Educare o rieducare il cane Giunti Editore

"Lays out a plan for parents to enjoy themselves and not be slaves to their children while still offering their kids a warm, nurturing environment." —Publishers Weekly Parents were here first! How did the kids suddenly take control? Sure the world has changed from the days when children were supposed to be seen and not heard but things have gotten a little out of hand. What about some quality time for the grownups? Author Christie Mellor's hilarious, personal, refreshing, and actually quite useful advice delightfully rights the balance between parent and child. In dozens of short, wickedly funny chapters, she skewers today's parental absurdities and reminds us how to make child-rearing a kick. With recipes, helpful hints, and illustrations, this high-spirited book is the only book parents will really need—and enjoy. Includes chapters on: Screaming: Is It Necessary? Bedtime: Is Five-Thirty Too Early? Child Labor: Not Just for the Third World! "Children's Music": Why? . . . and much, much more "Harried mothers who have given over their lives to their adorable little angels, beware: This book is the equivalent of a cocktail in the face . . . The book details the glories of saying no to your children, explains when you've gone too far in childproofing your home, laments our over-reliance on camcorders ('a disease') and suggests that the Tooth Fairy is getting robbed. Best of all, there's a recipe for teaching your tot how to mix a simple martini just the way you like it—with lots of alcohol." —Chicago Sun-Times How did life on earth originate? Did replication or metabolism come first in the history of life? In this book, Freeman Dyson examines these questions and discusses the two main theories that try to explain how naturally occurring chemicals could organize themselves into living creatures. The majority view is that life began with replicating molecules, the precursors of modern genes. The minority belief is that random populations of molecules evolved metabolic activities before exact replication existed. Dyson analyzes both of these theories with reference to recent important discoveries by geologists and chemists. His main aim is to stimulate experiments that could help to decide which theory is correct. This second edition covers the enormous advances that have been made in biology and geology in the past and the impact they have had on our ideas about how life began. It is a clearly-written, fascinating book that will appeal to anyone interested in the origins of life. New York Times Bestseller List "Leonard and Gobi's story represents the power of people working together and the profound depth of feeling possible between a man and his dog."--Publishers Weekly A man, a dog, and the lengths to which love will go to sacrifice for its companion. Finding Gobi is the miraculous tale of Dion Leonard, a seasoned ultramarathon runner who crosses paths with a stray dog while competing in a 155-mile race through the Gobi Desert in China. The lovable pup, who would later earn the name Gobi, proved that what she lacked in size, she more than made up for in heart, as she went step for step with Dion over the Tian Shan Mountains, across massive sand dunes, through yurt villages and the black sands of the Gobi Desert, keeping pace with him for 77 miles. As Dion witnessed the incredible determination and heart of this small animal, he found his own heart undergoing a change as well. Whereas in the past these races were all about winning and being the best, his goal now was to make sure he and Gobi's friendship continued well after the finish line. He found himself letting Gobi sleep in his tent at night, giving her food and water out of his own limited supply, and carrying her across numerous rivers, even when he knew it would mean putting him behind in the race, or worse, prevent him from finishing at all. Although Dion did not cross the finish line first, he felt he had won something even greater – a new outlook on life and a new friend that he planned on bringing home as soon as arrangements were made. However, before he could take her home, Gobi went missing in the sprawling Chinese city where she was being kept. Dion, with the help of strangers and a viral outpouring of assistance on the internet, set out to track her down, and reunite forever with the amazing animal that changed his life and proved to him and the world that miracles are possible.

Counsels dog owners on how to train their pets using positive reinforcement, offering insight into how a dog thinks, feels, and learns to suggest the best approaches to treating behavioral problems.

You've heard of the Horse Whisperer - now meet the woman who uses similar methods to train dogs.

Reverend Graeme Sims's faithful pack follow his every command as if they can read his mind. But their willingness is down to an enlightened training method using his technique of dog whispering, which is based on the idea of treating the dogs as partners, not as servants, and human and dog learning to understand each other. This detailed, step-by-step instruction book shows you how to communicate properly with your dog, including guidelines on: how to choose the right breed of dog for you (or whether you're the right owner for a dog); how and when to use different commands; how to build a bond of trust; how to overcome problems with specific sections on the problem dog, the rescue dog, the nervous dog and the aggressive dog. THE DOG WHISPERER is a definitive guide to effective dog training for dog-owners and dog-lovers everywhere.

