It became obvious to the people of HomeStar that their planet was doomed. the twin suns were on a collision course and the planet was burning up. the rivers were polluted and life would soon be extinct. A mass exodus was their only chance of survival. Helped by god-like beings named Abif, they built gigantic space ships capable of transporting them and their animals to a new planet. Twelve ships carried them on a long journey through the realms of space to the Milky Way Galaxy where it was said they would find a land of milk and honey, suitable for them to colonize. We meet the Pharaoh family and travel with them; seeing how the young ones live aboard the ships and follow their adventures. All seems tranquil on the flagship Egypt but there is a problem as you are about to discover. Underlying this peaceful existence is an undercurrent of jealousy and hatred. There is a blossoming of forbidden love between Eve, a Royal Princess and Adam, a Dark One. Eve's brother, Ra is furious as he is expected to marry Eve and thus carry on the pure Pharaoh Bloodline. At last the ships pass through the heat barrier and land on the Blue Planet. Here they try to forge an existence and using their skills and equipment they endeavour to create the civilisation they enjoyed on HomeStar. the feud boils over again and mayhem ensues when an untimely death leads to civil war. Can they survive? Their fate is in the lap of the gods and unlikely help from a tribe of Earthlings. A story of good versus evil with a helping of adventure and a little romance thrown in. Could these people be our ancestors? Read on and decide for yourself.

The alien influences behind the rise and fall of Egypt's Golden Age • Explains how Akhenaten was the last pharaoh entrusted with the sacred and ancient alien knowledge of stargates, free energy, and antigravity technologies • Reveals how the Brotherhood of the Snake, a secret society of reptilian aliens, sought to destroy Akhenaten and suppress the sacred knowledge of the pharaohs • Explores the original purpose of the pyramids--to transmit energy to expand consciousness--and how they were decommissioned after the Great Flood The sophisticated civilization of ancient Egypt arose seemingly overnight, complete with advanced levels of art, agriculture, astronomy, and physics. Then, with the death of Pharaoh Akhenaten, much of this higher knowledge was lost--or suppressed. But evidence of this former Golden Age, the alien visitors behind its rise, and those behind its decline still exists--some of it in plain sight. Examining the purposefully obscured reign of Akhenaten and Nefertiti, Xavian Haze explains how they represent the last dynasty with access to the sacred knowledge of stargates, free energy, and antigravity technologies, knowledge handed down from an advanced interstellar race in the remote past. He reveals how the reptilian race known as the Shemsu Hor infiltrated the Egyptian priesthood and banking systems and formed the Brotherhood of the Snake--a secret society set on destroying Akhenaten's flourishing kingdom and suppressing the sacred knowledge of the pharaohs. Haze examines the evidence of aliens in ancient Egypt, such as the reptilian beings depicted in the Temple of Hathor and Thutmose III's alien encounter. He shows how Akhenaten and his family are always portrayed with elongated skulls and explores the connection between ancient aliens and Mars, including the Martian materials used in Egyptian monuments. He explains the original purpose of the pyramids--to transmit uplifting energy throughout the planet to help expand consciousness--and explores how they were decommissioned after the Great Flood of prehistory. He reveals how the original builders of the pyramids foresaw humanity's fall from the Golden Age and strategically encoded these magnificent structures to wake humanity from the depths of the Dark Ages.

"The Anchor Yale Bible is a fresh approach to the world's greatest classic. Its object is to make the Bible accessible to the modern reader; its method is to arrive at the meaning of biblical literature through exact translation and extended exposition, and to reconstruct the ancient setting of the biblical story, as well as the circumstances of its transcription and the characteristics of its transcribers ... [It] is a project of international and interfaith scope: Protestant, Catholic, and Jewish scholars from many countries

contribute individual volumes ... [and] is an effort to make available all the significant historical and linguistic knowledge which bears on the interpretation of the biblical record ... [It] is aimed at the general reader with no special formal training in biblical studies, yet it is written with the most exacting standards of scholarship, reflecting the highest technical accomplishment"--Vol. 1, p. [ii].

Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization • Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology • Provides further proof of the connection between the Mayans and ancient Egyptians • Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related--as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, *Before the Pharaohs* offers a compelling new view of humanity's past.

