Navidi/Monk, Elementary Statistics was developed around three central themes - Clarity, Quality, and Accuracy. These central themes were born out of extensive market research and feedback from statistics instructors across the country. The authors paid close attention to how material is presented to students, ensuring that the content in the text is very clear, concise, and digestible. High quality exercises, examples and integration of technology are important aspects of an Introductory Statistics text. The authors have provided robust exercise sets that range in difficulty. They have also focused keen attention to ensure that examples provide clear instruction to students. Technology is integrated throughout the text, providing students examples of how to use the TI-83 Plus and TI-84 Plus Graphing Calculators, Microsoft Excel and Minitab. The accuracy of Elementary Statistics was a foundational principle always on the minds of the authors. While this certainly pertains to all aspects of the text, the authors also exhausted energy in ensuring the supplements have been developed to fit cohesively with the text.

Japanese literature and film have frequently been approached using lenses such as language, genre and ideology. Yet, despite a succession of major social traumas that have marked, and in many ways shaped and defined much of modern Japan, Japanese fiction and cinema have

not often been examined psychoanalytically. In this book, David Stahl conducts in-depth readings and interpretations of a set of Japanese novels and film. By introducing the methodology of trauma/PTSD studies, Stahl seeks to provide a better understanding of the insights of Japanese writers and directors into their societies, cultures and histories. In particular, by building on the work of practitioner-theoreticians, such as Pierre Janet and Judith Herman, Stahl analyses a number of key texts, including Kawabata Yasunari's *Sleeping Beauties* (1961), Enchi Fumiko's *Female Masks* (1958) and Imamura Sho- hei's *Vengeance is Mine* (1979). Consequently, through using concepts of social trauma, dissociation, failed mourning, revenge and narrative memory, this book sheds new light on the psychological aftereffects and transgenerational legacies of trauma depicted in Japanese works. *Trauma, Dissociation and Re-enactment in Japanese Literature and Film* will be of interest to students and scholars of Japanese Literature and Cinema, as well as those interested in Japanese History and Trauma Studies.
