This book brings together leading professional and academic lexicographers to report on current developments in the deployment of electronic means in the planning, writing, and dissemination of dictionaries. Every major aspect of electronic lexicography is covered by the book including dictionary types (general and specialized dictionaries, monolingual and multilingual dictionaries, collocation dictionaries, sign dictionaries, collaborative dictionaries) in a range of formats (CD-ROM, web-based, handheld), dictionary-writing systems, integration of corpora, The book also addresses the implications of electronic dictionary-making for lexicographic theory and illustrates how the new developments are integrated into innovative dictionary projects like Wiktionary. The perspective of the user is considered throughout the book, including how electronic dictionaries take account of user needs and whether and how users take advantages of the new features afforded by the electronic medium. This state-of-the-art account of developments in one of the most vibrant areas of reference publishing and language research will appeal to everyone concerned with current lexicography.

Ferhenga Biruski is the go-to dictionary for Kurmanji a dialect of Kurdish spoken originally in parts of Iran, Iraq, Syria, Turkey while also being common among a large diaspora of Kurds in Europe, North America and elsewhere. This comprehensive Kurmanji-English dictionary is prepared in two volumes by Michael L. Chyet, a renowned linguist with extensive knowledge of the major dialects of Kurdish. This dictionary is an essential reference source for linguists and others interested in Kurdish language and people. "The second edition of my Kurmanji-English dictionary, which I would like to call "Ferhenga Birûskî" to honor the memory of my beloved friend and colleague Birûsk Tugan, contains considerably more entries, and in many cases offers fuller information on earlier entries. In addition, I have found and corrected several typographical errors. Moreover, it is to be accompanied by a companion English to Kurdish volume. [...] It is my goal to accurately reflect the language as it exists today, providing variant spellings, synonyms, and regional usage, as well as etymologies. The late Iranist D.N. MacKenzie advised me early on to avoid filling my dictionary with "ghost words". He suggested that I base all the entries in my dictionary on texts (both written and orally generated), to ensure that I am reflecting the language as it is used by its speakers. The earlier dictionaries include words of unknown provenance, which may have no existence outside those pages." - Excerpt from the Introduction by Michael L. Chyet Preface by Deniz Ekici Introduction to Ferhenga Birûskî Review of Kurdish Dictionaries How to use the dictionary Abbreviations Abbreviations of Sources Used in Compiling this Dictionary Sources for Linguistic Comparison Place of Origin of Informants Calendar Systems Dictionary A to L

