For best friends Jake and Nate the question isn't how they ended up in bed together but how they stay there. Aggressive, physical, and brave, Jake Owens is a small town football hero turned big city cop who passes his time with meaningless encounters believing he can't have who he really wants: Nate Richardson, his best friend since before forever. Thoughtful, quiet, and kind, Nate is a brilliant doctor who has always known who he is and has never been able to shake his crush on loyal, courageous, straight Jake. After a passionate night together, Nate realizes Jake isn't as straight as he assumed, but he worries that what they shared was a fluke, a result of too much closeness for too long. For Jake, the question isn't how they ended up in bed together because he has always known that Nate holds his heart, it's how he'll convince Nate that he wants and needs to stay there.

Chop-Monster is a sequential jazz improvisation method by acclaimed jazz pianist and educator Shelly Berg that utilizes a "call-and-response" approach: students listen to a jazz idea, imitate it until it is internalized, and then "try it on their own." In Chop-Monster 1, students will hear and improvise to the Ima7, iimi7, and V7 chords in the key of B-flat, plus a basic blues progression. In Chop-Monster 2 students will hear and improvise to the ii-V-I progression in three keys (concert B-flat, E-flat, F).

THIS study is concerned with the search for a new unity of social knowledge and social inquiry. As such it is addressed to all those who see in the present compartmentalization and specialization of the social sciences the reason for the bewildering proliferation of subject matters, the preoccupation with trivia and the failure to make the maximum use of our knowledge for human welfare. More specifically, I am addressing this book to those who are dealing with "interdisciplinary" problems such as the study of foreign areas, the analysis of sociocultural change, economic development of "backward" economies and the planning and teaching of "integrated" courses in the social sciences. The book suggests an answer to the question, How can our specialized knowledge about man and society be unified? As such the study reflects

the conviction that all scientific knowledge, in order to make the greatest possible contribution to human welfare, must become comprehensive in character. In fact, such knowledge differs from popular and common-sense understanding precisely by the fact that it is systematically formulated and held together in terms of a few unifying conceptual frameworks. Indeed, all scientific understanding is, above all, an effort to simplify by unifying what has long appeared as unrelated and disparate. Those who believe that compartmentalization and specialization are the royal road to success in the social sciences may find this an irritating book.

This is a guide to both the music and the poetry of Schubert's much-loved song cycle, set to poems by the Prussian poet Wilhelm MÜller. Composed in 1823, this work is one of the greatest masterpieces of the song repertoire. The genesis of both the poetry and the music, composed soon after Schubert discovered that he had contracted syphilis, is discussed in the first two chapters. A chapter on the poetry considers MÜller's uneasy relationship to the tenets of Romanticism; the influence of Goethe, folk poems, and medieval poetry on Die schöne MÜllerin; and a reading of each of the poems, which are reproduced in German and in English translation. The final chapter provides commentary on each of the twenty songs in the cycle.

In the spring of 1995, Nate Cartwright has lost everything: his parents are dead, his older brother wants nothing to do with him, and he's been fired from his job as a journalist in Washington DC. With nothing left to lose, he returns to his family's summer cabin outside the small mountain town of Roseland, Oregon to try and find some sense of direction. The cabin should be empty. It's not. Inside is a man named Alex. And with him is an extraordinary little girl who calls herself Artemis Darth Vader. Artemis, who isn't exactly as she appears. Soon it becomes clear that Nate must make a choice: let himself drown in the memories of his past, or

fight for a future he never thought possible. Because the girl is special. And forces are descending upon them who want nothing more than to control her. Includes excerpt of sequel, Fish & Chips.

This study explores the relationship between parent values and the day care experience. It draws upon the day care literature and envelops this literature within the framework of human values. It employs open-ended interviews with both subsidized and non-subsidized day care parents as well as day care directors who have subsidized families in their programs. The book is organized into themes and investigates the issue of subsidizing day and care and how this relates to parental choice. Also explored are the issues of day care as a world of continuity or discontinuity, day care as an enriched or less than enriched world, and the relationship between day care and family life. The views of day care directors are also presented.