Marshall Sahlins centers these essays on islands—Hawaii, Fiji, New Zealand—whose histories have intersected with European history. But he is also concerned with the insular thinking in Western scholarship that creates false dichotomies between past and present, between structure and event, between the individual and society. Sahlins's provocative reflections form a powerful critique of Western history and anthropology.

How reliable are all those stories about the number of Eskimo words for snow? How can lamps, flags, and parrots be libelous? These and many other odd questions are typical topics in this collection of essays that present and occasionally zany, often wry, but always fascinating look at language and the people who study it.

Barking is natural and almost all dogs bark. It is one of the many ways dogs communicate with each other as well as with humans. In this book, author Turid Rugaas, well known for her work on identifying and utilizing canine "calming signals," turns her attention to understanding and managing barking behavior.

Have you heard about the man who lived with a hole in his head? Or the boy raised by his parents as a girl? From the woman with multiple personalities, to the man with no brain, this collection of case studies provides a compelling insight into the human mind. This is a fascinating collection of human stories. Some are well-known case studies that have informed clinical practice, others are relatively unknown. For this edition, Rolls has added recent research findings on each case study plus four brand new cases: the story of Washoe, the ape who could communicate; the much debated case of Holly Ramona and repressed memory; and Kim Peek, the real 'Rainman'. Classic Case Studies in Psychology is for everyone who has ever wondered about the stranger side of life. No prior knowledge of psychology is required, just an open mind. For those who wish to use this book as part of their studies, or who are just keen to learn more, fun multiple choice questions, fascinating further reading, helpful web links, and self-assessment questions are all available free on our website, [www.routledge.com/cw/rolls](http://www.routledge.com/cw/rolls). Prepare to be amazed ...

Is walking your dog a tug-of-war? At last, a simple way to teach your dog to walk on a leash without pulling your arm off!

Norwegian dog trainer, Turid Rugaas, internationally known for her ground-breaking work on canine body language and author of *On Talking Terms with Dogs: Calming Signals*, turns her attention to the common problem of dogs that pull while on a leash. In *My Dog Pulls. What Do I Do?* you will learn Turid's quick and easy method to train any age, size or breed of dog to walk calmly and quietly on a loose leash. Her approach is humane and based on a solid understanding of why dogs pull and how to work with the dog's nature and the environment to overcome the problem. City, town or country walking will become more relaxed, reducing stress for dog and owner. *My Dog Pulls* explains: Why dogs develop pulling problems. Simple steps to retraining even a vigorous puller. How to rehabilitate the puller with clear, helpful photographs. Correct use of leashes, collars and harnesses. What works, what doesn't. Troubleshooting problems that arise in training.

Since its publication in 1962, Carlos Fuentes' novel, *Aura*, remains not merely an object of academic interest but a continuous source of controversy in Mexico. It was the explosive combination of sex and religion that incensed the Ministro de Hacienda, Salvador Abascal, and linked *Aura* to the recent polemical Mexican film *El Crimen del Padre Amaro*. *Aura* is preoccupied with the place and persistence of the sacred in modern Mexico rather than simply the secret abuses of institutional Catholicism. This critical edition of the work is accompanied by an introduction and notes on the text.

A renowned dog trainer gives you the positive training tools you need to share a lifetime of fun, companionship, and respect with your dog. Plus, you'll get: information on the importance of observing, understanding, and reacting appropriately to your dog's body language; instructions on how to phase out the use of a clicker and treats to introduce more advanced training concepts; a diary to track progress; suggestions for treats your dog will respond to; and a glossary of training terms.

In this ground-breaking book, acclaimed sociologist Ann Oakley undertook one of the first serious sociological studies to examine women's work in the home. She interviewed 40 urban housewives and analysed their perceptions of housework, their feelings of monotony and fragmentation, the length of their working week, the importance of standards and routines, and their attitudes to different household tasks. Most women, irrespective of social class, were dissatisfied with housework – an important finding which contrasted with prevailing views. Importantly, too, she showed how the neglect of research on domestic work was linked to the inbuilt sexism of sociology. This classic book challenged the hitherto neglect of housework as a topic worthy of study and paved the way for the sociological study of many more aspects of women's lives.

