

Economic Development 12th Edition The Pearson Series In Economics

A concise and accessible examination of sustainability in a range of contemporary contexts, from economic development to government policy. The word “sustainability” has been connected to everything from a certain kind of economic development to corporate promises about improved supply sourcing. But despite the apparent ubiquity of the term, the concept of sustainability has come to mean a number of specific things. In this accessible guide to the meanings of sustainability, Kent Portney describes the evolution of the idea and examines its application in a variety of contemporary contexts—from economic growth and consumption to government policy and urban planning. Portney takes as his starting point the 1987 definition by the World Commission on Environment and Development of sustainability as economic development activity that “meets the needs of the present without compromising the ability of future generations to meet their own needs.” At its heart, Portney explains, sustainability focuses on the use and depletion of natural resources. It is not the same as environmental protection or natural resource conservation; it is more about finding some sort of steady state so that the earth can support both human population and economic growth. Portney looks at political opposition to the promotion of sustainability, which usually questions the need for sustainability or calls its costs unacceptable; collective and individual consumption of material goods and resources and to what extent they must be curtailed to achieve sustainability; the role of the private sector, and the co-opting of sustainability by corporations; government policy on sustainability at the international, national, and subnational levels; and how cities could become models for sustainability action.

Pelé—legendary footballer, humanitarian, and subject of the Netflix documentary—explores the sport’s recent history and provides new insights into the game. “I know in my heart that soccer was good to me, and great to the world...I saw, time and again, how the sport improved countless millions of lives, both on and off the field. For me, at least, that’s why soccer matters.” The world’s most popular sport goes by many names—soccer, football, the beautiful game—but fans have always agreed on one thing: The greatest player of all time was Pelé. Before Messi, before Ronaldo, before Beckham, Pelé had a stunning twenty-year career, where he was heralded as an international treasure. His accomplishments on the field proved to be pure magic: an unprecedented three World Cup championships and the all-time scoring record, with 1,283 goals. Since retiring, he has traveled the world as soccer’s global ambassador, relentlessly promoting the positive ways soccer can transform young men and women, struggling communities, even entire nations. Now, for the first time and with unparalleled openness, Pelé shares his most inspiring experiences, heartwarming stories, and hard-won wisdom. This is Pelé’s legacy, his way of passing on everything he’s learned and inspiring a new generation. In *Why Soccer Matters*, Pelé details his ambitious goals for the future of the sport and, by extension, the world.

Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.

The second edition of an innovative undergraduate textbook in Comparative Economic Systems that goes beyond the traditional dichotomies. This second edition of an innovative undergraduate text offers an approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field of Comparative Economic Systems. The traditional way of teaching comparative economics, with its reliance on relatively simple dichotomies (private vs. state, planning vs. market) does not take into consideration the many variants and mixtures of economic systems that exist in the real world. The Rossers' introduction in the first edition of the concept of the "new traditional economy"—the effort by a developing country to embed a modern economic system into a traditional culture, usually religious—presented a new way to look at developing economies. Their innovative examination of Iran and its effort to develop a "revolutionary Islamic economy" as an alternative to market capitalism illustrates the use of this new tool in comparative economics. After a four-chapter theoretical and historical overview, the book focuses on fifteen country studies, organized by economic system. The chapters on advanced market capitalism examine the economies of the United States (a chapter new to this edition) Japan, France, Sweden, and Germany. The chapters examining transition in former socialist economies discuss Russia, the former Soviet Republics, Poland, Hungary, Yugoslavia (including expanded treatment of the most successful transition economy, that of Slovenia), and China. The chapters in the final section of the book discuss "alternative paths" taken by the developing economies of Iran, India (its complex mix of socialism, capitalism, and tradition is examined in a chapter new to this edition), Mexico, and South and North Korea. The book concludes with a look at future trends that will continue to transform the world economy.

Jeffrey D. Sachs is one of the world's most perceptive and original analysts of global development. In this major new work he presents a compelling and practical framework for

how global citizens can use a holistic way forward to address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation, and political-economic injustice: sustainable development. Sachs offers readers, students, activists, environmentalists, and policy makers the tools, metrics, and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire, and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary-general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and clarion call for all who care about our planet and global justice. Visit <http://cup.columbia.edu/extras/supplement/sachs-9780231173148> for additional teaching materials for students and instructors, including chapter summaries, key concepts, problem sets, and slides.