Kurdish is spoken in parts of Iraq, Turkey, Iran, Syria, Lebanon, Armenia, Georgia, Kyrgyzstan, Azerbaijan, Kazakistan and Afghanistan. In 2010 an estimated 20-30 million people spoke Kurdish. In Kyrgyzstan, 96.4% of the Kurdish population speak Kurdish as their native language. In Kazakhstan, the corresponding percentage is 88.7%. There are a number of dialects of Kurdish, which are not mutually intelligible. - Northern Kurdish (Kurmanji) is spoken in Turkey, Syria, northern Iraq and northwestern Iran by about 15-20 million people. - Central Kurdish (Sorani) is spoken in Iraq Kurdistan and the Kurdistan Province of Iran by about 6-7 million people. - Southern Kurdish (Pehlewani) is spoken by about 3 million people in Kermanshah and Ilam provinces in northwest Iran, and in the Khanaqin district in eastern Iraq. This dictionary uses the latin script and the Northern Kurdish (urmanji) dialect. We also publish resources for the Sorani dialect. Check our website for availability. Kurdish began to appear in writing in a version of the Persian alphabet during the 7th century AD. However, for much of their history, the Kurds have preferred to use Arabic, Persian or Turkish for their literary works. Since 1932 Kurdish has been written with the Latin alphabet in Turkey and Syria. Before then, it was written with a version of the Arabic script. In parts of the former USSR it is written with a version of the Cyrillic alphabet, and in Soviet Armenia it was written with a version of the Armenian alphabet. When Kurdish is written with the Arabic script, Arabic loan words retain their original spelling, though they are often pronounced quite differently in Kurdish. This dictionary uses the latin script and the Northern Kurdish (Kurmanji) dialect. It contains over 12,000 words in English and Kurmanji with parts of speech and definitions in English with a Kurmanji / English index included. It is excerpted from our Words R Us system which is a derivative of Princeton Wordnet. We also publish a Turkish / Kurdish / English Dictionary and a Kurdish Dictionary in the Sorani script as well as books on Kurdish Grammar. See our website for availability. This dictionary contains 20,000 English (eng) terms paired with Turkish (tur) and Northern Kurdish (kmr). It is extracted from our Words R Us multi-lingual data base which is built on Princeton Wordnet of the English language. Turkish, Arabic, Kurdish, Italian and other language pairs are available, Visit our website at [www.wordsrus.info](http://www.wordsrus.info) for availability of the other volumes. Turkish (ISO 639-3 tur) also referred to as Istanbul Turkish, is the most widely spoken of the Turkic languages, with approximately 10-15 million native speakers in Southeast Europe (mostly in East and Western Thrace) and 60-65 million native speakers in Western Asia (mostly in Anatolia). The Turkic family comprises some 30 living languages spoken across Eastern Europe, Central Asia, and Siberia. About 40% of all speakers of Turkic languages are native Turkish speakers. Outside Turkey, significant smaller groups of speakers exist in Germany, Bulgaria, Macedonia, Northern Cyprus, Greece, the Caucasus, and other parts of Europe and Central Asia. The characteristic features of Turkish, such as vowel harmony, agglutination, and lack of grammatical gender, are universal within the Turkic family. After the foundation of the modern state of Turkey the Turkish Language Association (TDK) was established in 1932 under the patronage of Mustafa Kemal Atatürk, with the aim of conducting research on Turkish. One of the tasks of the newly established association was to initiate a language reform to replace loanwords of Arabic and Persian origin with Turkish equivalents. By banning the usage of imported words in the press, the association succeeded in removing several hundred foreign words from the language. While most of the words introduced by the TDK were newly derived from Turkic roots, it also opted for reviving Old Turkish words which had not

been used for centuries. The past few decades have seen the continuing work of the TDK to coin new Turkish words to express new concepts and technologies as they enter the language, mostly from English. Many of these new words, particularly information technology terms, have received widespread acceptance. However, the TDK is occasionally criticized for coining words which sound contrived and artificial. Many of the words derived by TDK coexist with their older counterparts. Turkey has the 13th largest GDP, well ahead of South Korea, Australia, Canada, and Saudi Arabia. Virtually all the Turkish people are Islamic. Less than 1% of the population is Christian. Kurdish forms three dialect groups known as Northern Kurdish (Kurmanji), Central Kurdish (Sorani), and Southern Kurdish (Pawani). A separate group of non-Kurdish Northwestern Iranian languages, the Zaza-Gorani languages, are also spoken by several million Kurds. Northern Kurdish (Kurmanji) is spoken in Turkey, Syria, northern Iraq and northwestern Iran by about 15-20 million people. Studies as of 2009 estimate between 8 and 20 million native Kurdish speakers in Turkey. The majority of the Kurds speak Northern Kurdish ("Kurmanji"). Before August 2002, the Turkish government placed severe restrictions on the use of Kurdish, prohibiting the language in education and broadcast media. The Kurdish alphabet is not recognized in Turkey, and the use of Kurdish names containing the letters X, W, and Q, which do not exist in the Turkish alphabet, is not allowed. In 2012, Kurdish-language lessons became an elective subject in public schools. Previously, Kurdish education had only been possible in private institutions. Because of war in their homeland, many Kurds have become refugees in Iran, Iraq, Turkey and Germany. Other groups are found elsewhere. The United States currently has a significant population of native Kurdish speakers as does France and the U.K. Virtually all of the Kurdish people are Islamic.

"Based on Sabar's 2002 Jewish Neo-Aramaic dictionary, this dictionary serves a functional purpose for readers and scholars who would like to know the Neo-Aramaic vocabulary. It does not include grammatical or semantic details but does include the origin of the words, be it native Old Aramaic, and, in the case of loanwords, the original lending language, Arabic, Kurdish, Persian, Turkish, etc"--