Mandy and James rescue an orphaned baby deer from the forest - but now they have to keep her alive. Baby Sprite is refusing to feed from a bottle - and without milk she will die. Mandy's quick thinking and Lydia's goats help the fawn get back on her feet.

At Last! A Beginner's Guide to Feline Technology Scratch marks on your furniture. Dead mice on your doorstep. Stray hairs all over your clothes. It's enough to make you cry out, "Why doesn't my cat have an owner's manual?" And now—finally!—she does. Through step-by-step instructions and helpful schematic diagrams, *The Cat Owner's Manual* explores hundreds of frequently asked questions: Which breeds interface best with dogs? How can I maintain a quality exterior finish? And why does my model always drink from the bathtub? Whatever your concerns, you'll find the answers here—courtesy of celebrated veterinarian Dr. David Brunner and acclaimed author Sam Stall. Together, they provide plenty of useful advice for both new and experienced cat owners.

"The Canine population of the United States is about 25 million. Out of this, about 25 million can be classified as neurotic—a conservative estimate. "For the millions of dog-owners seeking a solution to this distressing problem—" Faced with the complications and contradictions of modern society, today's dog becomes a neurotic. At every turn, his prime life forces—the need to eat and sleep—are thwarted. Instinct pushes him towards satisfying this hunger; sleep is necessary to infuse him with sufficient strength to get up and eat several times a day. (The average dog may require about 24 hours rest a day.) But environmental factors prevent him from satisfying these desires. Stephen Baker, in this entertaining and delightfully fresh book, offers new help for the perplexed pooch owner. There are chapters on training, feeding and—most important—dressing a neurotic dog. You'll read about traveling with your pet...and what you can do to eliminate sibling rivalry between dog and your baby. There is a chapter on how to psychoanalyze your dog at home, complete with charts and test batteries. You may not learn a thing, but you'll be vastly amused. Sly and witty drawings, skillfully done by Eric Gurney, serve to complement and clarify the text that will provide every reader (dog lover or not) with a great deal of dog food for thought.

Grazie a questa guida leggera, pratica e divertente, imparerai tutto il necessario sul mondo dei cani. Se sei già esperto, ti divertirai a leggere tanti aneddoti e nozioni curiose ma se sei un neofita, che magari non ha mai avuto un cane, ti si aprirà un nuovo mondo dinnanzi, magico e sorprendente, che potrebbe cambiarti per sempre la vita. Questo manuale, in fondo, è pensato proprio per te che vuoi adottare per la prima volta un cane: hai mille dubbi in testa e hai bisogno dei consigli giusti per non sbagliare. Non preoccuparti, non ti pentirai di leggere questo libro e sono sicuro che lo farai tutto d'un fiato, con il sorriso sulle labbra! Dalla Prefazione di Dario Abate Quella che vedete in copertina è la dolcissima Siria. È con me da quando aveva quattro mesi e mezzo e da allora mi ha cambiato la vita. Non avevo idea di cosa potesse significare adottare un cane, sapevo solo che volevo una maltesina, perché mi piaceva tanto il suo pelo bianco e avevo letto che era un cane da compagnia di piccola taglia tra i più docili e amorevoli. Ricordo perfettamente quella sera. Era il 9 dicembre del 2014 ed era San Siro, da cui il nome Siria. Era con me il mio amico Daniele, ben più esperto di cani, a cui devo moltissimo. Arrivammo all'allevamento e Siria iniziò a saltellare in modo forsennato, sola nel suo box. Diceva: "Prendetemi, prendetemi!". Era l'ultima della sua cucciolata... Io volevo un cucciolo più piccolo, sui due mesi, ma per fortuna il mio amico Daniele mi convinse a prendere Siria, più grandicella e quindi più adatta a me, padroncino neofita.

