

Entrepreneurial Finance 4th Edition

Entrepreneurial Finance, Fourth Edition: Finance and Business Strategies for the Serious Entrepreneur McGraw-Hill Education

Too often, finance courses stop short of making a connection between textbook finance and the problems of real-world business. "Financial Modeling" bridges this gap between theory and practice by providing a nuts-and-bolts guide to solving common financial problems with spreadsheets. The CD-ROM contains Excel* worksheets and solutions to end-of-chapter exercises. 634 illustrations.

The new edition of this market-leading textbook provides a holistic introduction to the academic study of entrepreneurship and offers practical guidance for prospective entrepreneurs. Adopting a life-cycle view of a business from start-up to maturity, it explores the many stages and forms of entrepreneurship. With an international outlook and expert synthesis of both theoretical foundations and lessons from real-life business practice, the book offers a complete course guide, fostering entrepreneurial talent, thinking and skills. The author's engaging style and unrivalled expertise drawn from a long-ranging career (as an academic, accountant and entrepreneur) make the book accessible and authoritative. This is an ideal textbook for those studying Entrepreneurship or Small Business on undergraduate business or management degree courses, as well as on MBA programmes. It will also appeal to those looking to launch their own businesses. New to this Edition: - Updated international case studies from entrepreneurs and small businesses, ranging from Oman to Australia - First-hand, detailed stories from real-life entrepreneurs in brand new video interviews integrated throughout the text - Increased and integrated coverage of social and civic enterprise and hot topics such as effectuation and lean entrepreneurship

Entrepreneurial Finance: Venture Capital, Deal Structure & Valuation, Second Edition illustrates how the theory and methods of finance and economics can be used to guide strategic decision-making. This text prepares readers for a variety of situations that confront stakeholders in the rapidly evolving fields of entrepreneurial finance and venture capital, outlining ways to think from the investor's and entrepreneur's perspectives. Readers will find a unique and direct focus on value creation as the objective of each strategic and financial choice. The authors specifically address the influences of risk and uncertainty on new venture success and investment performance, devoting substantial attention to methods of financial modeling and contract design. Finally, they provide a comprehensive survey of approaches to new venture valuation, with an emphasis on applications. The second edition is thoroughly revised to reflect new data, research, and changes in practice in this fast-moving field. It has an increased focus on venture capital, while maintaining its hallmark coverage of the financial aspects of entrepreneurship. Updates throughout address technological changes that have the potential to dramatically change the landscape for finance, such as recent innovations in contracting for early-stage ventures, artificial intelligence and machine learning, and Internet connectivity. Lastly, the book offers a companion website with a useful suite of resources for students and instructors alike, including spreadsheets, templates, simulation applications, and interactive cases and tutorials.

Social entrepreneurship is a growing area, and we frequently hear of new ventures committed to social change. In academia, however, social entrepreneurship has typically been taught as a 'version' of entrepreneurship, ignoring the unique structure, challenges and goals of the social venture. In their new book, Coleman and Kariv draw on the latest theory and research to provide boundaries to the definition of social entrepreneurship, discussing both what it is, and what it is not. The book answers several key questions: Who are social entrepreneurs? What is the process for identifying and solving a social need? What are the differences between for-profit and not-for-profit social ventures? What is the role of innovation? How do we develop high performing firms? How do we measure success? The focus on context allows students to appreciate how social entrepreneurship develops and operates in different countries and cultures, lending a global perspective to the book. Combined with rich pedagogy and a companion website, it provides students with all the learning tools they need to grasp this important subject.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Entrepreneurship: Starting and Operating A Small Business, Third Edition, demystifies the process of starting a business by presenting difficult economic, financial and business concepts in a manner easily understood by beginning business students. This edition is based on a proven curriculum from the Network For Teaching Entrepreneurship (NFTE) and includes new case studies, a new Honest Tea Business Plan, and more on topics such as cash flow and e-marketing. Drawing on the experience of Steve Mariotti and Caroline Glackin, students will begin building their business plan as soon as they open the text! In a step by step process students will learn how to start a small business, operate a small business and turn their ideas into viable business opportunities.

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Succeed in your business course with this Workbook for INTERNATIONAL BUSINESS. You will find chapter outlines, graph and map analysis, math exercises, writing activities and many more helpful tools that will deliver the results you are looking for!

