

English Paper 2 June Examination Memorandum

This book explores how a small circle of Cambridge literary critics turned into a movement that revolutionized the way English was taught and brought popular culture into classrooms. The leader, F. R. Leavis, was a well-known and controversial writer. The focus of this book is not on Leavis but on the people who put his ideas into practice.

The English language as spoken in Namibia has virtually been overlooked in most textbooks, handbooks, and surveys of varieties of English around the world, or else has only been mentioned in passing. However, this variety of English has recently attracted the attention of several researchers and the present volume brings together most scholars actively involved in the research on English in Namibia from various linguistic fields to present their current research. It covers a wide range of linguistic issues, such as empirical analyses on various levels of linguistic description and use, as well as the application of diverse methodologies, from questionnaire surveys, sociolinguistic interviews and focus group discussions, to corpus linguistics, linguistic landscaping, and digital ethnography. This book represents the first comprehensive collection of articles and in-depth discussions of this emerging variety of World Englishes.

The Records of Early English Drama volumes make available historical transcripts that provide evidence of early English drama, music, ceremonial, dance, and other forms of communal public entertainment in Britain before 1642, together with the necessary interpretive introductions and notes to explicate the materials for the reader. Shropshire, in two volumes, is the eleventh publication in the series. In the introduction Alan Somerset surveys the social and economic history of each major borough and provides a commentary on the major issues raised in the documents. He discusses travelling performers routes, the places they performed, and the remarkable public exhibitions of high-wire artists, camels, bears, and giants. The records for this county are rich and varied, providing new detail about local playing and festivities. From Shrewsbury for example, comes the complete documentation of a unique, semi-circular outdoor amphitheatre. The documents reveal much - from robbery and riots - to the sometimes acrimonious disputes that show the growing Puritan opposition to sports, which attempted to combat an equally stubborn affection for traditional customs. These records are an invaluable addition to the scholarship of early drama, establishing as they do part of the total context of the great drama of Shakespeare, his predecessors, and his contemporaries.

Mapping Africa in the English Speaking World addresses issues of representations of Africa in the English speaking world. English has become a global language which has turned the world into a global village, and as Graddol (2008) states, it “is now redefining national and individual identities worldwide; shifting political fault lines; creating new global patterns of wealth and social exclusion; and suggesting new notions of human rights and responsibilities of citizenship.” This book grapples with the relationship between Africa and the rest of the English speaking world, and touches on issues of (Euro-American) misrepresentations of the continent in literary works and films, misrepresentations which are nevertheless passed as true and infallible knowledge of Africa, marginalization of Africans, African languages and culture, African scholarship, language policy, language diglossia, African theatre in post colonial Africa, identity negotiations in post colonial Africa, and relations between gender and language, among other issues. These issues are bound to stimulate debates on Africa and its representation(s) in the English speaking world.

This book offers a pivotal re-evaluation of English teaching one century on from The Newbolt Report of 1921, responding to this seminal work and exploring its impact on issues and contemporary aims of English teaching today. Bringing together a range of experts in English higher education, the book provides a twenty-first century inflection on the enduring issues highlighted by Newbolt's original report. It examines topics including the demands of assessment, the narrowing of the literary curriculum, the impact of education reform, targets related to social mobility, class and widening participation, as well as broader questions about the function of literature and the arts in education. Chapters also consider issues surrounding the promotion of community cohesion, diversity and how technological advances might reshape literary education. This unique re-evaluation of the achievements and findings of the New bolt Commission will be essential reading for those researching English education and the history of education.

This publication is a result of the joint conference held by MATSDA and Fontys University of Applied Sciences, the Netherlands, in Tilburg in June 2017. MATSDA is an international materials development association founded in 1993 which serves to bring together researchers, teachers, materials developers and publishers in an effort to improve the effectiveness of language learning materials. The 2017 conference centred on issues related to the development of meaning-focused materials for language learning, and attracted presenters from twenty-five countries stretching from Greenland to Brazil. These issues are reflected in the chapters in this volume, with each one focusing on a different aspect of meaning-focused materials and many of them introducing the reader to previously unexplored facets of the theory of meaning-focused instruction and its application to materials development. The contributions here are of essential value to post-graduate students, to teachers, to materials developers and to researchers. They are written to be academically rigorous, but at the same time accessible to newcomers to the field and to experienced experts alike.
