Siddhartha is perhaps the most important and compelling moral allegory our troubled century has produced. Integrating Eastern and Western spiritual traditions with psychoanalysis and philosophy, this strangely simple tale, written with a deep and moving empathy for humanity, has touched the lives of millions since its original publication in 1922.

The John Lennon Encyclopedia is the most comprehensive book about John Lennon ever produced. By best-selling author and Beatles expert Bill Harry, this A-Z guide will tell you everything you ever wanted to know about one of the twentieth century's most talented and enigmatic figures. From his difficult childhood to his early days with the Beatles, and from his groundbreaking solo projects to his work with Yoko Ono, this book reveals in intimate detail the man behind the myth, helping to explain Lennon's enduring status as a popular icon. It contains every track Lennon ever wrote or worked on, every gig he every played, and full biographies of everyone who was involved in his life story. This is the most comprehensive guide ever published to the guiding genius of the world's greatest band. It comes in at almost one thousand pages, and half-a-million words, this is the ultimate celebration of all things Lennon.

The two alphabetically arranged volumes cover all of the major artistic developments in Italy from c.1300 to c.1600, a period that marks the Renaissance of the humanistic spirit of classical antiquity. All three periods of the Renaissance are covered: early, high and late.

In this award-winning novel, Tharoor has masterfully recast the two-thousand-year-old epic, The Mahabharata, with fictional but highly recognizable events and characters from twentieth-century Indian politics. Nothing is sacred in this deliciously irreverent, witty, and deeply intelligent retelling of modern Indian history and the ancient Indian epic The Mahabharata. Alternately outrageous and instructive, hilarious and moving, it is a dazzling tapestry of prose and verse that satirically, but also poignantly, chronicles the struggle for Indian freedom and

independence.

The first history of indigenous photography in the Middle East The birth of photography coincided with the expansion of European imperialism in the Middle East, and some of the medium's earliest images are Orientalist pictures taken by Europeans in such places as Cairo and Jerusalem—photographs that have long shaped and distorted the Western visual imagination of the region. But the Middle East had many of its own photographers, collectors, and patrons. In this book, Stephen Sheehi presents a groundbreaking new account of early photography in the Arab world. The Arab Imago concentrates primarily on studio portraits by Arab and Armenian photographers in the late Ottoman Empire. Examining previously known studios such as Abdullah Frères, Pascal Sébah, Garabed Krikorian, and Khalil Raad, the book also provides the first account of other pioneers such as Georges and Louis Saboungi, the Kova Brothers, Muhammad Sadiq Bey, and Ibrahim Rif'at Pasha—as well as the first detailed look at early photographs of the annual pilgrimage to Mecca. In addition, the book explores indigenous photography manuals and albums, newspapers, scientific journals, and fiction. Featuring extensive previously unpublished images, The Arab Imago shows how native photography played an essential role in the creation of modern Arab societies in Egypt, Palestine, Syria, and Lebanon before the First World War. At the same time, the book overturns Eurocentric and Orientalist understandings of indigenous photography and challenges previous histories of the medium.

The most comprehensive guide to the botany, history, distribution, and cultivation of all known psychoactive plants • Examines 414 psychoactive plants and related substances • Explores how using psychoactive plants in a culturally sanctioned context can produce important insights into the nature of reality • Contains 797 color photographs and 645 black-and-white illustrations In the traditions of every culture, plants have been highly valued for their nourishing, healing, and transformative properties. The most powerful plants--those known to transport the human mind into other dimensions of consciousness--have traditionally been regarded as sacred. In The Encyclopedia of Psychoactive Plants Christian Rätsch details the botany, history, distribution, cultivation, and preparation and dosage of more than 400 psychoactive plants. He discusses their ritual and medicinal usage, cultural artifacts made from these plants, and works of art that either represent or have been inspired by them. The author begins with 168 of the most well-known psychoactives--such as cannabis, datura, and papaver--then presents 133 lesser known substances as well as additional plants known as "legal highs," plants known only from mythological contexts and literature, and plant products that include substances such as ayahuasca, incense, and soma. The text is lavishly illustrated with 797 color photographs--many of which are from the author's extensive fieldwork around the world--showing the people, ceremonies, and art related to the ritual use of the world's sacred psychoactives.
