Now in paperback, the updated and expanded edition: David Graeber's "fresh . . . fascinating . . . thought-provoking . . . and exceedingly timely" (Financial Times) history of debt Here anthropologist David Graeber presents a stunning reversal of conventional wisdom: he shows that before there was money, there was debt. For more than 5,000 years, since the beginnings of the first agrarian empires, humans have used elaborate credit systems to buy and sell goods—that is, long before the invention of coins or cash. It is in this era, Graeber argues, that we also first encounter a society divided into debtors and creditors. Graeber shows that arguments about debt and debt forgiveness have been at the center of political debates from Italy to China, as well as sparking innumerable insurrections. He also brilliantly demonstrates that the language of the ancient works of law and religion (words like "guilt," "sin," and "redemption") derive in large part from ancient debates about debt, and shape even our most basic ideas of right and wrong. We are still fighting these battles today without knowing it.

A candid explanation of how the labor market really works and is central to everything—and why it is not as healthy as we think Relying on unemployment numbers is a dangerous way to gauge how the labor market is doing. Because of a false sense of optimism prior to the COVID-19 shock, the working world was more vulnerable than it should have been. *Not Working* is about how people want full-time work at a decent wage and how the plight of the underemployed contributes to widespread despair, a worsening drug epidemic, and the unchecked rise of right-wing populism. David Blanchflower explains why the economy since the Great Recession is vastly different from what came before, and calls out our leaders for their continued failure to address one of the most unacknowledged social catastrophes of our time. This revelatory and outspoken book is his candid report on how the young and the less skilled are among the worst casualties of underemployment, how immigrants are taking the blame, and how the epidemic of unhappiness and self-destruction will continue to spread unless we deal with it. Especially urgent now, *Not Working* is an essential guide to strengthening the labor market for all when we need it most.