Entrepreneurship, 4th Edition delves into the trials and tribulations of entrepreneurship so students will have the necessary tools to start their own businesses. It provides coverage on social enterprises and ethics due to the rise in green trends and corporate scandals. Up-to-date examples and references provide entrepreneurs with the most essential information.

Smith and Smith apply current thinking in the areas of valuation, real options, and the economics of contracts to new venture decision making. Readers learn to think of new ventures as portfolios of real options, value financial claims of the entrepreneur and venture capital investors, and structure financial contracts in light of new venture information problems. They also learn to use simulation and scenario analysis to evaluate the implications of uncertainty and financial decisions. Stresses the importance of strategy in new venture planning. Develops real-world context through relevant examples. Spreadsheet modeling and simulation using custom software provides hands-on learning.

This new edition of Entrepreneurial Financial Management presents an applied, realistic view of finance for today's entrepreneurs. The book provides an integrated set of concepts and applications, drawn from entrepreneurship, finance, and accounting, that will prepare aspiring entrepreneurs for the world they are likely to face as they start their new businesses. The book's contents are designed to follow the life cycle of a new business venture. Topics are covered in the order that entrepreneurs can expect to encounter them as they begin the process of business start-up and move into growing the business. A comprehensive financial spreadsheet template is included with the book. This tool allows for the application of many of the concepts to actual businesses, and can be a valuable supplement to the process of developing a full business plan. The financial spreadsheet templates are available for unlimited free downloads at Professor Cornwall's blog site: www.drjeffcornwall.com. Key Changes in the Third Edition • The authors have added material on how the book's financial templates align with business modeling. • The financial templates have been updated and now include more up-to-date assumptions on benefit costs. • There is updated coverage of debt and equity financing due to new regulations and evolving investor expectations. • The bootstrapping chapter has been revised to reflect the explosion of social media and its impact on bootstrap marketing.

This book undertakes a traditional, and inclusive, approach to the law of business organizations. The volume includes materials many books now on the market omit, such as agency and unincorporated business associations, while at the same time maintaining a wide breadth of coverage. As such, the book permits professors to emphasize closely held and other non-public companies while at the same time offering the basics on public company law and practice. Along these lines, the book includes materials on securities offerings, registration, exemptions from registration, and lawyers' responsibilities under the securities laws. Features that make this book a strong teaching tool and a strong learning tool include: • Chapter introductions that summarize and highlight the overall and contextual importance of chapter contents (rather than merely list and categorize the parts of the chapter); • Basic corporate finance nomenclature and other information necessary to an understanding of transactional business law, including individual chapters on basic corporate finance, corporate changes and change of control transactions; • Materials allowing for a comparison of laws and practices in other countries with those of the United States in key areas of study; and • Well-selected notes and problems that permit the integration of concepts and foster application skills at key junctures. This single text allows for coverage of law, underlying theory and policy, and practice skills. In one volume, the book contains material sufficient to educate a young lawyer to function in general business law practice. The emphasis has been on creating a teaching resource that is comprehensive in the view of the five experienced business law teacher-practitioner authors. This eBook features links to Lexis Advance for further legal research options.

Intended for non-specialist students of accounting and finance taking their first module in the subject, within courses such as business studies and management. This title includes: chapter on working capital management; extends the coverage of corporate governance, auditing and Activity Based Costing; and, more.

The new edition of this highly successful and popular textbook is a comprehensive, easy-to-follow guide to using and interpreting all the quantitative techniques that students will encounter in their later business and financial careers; from fundamental principles through to more advanced applications. Topics are explained in a clear, friendly step-by-step style, accompanied by examples, exercises and activities, making the text ideal for self-tuition or for the student with no experience or confidence in working with numbers. This highly successful learning-by-doing approach, coupled with the book's clear structure, will enable even the most maths-phobic student to understand these essential mathematical skills. Comprehensive in both its scope of coverage and the range of abilities it caters for, this remains a core textbook for undergraduate students of business,

management and finance, for whom Quantitative Methods modules will be a key component. It will also appeal to those on related MBA and postgraduate courses. New to this Edition: - Business Modelling 'Moving on...' feature with integrated web and book activities to promote student engagement with the application of mathematical techniques in real-life workplaces - Extensive revamp of two Statistics chapters based on student and lecturer feedback - Crucial updated practical guides to using Excel and SPSS - Integrated companion website resources helps relate theory to real world examples