Ricordo perfettamente quella sera e lo ripeto con emozione. In macchina Siria era lì, emozionata come me ma fu subito amore, dalla prima serata insieme a casa. Devo ammettere che i primi giorni di convivenza sono stati difficili, perché Siria doveva imparare tutto da zero: a non fare i bisognini per terra in casa, a scendere e salire le scale, a seguirmi al passo con il guinzaglio. Non ti nascondo che quei primi giorni mi misero un po' in crisi: essendo la prima volta per me mi sembrava tutto super difficile e mi sentivo scoraggiato. Pensai addirittura di mollare e trovare una soluzione alternativa per Siria ma Daniele mi disse che, se avessi superato quei primi giorni, dopo sarebbe filato tutto liscio come l'olio. E così fu. Devo ammettere di essere stato molto rigido nell'educare la mia Siria. Ecco, il segreto è tutto lì: educare bene il proprio cane. L'educazione del cane, infatti, è uno degli obiettivi di questa guida, perché ci sono tante piccole cose che non tutti sanno ma che sono fondamentali per la vita di un cucciolo. Siria per strada mi segue senza guinzaglio, è bravissima. La maggior parte dei cani, invece, non obbedisce al proprio padrone o lo procede per strada, tirando con tutta la forza possibile il guinzaglio. Questo è sbagliatissimo, perché sin dai primi giorni, il cane deve imparare che deve procedere col padrone "al passo", ossia sempre un po' dietro di lui e mai davanti. Ecco, questo è giusto un piccolo esempio, per farti capire che i primissimi giorni insieme sono quelli fondamentali per educare il cane. Ritornando a Siria, lei è il mio amore e la mia ombra, viviamo in simbiosi. Grazie a lei ho imparato tante cose e sono diventato un uomo migliore. Dai cani, infatti, c'è tanto da imparare e quei luoghi comuni secondo i quali "ai cani manca solo la parola" e "i cani sono migliori degli umani", sono tanto banali quanto veritieri. Anche quando si dice che un cane diventa come un figlio e comunque, parte integrante della famiglia, è verissimo! Almeno per un vero padrone, in un rapporto d'amore vero e sincero tra uomo e cane. Adottando un cane scoprirai anche i loro incredibili super poteri: loro percepiscono le cose prima e sanno percorrere tantissimi chilometri per ritornare a casa, anche se in teoria non conoscono la strada. Come fanno? Beh, tante cose non le sappiamo ancora ma anche i cani a modo loro pensano e ragionano. E poi sognano, proprio come noi! Chi ama un cane sa che loro sono più simili a noi di quanto si possa credere. La mia Siria, quando al mattino mi sveglia, mi lecca, proprio come la sua mamma faceva con lei e questa cosa la trovo di una dolcezza struggente. Ok, non voglio dilungarmi ulteriormente, ma voglio dirti che questo libro è un prontuario di facile consultazione per offrirti tutti gli strumenti necessari per adottare un cane e costruire uno splendido rapporto con lui. L'autrice ti fornirà tutti i consigli del caso su ogni aspetto utile alla vita del tuo cane: dall'alimentazione, all'educazione, ai consigli sanitari. In questa guida, insomma, troverai tutte le info necessarie, utili o necessarie e, sicuramente, qualcosina in più!

Capita a molti di ritrovarsi in casa un cane disubbidiente, ribelle, che non ne vuole sapere di rispettare le regole, rende la vita difficile per la famiglia di cui fa parte e può arrivare perfino a costituire un pericolo per gli estranei, per lo stesso padrone o i suoi familiari. Questo manuale spiega sia come educare bene il cucciolo, sia come correggere i comportamenti indesiderati del cane adulto perché il vostro amico sia equilibrato e felice al vostro fianco.

He deserves a cape and a mask.” —*New York Times*

This edited collection speaks to and expands on existing debates around incarceration. Rather than focusing on the bricks and mortar of institutional spaces, this volume's inventive engagements in 'thinking through carcerality' touch on more elusive concepts of identity, memory and internal – as well as physical – walls and bars. Edited by two human geographers, and positioned within a criminological context, this original collection draws together essays by geographers and criminologists with a keen interest in carceral studies. The authors stretch their disciplinary boundaries; tackling a range of contemporary literatures to engage in new conversations and raising important questions within current debates on incarceration. A highly interdisciplinary project, this edited collection will be of particular interest to scholars of the criminal justice system, social policy, and spatial carceral studies.