Economic Development Prentice Hall

If you are instructor in a course that uses *Development Economics* and wish to have access to the end-of-chapter problems in *Development Economics*, please e-mail the author at debraj.ray@nyu.edu. For more information, please go to <http://www.econ.nyu.edu/user/debraj>. If you are a student in the course, please do not contact the author. Please request your instructor to do so. The study of development in low-income countries is attracting more attention around the world than ever before. Yet until now there has been no comprehensive text that incorporates the huge strides made in the subject over the past decade. *Development Economics* does precisely that in a clear, rigorous, and elegant fashion. Debraj Ray, one of the most accomplished theorists in development economics today, presents in this book a synthesis of recent and older literature in the field and raises important questions that will help to set the agenda for future research. He covers such vital subjects as theories of economic growth, economic inequality, poverty and undernutrition, population growth, trade policy, and the markets for land, labor, and credit. A common point of view underlies the treatment of these subjects: that much of the development process can be understood by studying factors that impede the efficient and equitable functioning of markets. Diverse topics such as the new growth theory, moral hazard in land contracts, information-based theories of credit markets, and the macroeconomic implications of economic inequality come under this common methodological umbrella. The book takes the position that there is no single cause for economic progress, but that a combination of factors--among them the improvement of physical and human capital, the reduction of inequality, and institutions that enable the background flow of information essential to market performance--consistently favor development. Ray supports his arguments throughout with examples from around the world. The book assumes a knowledge of only introductory economics and explains sophisticated concepts in simple, direct language, keeping the use of mathematics to a minimum. *Development Economics* will be the definitive textbook in this subject for years to come. It will prove useful to researchers by showing intriguing connections among a wide variety of subjects that are rarely discussed together in the same book. And it will be an important resource for policy-makers, who increasingly find themselves dealing with complex issues of growth, inequality, poverty, and social welfare.

Understanding poverty and what to do about it, is perhaps the central concern of all of economics. Yet the lay public almost never gets to hear what leading professional economists have to say about it. This volume brings together twenty-eight essays by some of the world leaders in the field, who were invited to tell the lay reader about the most important things they have learnt from their research that relate to poverty. The essays cover a wide array of topics: the first essay is about how poverty gets measured. The next section is about the causes of poverty and its persistence, and the ideas range from the impact of colonialism and globalization to the problems of "excessive" population growth, corruption and ethnic conflict. The next section is about policy: how should we fight poverty? The essays discuss how to get drug companies to produce more vaccines for the diseases of the poor, what we should and should not expect from micro-credit, what we should do about child labor, how to design welfare policies that work better and a host of other topics. The final section is about where the puzzles lie: what are the most important anomalies, the big gaps in the way economists think about poverty? The essays talk about the puzzling reluctance of Kenyan farmers to fertilizers, the enduring power of social relationships in economic transactions in developing countries and the need to understand where aspirations come from, and much else. Every essay is written with the aim of presenting the latest and the most sophisticated in economics without any recourse to jargon or technical language.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- Updated in its 10th edition, *International Relations* is praised for being the most current and comprehensive introduction to international relations theory as well as security, economic, and global issues. Thoroughly updated to cover world affairs through 2012, this survey text explores relations among states and the influence of transnational actors and events. Applying a broad range of theoretical perspectives to show readers how to analyze current events, *International Relations* offers the best tools for understanding what is happening in the world today.

¿ A principles-level introduction to international economics that is accessible to all majors. This book is also suitable for readers interested in the field of international economics. ¿ International Economics uses a rich array of case studies to illuminate economic institutions and policies as well as recent developments in the global economy—without readers having to rely on a prerequisite knowledge of higher-level math. Further, the book's flexible approach—with self-contained chapters and comprehensive coverage—allows instructors to adapt the text easily to a wide range of syllabi. The sixth edition preserves the organization and coverage of the fifth edition and adds a number of updates and enhancements. All tables and graphs have been updated and every chapter begins with a list of student learning outcomes. Chapter 13, The United States in the World Economy, is heavily revised and refocused towards U.S. international economic relations, including NAFTA, but adds material on other trade agreements, including a new case study on preferential agreements such as the African Growth and Opportunity Act. Available with the award-winning MyEconLab! MyEconLab is a powerful assessment and tutorial system that works hand-in-hand with International Economics. ¿MyEconLab includes comprehensive homework, quiz, test, and tutorial options, where instructors can manage all assessment needs in one program!¿ ¿ Note: If you are purchasing the standalone text (ISBN: 0132948915) or electronic version, MyEconLab does not come automatically packaged with the text. To purchase MyEconLab, please visit: www.myeconlab.com or you can purchase a package of the physical text + MyEconLab by searching the Pearson Higher Education web site. MyEconLab is not a self-paced technology and should only be purchased when required by an instructor.