Can the full paid-up pansy make things right with the pink-tipped hipster? Alfie Bell is . . . fine. Anna has waited a long time to fall in love and now that she has, she's not going to let her boyfriend Charlie's mother stand in her way. Meredith Granger is frighteningly well-cultured and impossible to impress. So far, Anna hasn't even been allowed to meet her. But when Charlie leaves the country on business for the summer, Anna decides to take matters into her own hands. Reinventing herself from 'one of the boys' in an office full of foul-mouthed sales reps into the perfect, butter-wouldn't-melt daughter-in-law, Anna embraces a whole new life. Garden parties, Sunday tennis, little vintage dresses from Laura Ashley - it seems almost too easy. It's only when she tails Meredith on an Art Explorers' trip to Andalucia that she wonders if things might be rather more difficult, and if she might be a little out of her depth after all . . .

To battle an ancient evil, the greatest weapon each hero will have is each other. Hundreds of years ago, facing defeat, the witch Morgana sent monsters into the future to vanquish a humanity King Arthur wouldn't be able to save. The King might have won the battle, but now, centuries later, a few chosen men will have to fight the war. Merlin always hated being named after some mythological

wizard. His dad had been obsessed with the magic man of King Arthur's Court before his untimely death - a loss that had sent Mel reeling in a downward spiral. He is ill-prepared, to say the least, for the outrageous claims of a proper English knight bent on overcoming evil. Born a commoner, Lancelot was never supposed to be a knight in his own time, never mind now in a modern world he is so woefully untrained to protect. Thrown into a battle centuries in the making, this flawed hero, and a young man too-used to battling monsters of the present day, will have to come together in a last desperate fight to save humanity. Can Mel and Lance defeat the greatest enemy the world has ever known? Or in the midst of fighting evil, will they discover the real threat has always been a shattered heart? And what if the one fight they cannot ever hope to win is with themselves?

The Mannschenn Drive was the gateway to the stars, but it had one unfortunate side effect: Traveling faster than light, mankind reverted to the bestial form of his own legendary nightmare-the lycanthropic horror that the full moon once called forth from the soul's depths, now no longer howling at the moon but soaring far beyond it...

Torie Clarke, renowned and respected in political and business circles as one of the nation's most gifted communicators, offers a complete guide to the new age of transparency. Clarke's message is refreshing and straightforward: No more spin. Always a dubious proposition, spin has become increasingly vulnerable as information sources have proliferated; spin is simply no longer viable. Or put another way, "You can put lipstick on a pig, but it's still a pig." Distilling her twenty-five years of experience and wisdom into eight concise rules, Clarke counsels

that politicians and executives need to tell the truth early, often, and in plain language. Clarke's experience is incomparable: She was the Pentagon's communications chief during the early years of George W. Bush's presidency and, prior to that, a high-ranking adviser to the first President Bush and to Senator John McCain. She illustrates her lessons with riveting behind-the-scenes accounts of some of our country's crucial moments over the last two decades -- for instance, as Assistant Secretary of Defense for Public Affairs under Defense Secretary Donald Rumsfeld, she was at the Pentagon on September 11, 2001, and she recounts her experience that day as Rumsfeld's office strove to inform, instruct, and reassure the public. Clarke shows that a policy of transparency not only protects you, but that you even stand to gain from it -- because once you figure out that you can't put lipstick on a pig, you've actually learned something far more powerful: not to create a pig in the first place. Her lessons for getting your message out include: Tell your own story -- especially if it's bad news -- on your own terms, before someone else tells it on theirs. It will allow you to survive controversy and will also enhance your reputation. It's about one thing. Be ready and able to explain yourself to the proverbial man on the street in a clear, simple sentence or two. Admit your mistakes, because the truth will out. Entertaining, approachable, and full of crucial insight and practical guidance, *Lipstick on a Pig* will be indispensable for business leaders, public figures, and anyone working in media relations. With humor and savvy, Clarke's vision offers truly new opportunities for communications in the Information Age.
