In this book, native popular musicologists focus on their own popular music cultures from Germany, Austria and Switzerland for the first time: from subcultural to mainstream phenomena; from the 1950s to contemporary acts. Starting with an introduction and two chapters on the histories of German popular music and its study, the volume then concentrates on focused, detailed and yet concise close readings from different perspectives (including particular historical East and West German perspectives), mostly focusing on the music and its protagonists. Moreover, these analyses deal with very original specific genres such as Schlager and Krautrock as well as transcultural genres such as Punk or Hip Hop. There are additional chapters on characteristically German developments within music media, journalism and the music industry. The book will contribute to a better understanding of German, Austrian and Swiss popular music, and will interconnect international and especially Anglo-American studies with German approaches. The book, as a consequence, will show close connections between global and local popular music cultures and diverse traditions of study. "There cannot ever be too many good books about Schoenberg, and so it is a special pleasure to welcome *Constructive Dissonance*, which is far beyond just 'good.' These essays cover a generous range in style and idea. Many of them also are deeply moving, and nothing could be more appropriate for the composer of our century's most fiercely intense music."--Michael Steinberg, author of *The Symphony: A Listener's Guide* "Although much has been written about Schoenberg, no group of essays examines his life and work in such a broad context. Here we find Schoenberg's matrix: the social, cultural, political, and artistic currents that helped shape him, and to which he made his own extraordinary contribution."--Robert P. Morgan, author of *Twentieth-Century Music* "As we approach the turn of this century, it is clear that Arnold Schoenberg must be counted as one of the most important figures in Western art music during the last one hundred years. Schoenberg's influence on art-music culture has not only worked its effects through his music, but also through his thinking and writing about music. This collection makes a fitting tribute to Schoenberg and does an admirable job of presenting the many facets of Schoenberg the composer, music theorist, and thinker. These thought-provoking essays present a broad range of approaches to a rich variety of topics within Schoenberg scholarship, and readers will find both familiar and not-so-familiar issues arising during the course of the volume. *Constructive Dissonance* is certain to become an important book for those interested in

twentieth-century art music and culture, and seminal reading for anyone interested in Arnold Schoenberg and his work."--John Covach, University of North Carolina at Chapel Hill

A weekly review of politics, literature, theology, and art. The unconscious raises relevant problems in the theory of knowledge as regards non-conceptual contents and obscure representations. In the philosophy of mind, it bears on the topic of the unity of consciousness and the notion of the transcendental Self. It is a key-topic of logic with respect to the distinction between determinate-indeterminate judgments and prejudices, and in aesthetics it appears in connection with the problems of reflective judgments and of the genius. Finally, it is a relevant issue also in moral philosophy in defining the irrational aspects of the human being. The purpose of the present volume is to fill a substantial gap in Kant research while offering a comprehensive survey of the topic in different areas of research, such as history of philosophy, philosophy of mind, aesthetics, moral philosophy, and anthropology.

It is undeniable that technology has made a tangible impact on the nature of musical listening. The new media have changed our relationship with music in a myriad of ways, not least because the experience of listening can now be prolonged at will and repeated at any time and in any space. Moreover, among the more striking social phenomena ushered in by the technological revolution, one cannot fail to mention music's current status as a commodity and popular music's unprecedented global reach. In response to these new social and perceptual conditions, the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification. Concentrated listening, the form of musical reception fostered by Western art music, now appears to be but one of the many ways in which audiences respond to organized sound. Cinema, for example, has developed specific ways of combining images and sounds; and, more recently, digital technology has redefined the standard forms of mass communication. Information is aestheticized, and music in turn is incorporated into pre-existing symbolic fields. This volume - the first in the series *Musical Cultures of the Twentieth Century* - offers a wide-ranging exploration of the relations between sound, technology and listening practices, considered from the complementary perspectives of art music and popular music, music theatre and multimedia, composition and

