\*Why do seemingly rational, intelligent people commit acts of cruelty and violence? \*What are the root causes of destructive behavior? \*How can we control the emotions that drive these impulses? \*Can we learn to live at peace with ourselves and others? Imagine sitting with the Dalai Lama in his private meeting room with a small group of world-class scientists and philosophers. The talk is lively and fascinating as these leading minds grapple with age-old questions of compelling contemporary urgency. Daniel Goleman, the internationally bestselling author of Emotional Intelligence, provides the illuminating commentary—and reports on the breakthrough research this historic gathering inspired. Destructive Emotions Buddhist philosophy tells us that all personal unhappiness and interpersonal conflict lie in the “three poisons”: craving, anger, and delusion. It also provides antidotes of astonishing psychological sophistication—which are now being confirmed by modern neuroscience. With new high-tech devices, scientists can peer inside the brain centers that calm the inner storms of rage and fear. They also can demonstrate that awareness-training strategies such as meditation strengthen emotional stability—and greatly enhance our positive moods. The distinguished panel members report these recent findings and debate an exhilarating range of other topics: What role do destructive emotions play in human evolution? Are they “hardwired” in our bodies? Are they universal, or does culture determine how we feel? How can we nurture the compassion that is also our birthright? We learn how practices that reduce negativity have also been shown to bolster the immune system. Here, too, is an enlightened proposal for a school-based program of social and emotional learning that can help our children increase self-awareness, manage their anger, and become more empathetic. Throughout, these provocative ideas are brought to life by the play of personalities, by the Dalai Lama’s probing questions, and by his surprising sense of humor. Although there are no easy answers, the dialogues, which are part of a series sponsored by the Mind and Life Institute, chart an ultimately hopeful course. They are sure to spark discussion among educators, religious and political leaders, parents—and all people who seek peace for themselves and the world. The Mind and Life Institute sponsors cross-cultural dialogues that bring together the Dalai Lama and other Buddhist scholars with Western scientists and philosophers. Mind and Life VIII, on which this book is based, took place in Dharamsala, India, in March 2000.

Become Emotionally Smarter with a Practical Approach! Emotional intelligence has been a buzzword in the personal growth industry and in high-level corporate recruitment strategies since 1995, when Daniel Goleman used the term for his book title and topic. As we would say today, his use of it “went viral” immediately, in the world of business and mental health in particular. Often abbreviated as “EQ”, emotional intelligence is the personal ability you have to recognize and label your own emotions and feelings, and to use this information to steer your thinking and behavior in the desired direction. Whether you are looking to climb the career ladder with ease, thrive during social events or simply feel more at peace with yourself, a well-developed EQ is absolutely critical. During the course of this book, we will take a look at the current knowledge surrounding the subject, as well as how you can vastly improve your own emotional intelligence with a series of simple, practical exercises. You will learn about: - How to observe and analyze your emotions at any given moment. - How to connect more easily with people and build strong and lasting relationships. - How your body reacts to your various emotional states. - How to release unwanted and potentially destructive emotions. - “Thought traps” and how to deal with them. - Mindfulness and its role in developing EQ. - How to improve your EQ in everyday environments. - How having a higher emotional intelligence will benefit your life. And more!

Read a little excerpt from this great book "In general terms, Emotional Intelligence (EI) refers to the ability to perceive, control, and evaluate emotions - your own and those of other people. Emotional Intelligence is a relatively new area of study. Its earliest roots can be traced back to Darwin's work on the importance of emotional expression for survival. In the 1900s, the issue of intelligence was discussed mainly in terms of cognitive aspects such as memory and problem-solving, although several influential researchers had begun to recognize the importance of non-cognitive aspects. In 1920, E. L. Thorndike used the term "social intelligence" to describe the skill of understanding and managing other people. The term "Emotional Intelligence" is usually attributed to Wayne Payne's 1985 doctoral thesis, A Study of Emotion: Developing Emotional Intelligence, but mainstream media interest was really only piqued in 1995 after a Time magazine article on Daniel Goleman's bestseller, Emotional Intelligence: Why It Can Matter More Than IQ. Peter Salovey and John D. Mayer have been the leading researchers on emotional intelligence since those days, and they define emotional intelligence as "the subset of social intelligence that involves the ability to monitor one's own and others' feelings and emotions, to discriminate among them and to use this information to guide one's thinking and actions". Currently there are several different models proposed for the definition of EI, and researchers still disagree how the term should be used. Some think emotional intelligence can be learned and then strengthened, while others claim it is something you are born with. This field of study is growing so fast that researchers are constantly amending even their own definitions." Did you like the excerpt? Then what are you waiting for? Order your copy right now!

Books can guide what we do and our lives. Many of us love books while reading them and maybe they will echo with us a few weeks after but 2 years later we can't remember if we have read it or not. And that's a shame. We remember that at that time, the book meant a lot to us. Why is it that 2 years later we have forgotten everything? That's not good. This summary is taken from the most important themes of the original book. Most people don't like books. People just want to know what the book says they have to do. If you trust the source you don't need the arguments. So much of a book is arguing its points, but often you don't need the argument if you trust the source you can just get the point. This summary takes the effort to distill the blahs into themes for the people who are just not going to read the whole book. All this information is in the original book.

Are you in charge of your emotions or are they in charge of you? Most people are slaves - or at least servants - to their emotions, and that doesn't necessarily mean the emotions are always big and overpowering. Even people who show no emotion are not necessarily in charge of that part of themselves. Being able to identify and control emotions, and understanding the emotions of others, are all signs of an emotionally-intelligent person. EQ: The New IQ! The first book on emotional intelligence (EI) written for nurses, this comprehensive resource delivers both the theoretical knowledge and practical skills to improve patient outcomes. Authored by one of the foremost experts in EI and nursing, the text discusses the foundations of EI and shows how EI skills can and should be applied to any practice setting in nursing. Using core concepts of EI and evidence-based research, this publication discusses the implications of EI on key nursing challenges such as burnout, patient safety, staff retention, conflict management, ethical decision-making, quality and safety, and wellness. Emotional Intelligence in Nursing addresses the application of EI skills in various arenas of clinical practice and in advanced practice nursing roles. Each chapter contains one or two case studies featuring a nurse or care team at a crossroads event. Sometimes the clinicians in the case studies use EI skills; sometimes they do not. The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.