The surprising and compelling story of two rival geniuses in an all-out race to decode one of the world's most famous documents—the Rosetta Stone—and their twenty-year-long battle to solve the mystery of ancient Egypt's hieroglyphs. The Rosetta Stone is one of the most famous objects in the world, attracting millions of visitors to the British museum every year, and yet most people don't really know what it is. Discovered in a pile of rubble in 1799, this slab of stone proved to be the key to unlocking a lost language that baffled scholars for centuries. Carved in ancient Egypt, the Rosetta Stone carried the same message in different languages—in Greek using Greek letters, and in Egyptian using picture-writing called hieroglyphs. Until its discovery, no one in the world knew how to read the hieroglyphs that covered every temple and text and statue in Egypt. Dominating the world for thirty centuries, ancient Egypt was the mightiest empire the world had ever known, yet everything about it—the pyramids, mummies, the Sphinx—was shrouded in mystery. Whoever was able to decipher the Rosetta Stone, and learn how to read hieroglyphs, would solve that mystery and fling open a door that had been locked for two thousand years. Two brilliant rivals set out to win that prize. One was English, the other French, at a time when England and France were enemies and the world's two great superpowers. *The Writing of the Gods* chronicles this high-stakes intellectual race in which the winner would win glory for both himself and his nation. A riveting portrait of empires both ancient and modern, this is an unparalleled look at the culture and history of ancient Egypt and a fascinating, fast-paced story of human folly and discovery unlike any other.

Egypt in the twenty-sixth century BC. The young pharaoh Cheops wants to forgo the construction of a pyramid in his honor, but his court sages hasten to persuade him otherwise. The pyramid, they tell him, is not a tomb but a paradox, designed to appease the masses by oppressing them. It is a symbol of nothing, a useless and infinite project designed to waste the country's wealth and keep security and prosperity, ever the fonts of sedition, constantly at bay. And so the greatest pyramid in the world has ever seen begins to rise. Rumors multiply. A secret police is formed. Conspiracies—real and imagined—swirl around the rising edifice. The most drastic purges follow. By the time the first stone is laid, Cheops's subjects are terrified enough to yield to his most murderous whims. Each time one of the massive stones is hoisted into place, dozens of men are crushed, and there are tens of thousands of stones. . . .

This autobiographical travelogue, written from time to time over the last fifty years, describes the continuous and ever changing journey of life. Here, adequately presented for the first time in English, is the fascinating story of a splendid culture that flourished thirty-five hundred years ago in the empire on the Nile: kings and conquests, gods and heroes, beautiful art, sculpture, poetry, architecture. Significant archeological discoveries are constantly being made in Egypt. In this revision Professor Steele has rewritten whole chapters on the basis of these new finds and offers several new conclusions to age-old problems.

NEW YORK TIMES BESTSELLER • "Magisterial . . . [A] rich portrait of ancient Egypt's complex evolution over the course of three millennia."—Los Angeles Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Publishers Weekly In this landmark volume, one of the world's most renowned Egyptologists tells the epic story of this great civilization, from its birth as the first nation-state to its absorption into the Roman Empire. Drawing upon forty years of archaeological research, award-winning scholar Toby Wilkinson takes us inside a tribal society with a pre-monetary economy and decadent, divine kings who ruled with all-too-recognizable human emotions. Here are the legendary leaders: Akhenaten, the "heretic king," who with his wife Nefertiti brought about a revolution with a bold new religion; Tutankhamun, whose dazzling tomb would remain hidden for three millennia; and eleven pharaohs called Ramesses, the last of whom presided over the militarism, lawlessness, and corruption that caused a political and societal decline. Filled with new information and unique interpretations, *The Rise and Fall of Ancient Egypt* is a riveting and revelatory work of wild drama, bold spectacle, unforgettable characters, and sweeping history. "With a literary flair and a sense for a story well told, Mr. Wilkinson offers a highly readable, factually up-to-date account."—The Wall Street Journal "[Wilkinson] writes with considerable verve. . . . [He] is nimble at conveying the sumptuous pageantry

and cultural sophistication of pharaonic Egypt.”—The New York Times

In this reprint of the revised edition of his well known Harvard dissertation, the author traces the historical development of the oracle against a foreign nation from its origin in the early military traditions of Israel down to its refinement as a form of prophetic speech. Christensen begins with early material related to oracular divination and moves chronologically through Israelite history down to the early sixth century BCE, observing in the process two major transformations of the war oracle.

It is astonishing to think that many great archaeological discoveries occurred in Egypt only by way of accident during the 19th and 20th centuries. Even today accidents still play a vital, frequent and sometimes comical role, with new discoveries happening almost weekly and with many more secrets of the ancient Egyptian civilization still remaining. This book takes readers beyond these discoveries and their associated accidents. This book cannot be considered purely as an Egyptological and archaeological reading or even as dry history pages covering Egypt's modern era of the 19th and 20th centuries. Rather, it is a book that sheds light on the intimate links between the birth of Egyptology after the deciphering of the famous Rosetta Stone and the raging world politics and regional power shifts in Egypt and its surroundings. The book ties together the political storms of colonialism in the first half of the 19th century and the unsettling effect these upheavals had on Egypt during the reign of Mohamed Ali Pasha. In a storytelling style, the book is a journey through time and place. The book takes readers on a guided tour to most of Egypt's well-known monuments that were mainly discovered by simple accident or in which an accident played a major part leading to discovery. In addition, the book leads readers through time exploring ancient Egypt, the days of the pharaohs, ancient gods, rituals and public ceremonial festivals, with old and new stories that shed light on the true value of such discoveries in antiquity and modern day.

