

## Emerys World Of Science Calendar 2016

"When ten-year-old genius Emery Jones accidentally sends Chippy 190 million years back in time, he's not sure he can reverse the process--or if he even wants to. Chippy, his crew of bullies, their teacher, and even Emery's dad don't seem to understand Emery's genius. Will Emery Jones risk traveling to the Triassic Period to rescue a bully like Chippy? You never know what can happen when you have the brains and the technology for bending time"--Page 4 of cover.

Emery's World of Science Calendar (2016)Booktrope Editions

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House".

"An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." —Jedediah Purdy, *New Republic* In his most urgent book to date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), *Half-Earth* argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed—such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others—Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Monthly magazine devoted to topics of general scientific interest.

Emery's World of Science is a beautifully illustrated 2016 wall calendar that features *The Adventures of Emery Jones*, *Boy Science Wonder*, the middle-school genius hero of a children's book series created by MacArthur fellow and National Book Award novelist and cartoonist Charles Johnson (*Middle Passage*, *Dreamer*, *Oxherding Tale*) and his daughter, Elisheba, an artist and poet. This unique calendar highlights the achievements of 30 important black American scientists past and present, male and female based on the research of literary scholar Jim McWilliams. Rich in humor (12 color cartoons) and the biographies of people of color who enriched STEM fields and education, *Emery's World of Science* is the perfect gift for children ages 6-13 and adults as well. Ideal for home or schools.

A look at ancient and modern New Year's customs throughout the world teaches young readers why Nigerian children remain indoors until the old year is over, why Americans celebrate the new year in Times Square, and more.

Includes supplements.

All of human experience flows from bodies that feel, express emotion, and think about what such experiences mean. But is it possible for us, embodied as we are in a particular time and place, to know how people of long ago thought about the body and its experiences? In this groundbreaking book, three leading experts on the Classic Maya (ca. AD 250 to 850) marshal a vast array of evidence from Maya iconography and hieroglyphic writing, as well as archaeological findings, to argue that the Classic Maya developed a coherent approach to the human body that we can recover and understand today. The authors open with a cartography of the Maya body, its parts and their meanings, as depicted in imagery and texts. They go on to explore such issues as how the body was replicated in portraiture; how it experienced the world through ingestion, the senses, and the emotions; how the body experienced war and sacrifice and the pain and sexuality that were intimately bound up in these domains; how words, often heaven-sent, could be embodied; and how bodies could be blurred through spirit possession. From these investigations, the authors convincingly demonstrate that the Maya conceptualized the body in varying roles, as a metaphor of time, as a gendered, sexualized being, in distinct stages of life, as an instrument of honor and dishonor, as a vehicle for communication and consumption, as an exemplification of beauty and ugliness, and as a dancer and song-maker. Their findings open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do, through the body.

Provides a complete listing of the known correspondence of Charles Darwin.

A paradigm-shifting model of parenting children in two homes from an internationally recognized expert. A researcher, therapist, and mediator, Robert Emery, Ph.D., details a new approach to sharing custody with children in two homes. Huge numbers of children are affected by separation, divorce, cohabitation breakups, and childbearing outside of marriage. These children have two homes. But their parents have only one chance to protect their childhood. Building on his 2004 book *The Truth About Children and Divorce* and a strong evidence base, including his own research, Emery explains that a parenting plan that lasts a lifetime is one that grows and changes along with children's—and families'—developing needs. Parents can and should work together to renegotiate schedules to best meet the changing needs of children from infancy through young adult life. Divided into chapters that address the specific needs of children as they grow up, Emery:

- Introduces his Hierarchy of Children's Needs in Divorce
- Provides specific advice for successful parenting, starting with infancy and reaching into emerging adulthood
- Advocates for joint custody but notes that children do not count minutes and neither should parents
- Highlights that there is only one "side" for parents to take in divorce: the children's side

Himself the father of five children, one from his first marriage, Emery brings a rare combination of personal and professional insight and guidance for every parent raising a child in two homes.
