

English For Academic Study Grammar For Writing By Anne Vicary

This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. English for Research: Usage, Style, and Grammar covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every), word order, prepositions, acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. The book is cross-referenced with the following titles: • English for Academic Research: Grammar Exercises • English for Academic Research: Vocabulary Exercises • English for Academic Research: Writing Exercises • English for Writing Research Papers Adrian Wallwork is the author of more than 30 English Language Teaching (ELT) and English for Academic Purposes (EAP) textbooks. Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student-writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing, they must have the foundations of language in place--the language tools (grammar and vocabulary) they need to build a text. This text offers a compendium of techniques for teaching writing, grammar, and lexis to second-language learners that will help teachers effectively target specific problem areas of students' writing. Based on the findings of current research, including a large-scale study of close to 1,500 non-native speakers' essays, this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students' writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners' language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second-language teachers of writing and second-language writers. Parts II and III include the key elements of classroom teaching: what to teach and why, possible ways to teach the material in the classroom, common errors found in student prose and ways to teach students to avoid them, teaching activities and suggestions, and questions for discussion in a teacher-training course. Appendices to chapters provide supplementary word and phrase lists, collocations, sentence chunks, and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post-secondary EAP students and as a professional resource for teachers of students in EAP courses.

English for Academic Purposes provides a comprehensive overview of the field of English for Academic Purposes (EAP) for teachers. It not only looks at study skills, but also at

other central concerns of EAP, such as needs analysis, syllabus and course design, methodology and materials, learning styles, tests and exams, and academic style and genre analysis. In addition to general EAP, the author also considers subject-specific language and the production of teaching materials. Throughout, the author adopts a user-friendly approach in which theoretical considerations are balanced with practical experience. Issues are discussed and illustrated, but readers are also encouraged to form their own opinions by means of stimulating introspect and discuss sections at the end of each chapter.

The Four Point series is designed for English language learners whose primary goal is to succeed in an academic setting. The series covers the four academic skills of reading, writing, listening, and speaking while providing reinforcement and systematic recycling of key vocabulary and further exposure to grammar issues. In order to participate in academic settings, ELLs need focused activities to develop and then maintain their use of vocabulary and grammar. Each book in the series focuses heavily on vocabulary in particular, highlighting between 125-150 key vocabulary items including individual words, compound words, phrasal verbs, short phrases, idioms, metaphors, collocations, and longer set lexical phrases. Each unit in Reading-Writing Intro, includes two reading passages on the same topic within a field of academic study: Marketing, Architecture, Linguistics, Fine Arts, Legal Studies, and Literature. Each reading is accompanied by a before-reading and after-reading strategy, plus either a during-reading or vocabulary strategy, followed by practice activities. The goal is to provide students with a variety of strategies/tools to master whatever academic texts they may encounter. In addition, exercises have been designed to develop vocabulary, paraphrasing, summarizing, and synthesizing skills. By addressing the breadth and depth of reading and writing tasks required in academic settings instead of only reading for pleasure or writing for research projects, this volume truly prepares students for the variety of reading texts and writing projects they will be assigned in colleges and universities.
