The fast-paced zouk of Kassav', the romantic biguine of Malavoi, the jazz of Fal Frett, the ballads of Mona, and reggae of Kali and Pôglo are all part of the burgeoning popular music scene in the French Caribbean. In this lively book, Brenda F. Berrian chronicles the rise of this music, which has captivated the minds and bodies of the Francophone world and elsewhere. Based on personal interviews and discussions of song texts, Berrian shows how these musicians express their feelings about current and past events, about themselves, their islands, and the French. Through their lyrical themes, these songs create metaphorical "spaces" that evoke narratives of desire, exile, subversion, and Creole identity and experiences. Berrian opens up these spaces to reveal how the artists not only engage their listeners and effect social change,

but also empower and identify themselves. She also explores the music as it relates to the art of drumming, and to genres such as African American and Latin jazz and reggae. With *Awakening Spaces*, Berrian adds fresh insight into the historical struggles and arts of the French Caribbean.

Fifty years ago, when she was five, Sister Mary Katherine witnessed something terrible . . . A former Seattle policeman now working for the Washington State Attorney's Special Homicide Investigation Team, J.P. Beaumont has been hand-picked to lead the investigation into a half-century-old murder. An eyewitness to the crime, a middle-aged nun, has now recalled grisly, forgotten details while undergoing hypnotherapy. It's a case as cold as the grave, and it's running headlong into another that's tearing at Beau's heart: the vicious slaying of his former partner's ex-wife. What's worse, his rapidly unraveling friend is the prime suspect. Caught in the middle of a lethal conspiracy that spans two generations and a killing that hits too close to home -- targeted by a vengeful adversary and tempted by a potential romance that threatens to reawaken his personal demons -- Beaumont may suddenly have more on his plate than he can handle, and far too much to survive.

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Judith Whitman always believed in the kind of love that "picks you up in Akron and sets you down in Rio." Long ago, she once experienced that love. Willy Blunt was a carpenter with a dry wit and a steadfast sense of honor. Marrying him seemed like a natural thing to promise. But Willy Blunt was not a person you could pick up in Nebraska and transport to Stanford. When Judith left home, she didn't look back. Twenty years later, Judith's marriage is hazy with secrets. In her hand is what may be the phone number for the man who believed she meant it when she said she loved him. If she called, what would he say? *To Be Sung Underwater* is the epic love story of a woman trying to remember, and the man who could not even begin to forget.

York in the 1980s. Dubbed both the 22-Caliber Killer and the Midtown Slasher, Christopher allegedly claimed eighteen victims during a savage four-month spree across the state. The investigation, aided by famed FBI profiler John Douglas, drew national attention and biting criticism from Jesse Jackson and other civil rights leaders. The killer, when at last he was unmasked, seemed an unlikely candidate to have held New York in a grip of terror. His capture was neither the end of the story nor the end of the racial strife, which flared anew during circuitous prosecutions and judicial rulings that prompted cries of a double standard in the justice system. Both a wrenching true crime story and an incisive portrait of dangerously discordant race relations in America, *Absolute Madness* also chronicles a lonely, vulnerable man's tragic descent into madness and the failure of the American mental health system that refused his pleas for help.

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

One of the aims of this book was to focus the attention of specialists to the diversity of the effects of the ionising radiation on biological and physical systems. Special emphasis has been placed on the exquisite complexities/differences introduced by high ionisation density versus low ionisation density irradiation in both biological and physical systems (Scholz – Chapter 1, Horowitz – Chapter 2, Olko – Chapter 3). As well we wanted to point out the need for novel experimental and theoretical approaches required to advance the important fields of micro and nanodosimetry. Important first steps have already been taken, for example, the accelerated application of semiconductor detectors in their various forms to microdosimetry and as well to practical, important applications in the radiation dosimetry of oncological

procedures (Rosenfeld – Chapter 6). The vast number of applications of TLD to radiation dosimetry are not neglected; a special chapter is devoted to the application of TLDs to medical dosimetry applications (Mobit and Kron – Chapter 7) as well as a tutorial approach in an additional chapter to the cavity theories required to extrapolate dose from the detector medium to the tissue medium (Mobit and Sandison - Chapter 5). One of the major features of this book is the intensive, in depth, coverage of the theory and modelling of TL both from the solid state physics point of view (Chen – Chapter 4) and the microdosimetic point of view (Horowitz – Chapter 2 and Olko – Chapter 3). The many puzzling, quaint, quizzical features of TL science can now be understood in the framework of these advanced theoretical models, explained in straightforward, understandable terms. · Quantifies/unifies the effects of ionising radiation in both the biological and physical systems · Authoritative treatment of applications of semiconductor detectors and thermoluminescence dosimeters in medical radiation dosimetry · Basic and advanced aspects of microdosimetry applied to both biological and physical systems · In-depth review of the effects of the density of ionising radiation in tsl and osl · Concise and elegant treatment of cavity theory in medical oncological dosimetry · Comprehensive review of this important interdisciplinary field
