control. It describes how English can be taught most effectively, calls for an urgent review of some aspects of the current National Curriculum and its examination arrangements, and – crucially – proposes viable alternatives. This invaluable resource for those working in English, media and drama education has a wide perspective and takes a principled and informed pedagogical approach. Based on a series of much-admired booklets released by the UKLA in 2015, this accessible guide to both theory and practice will be of interest to teachers, student teachers, teacher-educators, advisers and policy-makers in the UK and internationally.

This book constitutes the proceedings of the Second International Conference on Mining Intelligence and Knowledge Exploration, MIKE 2014, held in Cork, Ireland, in December 2014. This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

This book presents important research findings and recent innovations in the field of machine learning and signal processing. A wide range of topics relating to machine learning and signal processing techniques and their applications are addressed in order to provide both researchers and practitioners with a valuable resource documenting the latest advances and trends. The book comprises a careful selection of the papers submitted to the 2015 International Conference on Machine Learning and Signal Processing (MALSIP 2015), which was held on 15–17 December 2015 in Ho Chi Minh City, Vietnam with the aim of offering researchers, academicians, and practitioners an ideal opportunity to disseminate their findings and achievements. All of the included contributions were chosen by expert peer reviewers from across the world on the basis of their interest to the community. In addition to presenting the latest in design, development, and research, the book provides access to numerous new algorithms for machine learning and signal processing for engineering problems.

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and

solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: \*providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and \*presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.

From Testing to Assessment: English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in three major settings: in countries such as Japan and Brazil where

English functions as the language of international commerce; in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government; and in such countries as Canada, the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy implications, which is grounded in literacy theory as well as in practical constraints such as available human and material resources.

This book traces the origins and growth of the nonnative speaker teacher movement in TESOL since its birth a decade ago, summarizes the research that has been conducted, highlights the challenges faced by NNS teachers, and promotes NNS teachers' professional growth.

This book provides a multifaceted, multilayered examination of the processes and challenges language teachers face in constructing their professional identities in multilingual contexts such as Hong Kong. It focuses on how professional and personal identities are enacted as individuals cross geographic, educational, and socio-cultural boundaries to become English language teachers in Hong Kong. It explores the construction of language teachers' professional identities from multiple perspectives in multiple settings, including pre-service and in-service teachers from Hong Kong, Mainland China, and Western countries. Understanding the difficulties and challenges these language teachers face in their identity and professional development is of relevance to teachers and teacher educators, as well as those interested in becoming language teachers in

multilingual contexts.

Documents the development of the Cambridge ESOL Certificates in English Language Skills (CELS), a suite of modular examinations first offered in 2002. As a context for how CELS was conceived, developed, constructed, validated and managed, the book traces the history of exams which have influenced CELS. The Royal Society of Arts (RSA), later UCLES (University of Cambridge Local Examinations Syndicate) Communicative Use of English as a Foreign Language examinations (CUEFL) was one such influence, as were the Certificates in Communication Skills in English (CCSE), these exams being a development of the CUEFL. The University of Oxford Delegacy of Local Examinations (UODLE) examinations, taken over by UCLES in 1995, were a further influence on CELS. UODLE itself had worked in partnership with the Association of Recognised Language Schools (ARELS) Examinations Trust, the Oxford EFL reading and writing exams for many years offered in tandem with the ARELS Oral English exams.
