Del cáñamo, o Cannabis sativa, se ha dicho que es el mejor aliado que tiene el hombre en el mundo vegetal. Se ha venerado como fuente de iluminación espiritual y sustento de la vida humana. Hasta hace poco, el asombroso pasado del cáñamo estaba prácticamente olvidado. En un tiempo estuvo en los cimientos de la economía de la civilización y apenas en el siglo XX se volvió ilegal. Pero ha regresado; Europa y Canadá; ya han levantando la prohibición del cultivar cáñamo industrial y lo han introducido al mercado en un asombroso despliegue de productos: desde jeans hasta playeras, bálsamo labial, papel no hecho de árbol, tablas de fibra y aislantes. Con la nueva tecnología, se puede hacer de cáñamo todo lo que se fabrica con petróleo, incluyendo pintura, plásticos y energía de biomasa. En esta guía amplia e ilustrada, Rowan Robinson muestra la historia oculta del cáñamo: examina su rol como primer cultivo de fibra, su papel en el hinduismo y en otras religiones, y su función como catalizador de la revolución cultural de los años 60. Robinson también expone los prejuicios que desencadenó y la histeria que ha venido provocando la marihuana durante los últimos 50 años. Robinson cita los estudios contemporáneos y la sabiduría antigua, y efectúa un amplio análisis de los usos alimenticios y medicinales del cáñamo, y su sorprendente potencial para resolver algunos de los más perturbadores problemas ambientales del mundo, como la erosión y la contaminación del suelo, o la deforestación. El gran libro del cannabis es una guía completa de la planta más extraordinaria del mundo.

The essential book on CBD as medicine This practical, accessible guide to using CBD-dominant cannabis contains a wealth of information for both first-time explorers and experienced patients who want to know more about safely treating a number of health conditions with remarkable results and low to no psychoactivity or negative side effects. CBD (cannabidiol) is a component of cannabis that can provide relief for conditions such as seizures, pain, inflammation, anxiety, depression, arthritis, and a number of other issues. This book offers guidance on various forms of the medicine such as oil infusions, alcohol-based tinctures, capsules, and CO2 concentrated extracts. The information is organized by health condition and also by recommended CBD-rich strains, which do not produce the "high" associated with THC. With dosage suggestions, potential side effects and contraindications, and the pharmacology of the plant, this is an essential guide for both doctors and patients looking for a nontoxic alternative to opiate-based pain medications and other pharmaceuticals. While cannabis has been used for medicinal and recreational purposes for thousands of years, only in the last fifty years have scientists begun to shed light on the chemistry of the plant and its interactions with the human body. Research has led to the discovery of a whole new system in the body, the endocannabinoid system, which plays a role in mediating functions such as appetite, immunity, mood, pain response, and memory. The authors present case studies, interviews with doctors who prescribe cannabidiol products, and the latest research regarding other active phytocannabinoids and terpenoids present in cannabis that are being studied for medical use. They also address the difference between CBD products derived from industrial hemp or in a lab, versus those made from medical marijuana using the whole plant. In addition to offering the most up-to-date and comprehensive information on CBD-dominant cannabis therapy for humans, this book is the first to offer guidance for using the medicine for animals, with suggestions for dosage and delivery and useful forms and strains for common health issues in pets. Finally, the authors take a look at the future of cannabis medicine, charting trends in the legalization movement and suggesting how CBD might be used to fight the opioid epidemic.

Four years ago I was diagnosed with stage three colon cancer that was spreading rapidly through my body (metastasizing). I was told unequivocally by my surgeon that I must have an operation to remove part of my colon or I would surely die. Had I agreed to the operation, I would have had to wear a colostomy bag. I refused. A friend told me about the remarkable healing effects of cannabis oil. Cannabis oil was a new thing to me but rather than have the operation I decided to follow up on my friend's advice. My family doctor who was from Iran did not hesitate to issue a medical cannabis oil license to me. He, too, had heard and seen the miraculous results of cannabis oil treating and curing cancer. I did, however, have a short bout of radiation and chemo, both of which made me very sick. The idea was to reduce the tumor so the operation could commence. It was during this period that I had been made aware of the healing powers of medical cannabis oil. My medical team opposed my every thought as to the use of cannabis oil but my inner voice told me not to heed them. In fact, they laid a good amount of pressure on me to adhere to their wishes but I refused to comply. Within two months my cancer had vanished. That was going on four years ago. I live a normal life without having to use a colostomy bag and attend endless check-ups. In fact, I hope never to have to visit a hospital again. It was all very bad and very, very sad. My book, *Cannabis Oil Cured My Cancer* is my story, a story of helplessness, despondency, grief, sadness, of a life, turned upside down; one that could not escape finality: cemeteries, funeral homes, hospitals--death. It was all very grave, indeed. Eventually, at the hospital, when they told me that my cancer was no more, I walked on cloud seven for weeks. How wonderful it was to be free and healthy once again. In my book, there are links to youtube addresses that will be of great benefit to the sufferer. Also, there is information about a variety of treatments and cures for cancer and other diseases. Here is a list of ailments and diseases that cannabis oil treats and cures: Cancer, Attention Deficit Disorder, Attention Deficit Hyperactivity Disorder, Alcohol addiction, Aids, ALS (Amyotrophic Lateral Sclerosis), Alzheimer's, Anorexia, Antibiotic Resistance, Anxiety, Atherosclerosis, Arthritis, Asthma, Autism, Bipolar, Cancer, Chron's Disease, Digestive Issues, Depression, Diabetes, Dravet Syndrome, Doose Syndrome, Endocrine Disorders, Epilepsy and Seizures, Fibromyoliga, Glaucoma, Heart Disease, Atherosclerosis, Huntington's Disease, Inflammation, Irritable Bowel Syndrome, Kidney Disease, Liver Disease, Metabolic Syndrome, Migraine, Mood Disorders, Motion Sickness, Multiple Sclerosis, Nausea, Neurodegeneration, Chronic Pain, Obesity, Obsessive Mood Disorder, Osteoporosis, Parkinson's Disease, Prion/Mad Cows Disease, PTSD, Rheumatism, Schizophrenia, Sickle Cell Anemia, Skin Conditions, Sleep Disorders, Spinal Cord Injury, Stress, Stroke and TBI. I wish you well in recuperating your health. It is also worthwhile to note that medical cannabis oil can be used even though one might be receiving chemo and radiation. It cannot harm you. It is natural and one of nature's wonder cures. Give it a try! Blessing John Gabriel