This illustrated two-volume history of Egypt, 'derived entirely from the monuments', was first published in an English translation in 1879.

Brugsch brings to bear his wide experience of the archaeological sites together with his linguistic expertise, and deliberately eschews later Greek and Roman accounts of Egypt.

Just so, reflected Smith, had their forefathers sung when, millenniums ago, they dragged that very sarcophagus from the quarries to the Nile, and from the Nile to the tomb whence it reappeared to-day, or when they slid the casing blocks of the pyramids up the great causeway and smooth slope of sand, and laid them in their dizzy resting-places. Only then each line of the immemorial chant of toil ended with an invocation to Amen, now transformed to Allah. The East may change its masters and its gods, but its customs never change, and if to-day Allah wore the feathers of Amen one wonders whether the worshippers would find the difference so very great.

The University Museum excavated at Beth Shan from 1921-1934, when stratigraphical methods were first being developed. For this study the two Late Bronze levels (VII and VIII) have been reevaluated by the careful analysis of field records, photographs, and drawings along with the restudy of all artifacts housed in The University Museum and a selection of objects in the Rockefeller Museum in Jerusalem. The structures of these levels have parallels in New Kingdom Egypt and Late Bronze/Early Iron Age sites of southern Levant and the Sinai. Included are contributions by 13 specialists on specific classes of objects and technologies. University Museum Monograph, 85

Pawns of the Game is a novel written loosely off the old conspiracy theory of the Illuminati utilizing the mystery system of Free Masonry and that of ancient Egypt's religiosity to control contemporary societies massive. The historical, archaeological, and biblical material is real, as are the (gospel) quotations and fragments. Contemporary characters are my own creation, but many of the ancillary characters actually exist merely to lend support for realism sake. However, the portraits I paint of them are fictional—in respect to names, things, places and time. The lead characters in the novel are a secret clique of streetwise men who gained possession of the true knowledge that creates the TRINITY of the Illuminati, Freemasons, and ancient Egypt's star cult religious mystery system—in order to mastermind their own plot to gain economic and political power within society of the city of New York.

A critical transition period in the archaeology and history of Palestine—the Late Bronze Age and Early Iron Age—is described in detail from the perspective of a group of sites in the Baq'ah Valley. A major emphasis is on how scientific techniques, including magnetic location of undisturbed burial deposits and analytical reconstruction of very early industries, can be effectively integrated into an archaeological project. Contrary to traditional views, the evidence supports a relatively peaceful development within a single cultural tradition rather than the intrusion of a new people or segment of the existing population, by invasion, migration, or revolt. "Peoples of the Sea" is, in some sense, the culmination of the series "Ages in Chaos." In this volume the erroneous time shift of classical history reaches its maximum span - 800 years! With carefully documented evidence and indisputable arguments, Velikovsky places Ramses III firmly into the 4th century B.C. thereby solving, once and for all, numerous conundrums that historians had been confronted with in the past. He unveils the surprising identity of the so-called "Peoples of the Sea," clarifies the role of the Philistines and solves the enigma of the Dynasty of Priests. This volume leads Velikovsky's revised chronology up to the time of Alexander where it links-up with the records of classical chronology. In an extensive supplement Velikovsky delves into the fundamental question of how such a dramatic shift in chronology could have come about. Analyzing the main pillars of Egyptian chronology, he points out where the most dramatic mistakes were made and addresses the misunderstanding underlying the "astronomical chronology." In a further supplement he discusses the very interesting conclusions that can be drawn from radiocarbon testing on Egyptian (archeological) finds.

This book examines the interplay between astronomy and dynastic power in the course of ancient Egyptian history, focusing on the fundamental role of astronomy in the creation of the pyramids and the monumental temple and burial complexes. Bringing to bear the analytical tools of archaeoastronomy, a set of techniques and methods that enable modern scholars to better understand the thought, religion and science of early civilizations, Giulio Magli provides in-depth analyses of the pyramid complexes at Giza, Abusir, Saqqara and Dahshur, as well as of the Early Dynastic necropolis at Abydos and the magnificent new Kingdom Theban temples. Using a variety of data retrieved from study of the sky and measurements of the buildings, he reconstructs the visual, symbolic and spiritual world of the ancient Egyptians and thereby establishes an intimate relationship among celestial cycles, topography and architecture. He also shows how they were deployed in the ideology of the pharaoh's power in the course of Egyptian history.
