This book offers a critical analysis of radicalization in Pakistan by deconstructing the global and the official state narratives designed to restrain Pakistani radicalization. Chapters are centered around three distinct themes: educational norms, religious practices and geo-political aspects of radicalization to examine the prevalent state and global practices which propagate Pakistani radicalization discourse. The book argues that there is both a global agenda, which presents Pakistan as the epicenter and sponsor of terrorism, and a domestic, or official, agenda that portrays Pakistan as the state which sacrificed and suffered the most in the recent War on Terror, which allow the country to gain sympathy as a victim. Delineating both conflicting agendas through a critical analysis of global and state practices in order to understand the myths and narratives of radicalization in Pakistan constructed by powerful elites, the book enables readers to gain a better understanding of this phenomenon. A multidisciplinary critical approach to comprehending radicalization in Pakistan with innovative prescriptions for counter-radicalization policy, this book will be of interest to researchers working in the fields of International Relations, Security Studies, Asian Politics, as well as Religious Studies and Education, in particular in the context of South Asia.

Comprehensive student-friendly resources designed for teaching Cambridge International AS and A Level English Language (syllabus 9093 for first examination in 2015). The core aim of this Coursebook is to help students to develop and apply the key skills they need to achieve in AS and A Level English Language. They will build the skills needed for assessment through frequent activities. Divided into two distinct parts for AS and A Level studies, the book covers a wide range of reading skills, such as understanding aspects of style, voice and tone. It also addresses the conventions of key kinds of writing and spoken language, from scripted speeches to travel articles, and looks at how they can capture these conventions in their own work.

From Testing to Assessment: English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in three major settings: in countries such as Japan and Brazil where English functions as the language of international commerce; in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government; and in such countries as Canada, the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy

implications, which is grounded in literacy theory as well as in practical constraints such as available human and material resources.

Concerned with pedagogy and the learning achievement of both girls and boys, this book examines international trends in subject performance throughout schooling and looks critically at a range of interventions in difference contexts and countries, all aimed at enhancing equity in schools and higher education institutions.; The book argues that pedagogy can not be isolated from the overarching gender-education system. What can be done, it claims, is that teachers can be provided with a range of pedagogic strategies which can be used to make education, as it is experienced by students and reflected in their achievements, more just.

Peter, whose main study-aid is sexual pleasure, discards lissom Arabella, one of his two girlfriends. Competitive exams apparently subvert left-wing ideals. He alienates a don, Haggerty. Discoverer of literary 'covert plotting', Peter overlooks real-life covert plots. Part 2: 1969: Examining a campus. Sussex University. Jack, tricked by Haggerty, lectures there. Peter quarrels with radical students. Part 3: 2011: Examining a body. Hospitals in and around London. Peter undergoes intimate examinations. Death makes incursions. Now what use is the study of literature?

The first book to explore the development of Singapore's much-talked-about education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of politics, economy and society. The study

covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore.