International Economics and Development: Essays in Honor of Raúl Prebisch provides information pertinent to the developments in the field of international economies as it relates to the problems of the underdeveloped countries. This book provides a brief biography of Professor Raúl Prebisch and his many contributions to international economics. Organized into eight parts encompassing 22 chapters, this book begins with an overview of the influence of Prebisch on Latin American international development policy. This text then examines the problem that has always been of real concern to the U.N. since the creation of the organization, namely, the social and economic development of underdeveloped countries. Other chapters consider the problem of economic development of the countries newly involved in the process of growth. This book discusses as well the relationship between stability conditions of real and monetary models of international trade. The final chapter deals with the characteristics of underdevelopment. This book is a valuable resource for economists.

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

Economic Development Is Not for Amateurs! shows forward-thinking leaders how to transform local, regional, or state economies and supercharge a community's revitalization effort to attract jobs, investment, and residents. Offering practical, real-world solutions, economic development experts Jay Garner and Ross Patten identify the steps that communities of all sizes can implement to create a roadmap for long-term economic success. This step-by-step guide to transform locations explains how to: Provide the certainty, simplicity, and speed necessary to build a strong business climate Sell voters on the investments necessary to attract and retain employers and jobs Create, identify, and reinforce your community's brand Build a resilient economy prepared for business closings, natural catastrophes, and stiff competition Help create irrefutable proof of a skilled workforce that is ready to work as well as a talent pipeline that is ready to fill the jobs of tomorrow Find the inevitable bottlenecks of investment in order to keep your momentum building Chapter titles include: Chapter 1: Effective Leadership = Community Prosperity Chapter 2: No Product, No Project(tm) Chapter 3: Market Regionally, Sell Locally Chapter 4: Is Your Labor Force Work Ready? Chapter 5: Grow Your Garden Chapter 6: Time Kills Deals Chapter 7: It's All About the Brand Chapter 8: Control Your Own Destiny or Someone Else Will Each chapter has a bulleted summary of the key takeaways for quick reference and recall. Whether you are a newly elected or appointed leader wondering where to start or a long-term policymaker looking to model today's best practices, Economic Development Is Not for Amateurs! will show you the way. Bulk order purchasing: eBook: Amazon does not allow the modification of eBook fees. The cost for this book is \$9.99. You can still buy it in bulk as an eBook and then provide a redemption code to selected recipients. When an entity buys multiple copies of a Kindle eBook on Amazon.com, Amazon creates a set of redemption links, one for each copy of the book. You can send these links to any reader who is in the same country where you bought the copies. Recipients can redeem the eBook from desktop or mobile browsers and download the eBook to registered devices. This eBook can only be read through a Kindle or a Kindle app. Any smart device or tablet, e.g. iPhone, iPad, can download the Kindle app and read this book. We use this app on our iPhone and iPad and it works great! Paperback: Amazon will print exactly how many were ordered and will ship to the customer. For paperback orders of 1-25 copies, the cost is \$15.99 per copy plus shipping purchased directly through Amazon. Pricing: For orders of 26-50, \$14.99 per copy, plus shipping & handling. The order will be shipped from the authors and can be signed if desired (by one author). Please contact either author for bulk orders of 26 or more. For orders of 51-100, \$13.99 per copy, plus shipping & handling and can be signed if desired. For orders in excess of 101, \$12.99 per copy, plus shipping & handling and can be signed if desired. Allow 4-6 weeks for delivery. Co-authors Jay Garner or Ross Patten can customize a speaking event and book signing for your group. Contact the authors at garner.patten.partners@gmail.com for more information.

Provides a lucid and novel introduction to macroeconomic issues and introduces an alternative approach of understanding macroeconomics, which is inspired by the works of Adam Smith, David Ricardo, Karl Marx, John Maynard Keynes, and Piero Sraffa. It also presents the reader with a critical account of mainstream marginalist macroeconomics.

A dynamic revision of the most modern development economics textbook.

