"Beginners is ultimately about more than learning. It's about the possibilities that reside in all of us." --Daniel H. Pink, New York Times best-selling author of *When, Drive, and To Sell is Human* The best-selling author of *Traffic* and *You May Also Like* gives us an inspirational journey into the transformative joys that come with starting something new, no matter your age Why do so many of us stop learning new skills as adults? Are we afraid to fail? Have we forgotten the sheer pleasure of being a beginner? Or is it simply a fact that you can't teach an old dog new tricks? Inspired by his young daughter's insatiable need to know how to do almost everything, and stymied by his own rut of mid-career competence, Tom Vanderbilt begins a year of learning purely for the sake of learning. He tackles five main skills (and picks up a few

more along the way), choosing them for their difficulty to master and their distinct lack of career marketability--chess, singing, surfing, drawing, and juggling. What he doesn't expect is finding himself having rapturous experiences singing Spice Girls songs in an amateur choir, losing games of chess to eight-year-olds, and dodging scorpions at a surf camp in Costa Rica. Along the way, he interviews dozens of experts to explore the fascinating psychology and science behind the benefits of becoming an adult beginner. Weaving comprehensive research and surprising insight gained from his year of learning dangerously, Vanderbilt shows how anyone can begin again--and, more important, why they should take those first awkward steps. Ultimately, he shares how a refreshed sense of curiosity opened him up to a profound happiness and a deeper connection to the people around him--and how small acts of reinvention, at any age, can make life seem magical.

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains:

- Why sometimes letting your mind wander is an important part of the learning process
- How to avoid "rut think" in order to think outside the box
- Why having a poor memory can be a good thing
- The value of metaphors in developing understanding
- A simple, yet powerful, way to stop procrastinating

Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.
