This book aims to present the results of research in the sphere of business language and culture, as well as the experience of pedagogical staff and practitioners concerned with broadly understood business. The highly complex nature of contemporary business environment, approached from both the theoretical and practical standpoint, does not cease to prove that research into business studies cannot be dissociated from the cultural and linguistic context. The chapters included in this book were contributed by academics and practitioners alike, which offers a balanced approach to the topic and ensures high levels of diversity together with an undeniable homogeneity. They were gathered with a view to show various aspects of business language, perceived both as a medium of communication and as a subject of research and teaching. They are concerned with business culture as well, including business ethics and representations of business in popular culture. Owing to its multidisciplinary approach, the book presents a roadmap towards successful functioning in business settings, highlighting such issues as education for business purposes, the study of language used in business contexts, the aspects of cross-cultural communication, as well as ethical behaviour based upon different values in multicultural business environments. Given its multifarious character, the book surely appeals not only to academics, but also to the interested laymen and students who wish to expand their knowledge of business studies and related phenomena.

This book emphasizes ways in which communication skills are used to enhance the learning process in the disciplines. Specifically, it presents experiences and best practices from institutions in various cultures – the United States, India, Egypt, Qatar, United Arab Emirates and Australia. Related pedagogical issues that affect engagement - critical inquiry, creativity and integrity - are given prominence. The title “Sustaining Excellence in Communicating across the Curriculum: Cross-Institutional Experiences and Best Practices,” thus, provides a framework for the variety of practices that foster student empowerment, cultivate ownership of expression, and sustain learning excellence within and across disciplines. Scholars of CAC, teachers concerned with active, engaging pedagogies across the disciplines, and applied linguists will find this anthology particularly appealing. The culture-specific experiences are intriguing, highlighting surprising similarities and differences in the application of CAC theory.

New opportunities in the global workplace have heightened interest in business studies. In response to this trend, this book presents an in-depth analysis of a corpus of authentic business studies lectures, focusing on spoken, academic, disciplinary and professional features (e.g., speech rate, interactive devices, specialized lexis) that are crucial to comprehension, but often problematic for non-native speakers. The investigation adopts an original multi-pronged approach including quantitative, qualitative and comparative analyses. It utilizes techniques drawn mainly from corpus linguistics and discourse analysis, but also integrates observational and ethnographic methods to provide unique extra-linguistic insights. The study is thus a full-circle interpretive account of this dynamic spoken genre where academia and profession converge. The book shows how business studies lectures are characterised by a synergy of discourses and communicative channels that reflect the community of practice, highlighting the need to help international business students develop multiple literacies to overcome present and future challenges.

This text is intended to help students of Russian and graduates considering employment to familiarise themselves with the Russian business environment, its concepts and practices. It assumes at least an A-level knowledge of Russian, but is self-explanatory after that. It will also introduce students to the vocabulary and register of language associated with this field. No prior knowledge of business practice or economic concepts is required: explanations, and in many cases, translations are provided. The return to a market system after a long period of centralised planning of the economy in Russia has revived some of the terminology and ideas current before 1917, but many Western attitudes, concepts and institutions, and much of the vocabulary, have been adopted in the last few years. The aim is to clarify what has emerged in the Russian business environment, and to activate the language associated with this process. It is not a phrase book or business letter-writing handbook. Its scope is the major developments that have underlain the post-perestroika economy, such as privatization, advertising, business organisation, small businesses, the labour market, banking and inflation. Each is covered in a 'Unit' including clear explanations, glossaries, activities and texts taken from Russian business periodicals.

A compilation of research exploring different ways to apply corpus-based and corpus-informed approaches to English language teaching. Completely updated to match the latest syllabuses, this rigorous student book provides comprehensive coverage along with relevant and up-to-date global examples and case studies. Brian Titley's stretching approach is trusted by teachers around the world to build potential for the Cambridge exams, and students future careers. To support achievement and assessment confidence, comprehensive exam practice is included. Includes access to online content with additional exam-questions, exercises, model answers, and revision tips.