"This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

Learn to live the message of the Good Samaritan and make a global impact, using the resources already at your disposal. If there were a popularity contest among all the parables of Jesus, the Good Samaritan would probably win. Nobody is against the Good Samaritan because being against the Good Samaritan is like being against Mother Theresa or Oskar Schindler or the firefighters who ran into the World Trade Center. In that same popularity contest, the Shrewd Manager would probably finish last. The Shrewd Manager is lazy, deceitful, and double-crossing. Yet in this alluringly freakish parable, Jesus actually holds up the Shrewd Manager as an example, as he does with the Good Samaritan. This book is about learning to live the message of the Good Samaritan in the context of the globalized world of the twenty-first century. This means learning to love our global neighbor wisely by harnessing the resources at our disposal—our time, talents, opportunities, and money—on behalf of those who are victims of injustice, disease, violence, and poverty. The early disciples were pretty clueless about worldly resources such as time, talent, and money—and unfortunately today we still don't really get it. There are too many kind, well-intentioned twenty-first-century people with indisputably good intentions but whose impact on the needy is hampered by their inability to diagnose problems properly, harness the resources available to them to solve the right problems, and understand cause-and-effect relationships. Shrewd Samaritan will help develop a framework to better love and care for our neighbors in an age of globalization, when the people in our neighborhoods, or at least those in our potential sphere of influence, has expanded dramatically. Increasingly it will become our global neighbor who takes us out of our comfort zone and challenges us with the needs of a broken world.

Gerard Roland's new text, *Development Economics*, is the first undergraduate text to recognize the role of institutions in understanding development and growth. Through a series of chapters devoted to specific sets of institutions, Roland examines the effects of institutions on growth, property rights, market development, and the delivery of public goods and services and focuses. With the most comprehensive and up to date treatment of institutions on development, Roland explores the important questions of why some countries develop faster than others and why some fail while others are successful.

This book addresses nine relevant questions: Will population growth reduce the growth rate of per capita income because it reduces the per capita availability of exhaustible resources? How about for renewable resources? Will population growth aggravate degradation of the natural environment? Does more rapid growth reduce worker output and consumption? Do rapid growth and greater density lead to productivity gains through scale economies and thereby raise per capita income? Will rapid population growth reduce per capita levels of education and health? Will it increase inequality of income distribution? Is it an important source of labor problems and city population absorption? And, finally, do the economic effects of population growth justify government programs to reduce fertility that go beyond the provision of family planning services?

The most comprehensive English-language overview of the modern Chinese economy, covering China's economic development since 1949 and post-1978 reforms—from industrial change and agricultural organization to science and technology.

This manual has been designed and written with the purpose of introducing key concepts and areas of debate around the "creative economy", a valuable development opportunity that Latin America, the Caribbean and the world at large cannot afford to miss. The creative economy, which we call the "Orange Economy" in this book (you'll see why), encompasses the immense wealth of talent, intellectual property, interconnectedness, and, of course, cultural heritage of the Latin American and Caribbean region (and indeed, every region). At the end of this manual, you will have the knowledge base necessary to understand and explain what the Orange Economy is and why it is so important. You will also acquire the analytical tools needed to take better advantage of opportunities across the arts, heritage, media, and creative services.

All the information you need—quick, easy, and ON THE MONEY ECON. Do these letters make you sweat? You're not alone. From college freshmen to PhD students, economics tops the list of panic-inducing classes. But help has arrived. *Economics DeMYSTiFieD* is a curriculum-based, self-teaching guide that makes learning this important business topic easier than ever. Filled with illustrations, plain-English explanations, and real-life examples, it starts with the fundamentals and eases you into the more complicated theories, concepts, and mathematical formulas. When it comes to making this complex topic easy to grasp, *Economics DeMYSTiFieD* corners the market. This fast and easy guide features: Expert overviews of key topics, including supply and demand, macro- and microeconomics, consumer price index, and monetary policy Chapter-ending quizzes and a final exam for charting your progress Math equations you can work out to bolster your comprehension Special-focus chapters on the environment, healthcare, and insurance Simple enough for a beginner, but challenging enough for an advanced student, *Economics DeMYSTiFieD* is your shortcut to mastery of this otherwise perplexing subject.