Expands the definition of second-generation literature to include texts written from the point of view of the children of Nazi perpetrators. James and Stumpf first met in Prague in 1882. James soon started corresponding with a "colleague with whose persons and whose ideas alike I feel so warm a sympathy." With this, a lifelong epistolary friendship began. For 28 years until James's death in 1910, Stumpf became James's most important European correspondent. Besides psychological themes of great importance, such as the perception of space and of sound, the letters include commentary upon Stumpf's (Tonpsychologie) and James's main books (The Principles of Psychology, The Varieties of Religious Experience), and many other works. The two friends also exchange views concerning other scholars, religious faith and metaphysical topics. The different perspectives of the American and the German (European) way of living,

This book delivers the first comprehensive study on German modal verbs which summarises and critically reflects the discussion of the last 500 years, checks these findings against large corpus data and is accessible to the English reader. It is shown that non-epistemic modal verbs modify events, whereas their epistemic counterparts modify the proposition, and how the latter developed from the former.

"Drawing on archival research, oral history interviews, and participant observation, this examination of the adoption and adaptation of Mod style across geographic space also maps its various interpretations over time, from the early 1960s to the present. The book traces the Mod youth culture from its genesis in the dimly lit clubs of London's Soho, where it began as a way for young people to reconfigure modernity after the chaos of World War II, to its contemporary, country-specific expressions. By examining Mod culture in the United States, Germany, and Japan alongside the United Kingdom, "We Are the Mods" contrasts the postwar development of Mod in those countries that lost the war with those that won. The book illuminates the culture's fashion, music, iconography, and gender aesthetics, to create a compelling portrait of a transnational subculture." --Book Jacket.

*Sounds of Articulating Identity - Tradition and Transition in the Music of Palau, Micronesia*, provides an overview of historical and contemporary music-making practices and their social contexts in the Republic of Palau. The study identifies and analyzes strands of musical development over the course of, roughly, the last century. Its secondary focus is on the conceptualization of the musical transition in Palauan discourse(s) and its interaction with local identity negotiation. As the ethnomusicological exploration of the Palauan world proceeds, the book demonstrates how a study of the music of a small island nation is capable of transcending

The harmonic language of the late nineteenth-century is studied here as a development of common-practice tonality, taking as a model selected songs by Hugo Wolf. Late nineteenth-century romantic composers employed extended-tonal language in a variety of genres, and a special feature of such tonal expansion was the use of extra musical elements. Hugo Wolf's output, encompassing over 160 miniature masterworks, displays all the necessary characteristics, and makes an ideal subject for studying extensions of tonality. The study is organised to focus on individual techniques of tonal expansion, then to explore the foundations of that technique, and finally, to illustrate the conclusions with particular Wolf songs. Necessarily, Wolf's relationship to Richard Wagner, and to Wagner's revolutionary musical language, forms a part of this study, and so too does the similarity of Wolf's music to that of his contemporaries. The world's largest and longest-running song competition, the Eurovision Song Contest is a significant and extremely popular media event throughout the continent and abroad. The Contest is broadcast live in over 30 countries with over 100 million viewers annually. Established in 1956 as a televised spectacle to unify postwar Western Europe through music, the Contest features singers who represent a participating nation with a new popular song. Viewers vote by phone for their favourite performance, though they cannot vote for their own country's entry. This process alone reveals much about national identities and identifications, as voting patterns expose deep-seated alliances and animosities

among participating countries. Here, an international group of scholars from a variety of disciplines, including musicology, communications, history, sociology, English and German studies, explore how the contest sheds light on issues of European politics, national and European identity, race, gender and sexuality, and the aesthetics of camp. For some countries, participation in Eurovision has been simultaneously an assertion of modernity and a claim to membership in Europe and the West. Eurovision is sometimes regarded as a low-brow camp spectacle of little aesthetic or intellectual value. The essays in this collection often contradict this assumption, demonstrating that the contest has actually been a significant force and forecaster for social, cultural and political transformations in postwar Europe.
