A survival guide with simple illustrated instructions for most any repair needed to have the home functioning again

Race and Employment in America: 2013, First Edition This Bernan Press first edition contains a convenient selection of information from the Census Bureau's Equal Employment Opportunity (EEO) tabulation. Based on the American Community Survey, the EEO tabulation highlights the diversity of the labor force and serves as the primary external benchmark for comparing the race, ethnicity, and sex composition of an organization's internal workforce, and the analogous external labor market, within a specified geography and job category. Essential for any economic development official, EEO specialist, regional planner, urban researcher, or college student, Race and Employment in America answers questions about the direction of the workforce in America by race and the professions that America's races are choosing. Occupations are displayed by individual states and metropolitan areas. Race and Employment in America is one of the most comprehensive printed publications on the civilian labor force by race. Researchers, college students, and data users can easily see the trends of the job market that are affecting the nation today. This edition includes: A complete listing of detailed occupation data for the nation, by race, sex, and Hispanic origin Listings of job categories by race, sex, and Hispanic origin for all states and metropolitan areas Detailed list of the EEO tabulation's occupations, including job descriptions and SOC occupation codes Occupation profiles for each race and Hispanic origin group, showing fifteen occupation groups ranked by the number of workers and the ten most selected detailed occupations of each sex, race, and Hispanic origin group figures showing visual images of the civilian labor force, by race Educational attainment data by race, sex, Hispanic origin, and selected age groups Educational attainment level by race, sex, and Hispanic origin for detailed occupations Race and Employment in America is a valuable addition for all academic and public libraries. Race and Employment in America: 2013 is great companion to Employment, Hours, and Earnings, and the Occupational Outlook Handbook available from Bernan Press. Other Bernan research and reference books include: County and City Extra: Annual Metro, City, and County Data Book The Who, What, and Where of America: Understanding the American Community Survey Places, Towns, and Townships Explains how to decide whether to save newspaper and magazine articles, demonstrates a system for organizing clippings, and suggests ways to maintain a personal or business file

The 1994 High School Transcript Study (HSTS) provides the Department of Education and other policymakers with information about current course offerings and students' course-taking patterns in the nation's secondary schools. One objective was to determine changes in course offering and selection patterns since the previous studies in 1982, 1987, and 1990. Another objective was to compare course-taking patterns to results from the National Assessment of Educational Progress (NAEP), an assessment of educational achievement nationwide. In 1994, transcripts were collected for more than 25,000 students who graduated from high school that year. These students were from 340 schools that participated in the NAEP. Information in this report documents a significant increase since 1982 in the percentage of graduates completing curricula recommended by the National Commission on Excellence in Education. As of 1994, over 25% of high school graduates are completing programs satisfying the Commission's recommendations for college-bound graduates, and nearly one-third are completing the Commission's core curriculum. Chapters 1, 2, and 3 of this report contain highlights of the study results, descriptions of the studies from 1982 through 1994, an introduction to the tables of data, a brief description of subject taxonomy, a discussion of the comparability of samples in the studies, and directions for testing the significance of differences reported in the tables. Appendix A contains tables of study data, and Appendix B lists study codes for each category of data. (Contains 121 tables.) (SLD)