Analysis of Latin America's economy focusing on development, covering the colonial roots of inequality, boom and bust cycles, labor markets, and fiscal and monetary policy. Latin America is richly endowed with natural resources, fertile land, and vibrant cultures. Yet the region remains much poorer than its neighbors to the north. Most Latin American

countries have not achieved standards of living and stable institutions comparable to those found in developed countries, have experienced repeated boom-bust cycles, and remain heavily reliant on primary commodities. This book studies the historical roots of Latin America's contemporary economic and social development, focusing on poverty and income inequality dating back to colonial times. It addresses today's legacies of the market-friendly reforms that took hold in the 1980s and 1990s by examining successful stabilizations and homemade monetary and fiscal institutional reforms. It offers a detailed analysis of trade and financial liberalization, twenty-first century-growth, and the decline in poverty and income inequality. Finally, the book offers an overall analysis of inclusive growth policies for development—including gender issues and the informal sector—and the challenges that lie ahead for the region, with special attention to pressing demands by the vibrant and vocal middle class, youth unemployment, and indigenous populations. This graduate level text on economic growth surveys neoclassical and more recent growth theories, stressing their empirical implications and the relation of theory to data and evidence. The authors have undertaken a major revision for the long-awaited second edition of this widely used text, the first modern textbook devoted to growth theory. The book has been expanded in many areas and incorporates the latest research. After an introductory discussion of economic growth, the book examines neoclassical growth theories, from Solow-Swan in the 1950s and Cass-Koopmans in the 1960s to more recent refinements; this is followed by a discussion of extensions to the model, with expanded treatment in this edition of heterogeneity of households. The book then turns to endogenous growth theory, discussing, among other topics, models of endogenous technological progress (with an expanded discussion in this edition of the role of outside competition in the growth process), technological diffusion, and an endogenous determination of labor supply and population. The authors then explain the essentials of growth accounting and apply this framework to endogenous growth models. The final chapters cover empirical analysis of regions and empirical evidence on economic growth for a broad panel of countries from 1960 to 2000. The updated treatment of cross-country growth regressions for this edition uses the new Summers-Heston data set on world income distribution compiled through 2000.

This powerhouse best-selling text remains the most comprehensive, up-to-date guide to the music industry. The breadth of coverage that Music Business Handbook and Career Guide, Eleventh Edition offers surpasses any other resource available. Readers new to the music business and seasoned professionals alike will find David Baskerville and Tim Baskerville's handbook an indispensable resource, regardless of their specialty within the music field. This text is ideal for introductory courses such as Introduction to the Music Business, Music and Media, and Music Business Foundations as well as more specialized courses such as the record industry, music careers, artist management, and more. The fully updated Eleventh Edition includes coverage of key topics such as copyright, licensing, songwriting, concert venues, and the entrepreneurial musician. Uniquely, it provides career-planning insights on dozens of job categories in the diverse music industry.

This book examines general Nongovernmental organizations (NGOs) roles and comparative advantages in the broad fight to end global poverty, as well as roles and opportunities specific to particular Millennium Development Goals sectors.

NOTE: You are purchasing a standalone product; MyEconLab does not come packaged with this content. If you would like to purchase both the physical text and MyEconLab search for ISBN-10: 0134004655/ISBN-13: 9780134004655. That package includes ISBN-10: 0133872270/ISBN-13: 9780133872279 and ISBN-10: 0133918181/ISBN-13: 9780133918182. For the two-semester principles of economics course. An intuitive and grounded approach to economics Get students to think like an Economist using the latest policy and data while incorporating global issues. Economics, Twelfth Edition builds on the foundation of the previous edition and retains a thorough and careful presentation of the principles of economics. Economics emphasizes real-world applications, the development of critical thinking skills, diagrams renowned for pedagogy and clarity, and path-breaking technology. Each chapter begins with one of today's key issues, and additional issues appear throughout the chapter to show the real-world applications of the theory being discussed. When the chapter concludes, students "read between the lines" to think critically about a news article relating to the issue, demonstrating how thinking like an economist can bring a clearer perspective to and deeper understanding of today's events. Students will begin to think about issues the way real economists do and learn how to explore difficult policy problems to make more informed decisions in their own economic lives. Also available with MyEconLab MyEconLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts.

The book is orientated towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations and fills a major void in the teaching materials available for this purpose. It has been written for use by first-year economic students at universities throughout Africa, Asia, Latin America and the Middle East.

