In Chicago's Ukrainian Village, Nadya Lysenko has built her life on a foundation of secrets. When she was sixteen, Nadya snuck out of her house in Western Ukraine to meet a fortuneteller in the woods. She never expected it to be the last time she would see her family. Decades later, Nadya continues to be haunted by the death of her parents and sisters. The myths and magic of her childhood are still a part of her reality: dreams unite friends across time and space, house spirits misplace keys and glasses, and a fortuneteller's cards predict the future. Nadya's beloved dead insist on being heard through dreams and whispers in the night. They want the truth to come out. Nadya needs to face her past and confront the secrets she buried. Too often the women of history have been silenced, but their stories have power-to reveal, to teach, and to transform. This is one such story.

The inspiration for the film *The Dark Divide* starring David Cross and Debra Messing, one of America's most esteemed natural history writers takes to the hills in search of Bigfoot—and finds the wildness within ourselves. Awarded a Guggenheim Fellowship to investigate the legends of Sasquatch, Yale-trained ecologist Dr. Robert Pyle treks into the unprotected wilderness of the Dark Divide near Mount St. Helens, where he discovers both a giant fossil footprint and recent tracks. On the trail of what he thought was legend, he searches out Indians who tell him of an outcast tribe, the Seeahtiks, who had not fully evolved into humans. A handful of open-minded biologists and anthropologists counter the tabloids Pyle studies, while rogue Forest Service employees and loggers swear of a vast conspiracy to deep-six true stories of unknown, upright hominoid apes among us. He attends Sasquatch Daze, where he meets scientists, hunters, and others who have devoted their lives to the search, only to realize that “these guys don't want to find Bigfoot?they want to be Bigfoot!” Since its original publication, the author's fresh experiences and finds have been added to his original work through an updated chapter. With an evaluation of recent DNA evidence from Bigfoot hair and scat, the study of speech phonemes in the “Sierra Sounds” purported Bigfoot recordings, an examination of the impact of the wildly popular Animal Planet series *Bigfoot Hunters*, the reemergence of the famous Bob Gimlin into the Bigfoot community, and more, *Walking With Bigfoot* keeps every Bigfoot enthusiast's mind wide open to one of the biggest questions in the land and brings Pyle's work on the “legend” of Bigfoot into the new century.

Insightful, beautifully written debut collection.

Today, cytology of body cavity fluids is an integral part of cancer staging. A positive diagnosis indicates a high-stage (III or IV) cancer in a majority of instances. General pathologists and cytotechnologists rely on routine cytomorphologic criteria to help oncologists in their staging of cancer patients. The diagnostic clarity, however, is challenged by many false negatives and occasional false positive results. The former is usually followed by an unnecessary surgical procedure in the case of an under-staged cancer and the latter may prevent treatment of a potentially curable disease due to a falsely up-staged cancer. Effusion Cytology is a practical manual in diagnosis and interpretation of body cavity fluid (BCF) specimens. This highly illustrated volume will provide handy information for the residents, fellows and general pathologists with limited basic knowledge in the area of cytopathology. The book provides a step-by-step guide to evaluation of BCF specimens with the specific goal of identification of malignancies. Use of ancillary techniques such as immunocytochemistry is discussed where appropriate. Special attention is given to the formulation of final cytologic reports of the diagnosis of difficult cases. Features of Effusion Cytology Include: Focus on Cancer Diagnosis: The book seeks to answer the simple question - Does this fluid represent malignancy? Practicality: Offers practical approaches to resolving the numerous daily technical and diagnostic problems encountered in a cytology laboratory dealing with body cavity fluid specimens Use of Limited Panel of Tumor Markers by Immunocytochemistry (ICC): Describes a simple innovative technique for applying ICC to cytologic smears A Practical Guide to Formulate Final Cytologic Reports: The reader will be guided as to how to convey any diagnostic difficulty or issue to the attending physician
