timeline to accommodate their specific needs. By stocking up on all items needed for each month, within one year you will acquire everything you need for a 72 hour emergency kit, as well as a one year supply of

stored food (survival food list) and supplies (survival gear list) required for both shelter and security. Using this guide will allow readers to let go of feelings of panic and stop procrastinating and instead focus on strategy and preparation. Each month will be about working toward specific goals. As you complete these goals, you will feel motivated and develop an attitude of self-reliance so that when you turn on the news and hear about everything that is going on in this world, you'll feel more at peace knowing you have what it takes to survive and keep you and your family safe.

There are plenty of signs that indicate our world is headed towards financial collapse. We have become dependent on paper money that is quickly losing value. What will you do when paper money is completely worthless? Will you be able to feed the family or provide shelter? How will you manage basic problems like finding clean drinking water and obtaining the things you need? These are all problems that you will be confronted with in the aftermath of the stock market crashing or a war that kills the economy. This book will take you by the hand and lead you down the road to prepping for a major economic collapse. You will have to learn a lot of new skills. When grocery store shelves are empty and the malls are closed, you have to find food and make your own clothes. When money isn't good for anything more than starting a fire, you will have to learn how to operate

on a barter system. To use the bartering system, you need to know what to store today that will have high value in a world where paper money is useless. Don't get caught empty handed when the economy tanks. Get started with your prepping today.