Deepak Lal outlines and assesses the validity of a set of beliefs about third world economic development that underlies the thinking of many politicians, bureaucrats, journalists, and academics in both developing and developed countries. In this book Deepak Lal outlines and assesses the validity of a set of beliefs about third world economic development that underlies the thinking of many politicians, bureaucrats, journalists, and academics in both developing and developed countries. He describes the various elements of this "Dirigiste Dogma" and shows how it inevitably breeds corruption. According to Lal, only a market-based liberal economic order can solve the age-old problem of structural mass poverty. Its significant institutional bases include transparent financial systems and sufficiently deep financial markets to allow the hedging of foreign currency risk, and either a floating or rigidly fixed exchange rate.

For the two-semester course in Principles of Economics. This package includes MyEconLab . An Introduction to the Functioning of the Economy and the Power and Breadth of Economics Reviewers tell us that Case/Fair/Oster is one of the all-time bestselling Principles of Economics texts because they trust it to be clear, thorough, and complete. Readers of Principles of Economics, Twelfth Edition come away with a basic understanding of how market economies function, an appreciation for the things they do well, and a sense of things they do poorly. With the latest research and added exercises, students begin to learn the art and science of economic thinking and start to look at some policy and even personal decisions in a different way. This package includes MyEconLab, an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts. MyEconLab should only be purchased when required by an instructor. Please be sure you have the correct ISBN and Course ID. Instructors, contact your Pearson representative for more information

Over 800 million people suffer from chronic hunger, and over ten million children die each year from preventable causes. These may seem like overwhelming statistics, but as Stephen Smith shows in this call to arms, global poverty is something that we can and should solve within our lifetimes. Ending Global Poverty explores the various traps that keep people mired in poverty, traps like poor nutrition, illiteracy, lack of access to health care, and others and presents eight keys to escaping these traps. Smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it. For example, celebrities in commercials who encourage viewers to "adopt" a poor child really seem to care, but will sending money to these organizations do the most good? Smith explains how to make an informed decision. Grass-roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies in some of the poorest countries in the world, explaining what they do and what makes them effective.

For courses on economic development A complete, balanced introduction to the theory, issues, and latest research. Economic Development, Twelfth Edition--the leading textbook in this field--provides students with a complete and balanced introduction to the requisite theory, driving policy issues, and latest research. Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies so you can see how theory relates to the problems and prospects of developing countries. Teaching and Learning Experiences This program presents a better teaching and learning experience--for you and your students. Use the text's Hallmark Approach to presenting engaging information: Shaped by the authors' personalities, this approach is backed up with extensive research and travel to provide the best data possible. Teach with strong pedagogy tools: The text reinforces central key concepts by presenting a clear learning path for students. Give students a real-world global perspective: Students are able to gain a unique perspective about world issues from two authors who strive to address different sides to problems.

Why economists' attempts to help poorer countries improve their economic well-being have failed. Since the end of World War II, economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America. Attempted remedies have included providing foreign aid, investing in machines, fostering education, controlling population growth, and making aid loans as well as forgiving those loans on condition of reforms. None of these solutions has delivered as promised. The problem is not the failure of economics, William Easterly argues, but the failure to apply economic principles to practical policy work. In this book Easterly shows how these solutions all violate the basic principle of economics, that people—private individuals and businesses, government officials, even aid donors—respond to incentives. Easterly first discusses the importance of growth. He then analyzes the development solutions that have failed. Finally, he suggests alternative approaches to the problem. Written in an accessible, at times irreverent, style, Easterly's book combines modern growth theory with anecdotes from his fieldwork for the World Bank.

International Economics, 13th Edition provides students with a comprehensive, up-to-date review of the field's essential principles and theory. This comprehensive textbook explains the concepts necessary to understand, evaluate, and address the economic problems and issues the nations of the world are currently facing, and are likely to face in the future. Balancing depth and accessibility, the text helps students identify the real-world relevance of the material through extensive practical applications and examples. The new, thoroughly-updated and expanded edition provides students with a solid knowledgebase in international trade theory and policy, balance of payments, foreign exchange markets and exchange rates, open-economy macroeconomics, and the international monetary system. The text uniquely employs the same graphical and numerical model in chapters that cover the same basic concept, allowing students to recognize the relationship among the different topics without having to start with a new example each time. Clear, straightforward discussions of each key concept and theory are complemented by concrete, accessible, and relatable examples that serve to strengthen student comprehension and retention. Topics include the 'Great Recession,' the increase in trade protectionism, excessive volatility and large misalignments of exchange rates, and the impacts of resource scarcity and climate change to continued growth and sustainable development.

The study of agricultural systems; Systems methodology; Application of a systems approach in practice; Applications of a systems approach to research.