The substantially revised fifth edition of a textbook covering the wide range of instruments available in financial markets, with a new emphasis on risk management. Over the last fifty years, an extensive array of instruments for financing, investing, and controlling risk has become available in financial markets, with demand for these innovations driven by the needs of investors and borrowers. The recent financial crisis offered painful lessons on the consequences of ignoring the risks associated with new financial products and strategies. This substantially revised fifth edition of a widely used text covers financial product innovation with a new emphasis on risk management and regulatory reform. Chapters from the previous edition have been updated, and new chapters cover material that reflects recent developments in financial markets. The book begins with an introduction to financial markets, offering a new chapter that provides an overview of risk—including the key elements of financial risk management and the identification and quantification of risk. The book then covers market participants, including a new chapter on collective investment products managed by asset management firms; the basics of cash and derivatives markets, with new coverage of financial derivatives and securitization; theories of risk and return, with a new chapter on return distributions and risk measures; the structure of interest rates and the pricing of debt obligations; equity markets; debt markets, including chapters on money market instruments, municipal securities, and credit sensitive securitized products; and advanced coverage of derivative markets. Each chapter ends with a review of key points and questions based on the material covered.

Entrepreneurial Finance: Concepts and Cases addresses issues that are often overlooked in traditional finance textbooks, namely, how to handle the unique financial challenges faced by start-ups and small businesses. The book is structured around seven modules or building blocks designed to be taught across a full semester with natural break points built into each chapter within the modules. The building blocks present macro-concepts which are explored in greater detail in each of the chapters. A starting chapter provides guidance about the use of cases for students and a concluding chapter delivers information about how to win business plan competitions. Each concept is illustrated by a short case, and followed by thoughtful questions to enhance learning. The cases, previously unpublished, are written by an international group of experienced case writers from the field of finance, and deal with real companies, real problems, and currently unfolding issues. A case teaching manual geared to finance in general, and short cases in particular, is provided for the instructor and includes specific tips, techniques, and activities for each case in the text. Written for upper level undergraduate students of entrepreneurship, this highly accessible book breaks down complex concepts, and includes hands-on cases and exercises, making learning a breeze!

Practical and applications (rather than theory) based, this book focuses on the needs of individuals interested in starting a small business -- primarily those organized as sole proprietorships, partnerships, or small Subchapter S corporations. It emphasizes small businesses exclusively -- with specific examples of the non-corporate market. The book is mathematically accessible to those with limited mathematical background (formulas are explained rather than derived, and only basic math is used in illustrations and solutions). A full case study is referred to throughout narrative and an accompanying CD-ROM includes all tables in Excel format.

Introduction to Finance, 17th Edition offers students a balanced introduction to the three major areas of finance: institutions and markets, investments, and financial management. Updated to incorporate recent economic and financial events, this new edition is an ideal textbook for first courses in finance—reviewing the discipline's essential concepts, principles, and practices in a clear, reader-friendly manner. Students gain an integrated perspective of finance by learning how markets and institutions influence, and are influenced by, individuals, businesses, and governments. Designed to impart financial literacy to readers with no previous background in the subject, the text provides a solid foundation for students to build upon in later courses in financial management, investments, or financial markets. Equations and mathematical concepts are kept to a minimum, and include understandable, step-by-step solutions. Divided into three parts, the book explains financial markets, discusses the functions of financial systems, reviews savings and investments in different sectors, describes accounting concepts and organizational structures, and more. Real-world examples featured throughout the text help students understand important concepts and appreciate the role of finance in various local, national, and global settings.

This second edition of a Choice Outstanding Academic Title improves coverage of the global environments in which entrepreneurs operate. In Global Entrepreneurship: Environment and Strategy, Nir Kshetri explores and illuminates the economic, political, cultural, geographical, and technological environments that affect entrepreneurs as they exploit opportunities and create value in economies around the world. Grounded in theory, the book begins by laying out the concepts, indicators, and measurements that have unique impacts on entrepreneurs in different regions. This framework sets the scene for a close examination of global variations in entrepreneurial ecosystems and finance. Kshetri methodically examines entrepreneurship patterns in diverse economies through the lenses of economic system, political system, culture and religion, and geography (both by country and continent) – and for the first time, includes an entire chapter on entrepreneurship in Latin America. All new for this edition, Global Entrepreneurship offers case studies at the end of each chapter to illustrate relevant concepts, as well as two detailed cases in an appendix, to encourage broader reflection. The book is accompanied by online resources, bringing additional value for instructors and students in entrepreneurship and international business classes.
