Business startup advice from the former president of the Ewing Marion Kaufmann Foundation and cofounder of Global Entrepreneurship Week and StartUp America, this “thoughtful study of ‘how businesses really start, grow, and prosper’...dispels quite a few business myths along the way” (Publishers Weekly). Carl Schramm, the man described by The Economist as “The Evangelist of Entrepreneurship,” has written a myth-busting guide packed with tools and techniques to help you get your big idea off the ground. Schramm believes that entrepreneurship has been misrepresented by the media, business books, university programs, and MBA courses. For example, despite the emphasis on the business plan in most business schools, some of the most successful companies in history—Apple, Microsoft, Google, Facebook, and hundreds of others—achieved success before they ever had a business plan. Burn the Business Plan punctures the myth of the cool, tech-savvy twenty-something entrepreneur with nothing to lose and venture capital to burn. In fact most people who start businesses are juggling careers and mortgages just like you. The average entrepreneur is actually thirty-nine years old, and the success rate of entrepreneurs over forty is five times higher than that of those under age thirty. Entrepreneurs who come out of the corporate world often have discovered a need for a product or service and have valuable contacts to help them get started. Filled with stories of successful entrepreneurs who drew on real-life experience rather than academic coursework, Burn the Business Plan is the guide to starting and running a business that will actually work for the rest of us.

A glimpse into a beloved novelist's inner world, shaped by family, art, and literature. In her fiction, Claire Messud "has specialized in creating unusual female characters with ferocious, imaginative inner lives" (Ruth Franklin, *New York Times Magazine*). *Kant's Little Prussian Head and Other Reasons Why I Write* opens a window on Messud's own life: a peripatetic upbringing; a warm, complicated family; and, throughout it all, her devotion to art and literature. In twenty-six intimate, brilliant, and funny essays, Messud reflects on a childhood move from her Connecticut home to Australia; the complex relationship between her modern Canadian mother and a fiercely single French Catholic aunt; and a trip to Beirut, where her pied-noir father had once lived, while he was dying. She meditates on contemporary classics from Kazuo Ishiguro, Teju Cole, Rachel Cusk, and Valeria Luiselli; examines three facets of Albert Camus and *The Stranger*; and tours her favorite paintings at Boston's Museum of Fine Arts. In the luminous title essay, she explores her drive to write, born of the magic of sharing language and the transformative powers of "a single successful sentence." Together, these essays show the inner workings of a dazzling literary mind. Crafting a vivid portrait of a life in celebration of the power of literature, Messud proves once again "an absolute master storyteller" (Rebecca Carroll, *Los Angeles Times*).

Written by a highly regarded expert on entrepreneurship, this bestselling textbook provides an engaging and comprehensive overview of corporate entrepreneurship. Now in its fourth edition and fully revised throughout, this accessible text is structured in four key parts that cover everything a student needs to know about the topic. After an initial consideration of what constitutes corporate entrepreneurship and innovation, the author then guides students through the four pillars of entrepreneurial architecture: culture, structure, leadership and strategy. The third section focusses on the entrepreneurial mind-set, including how to encourage creativity, business ideas and developing concepts. Finally, the book draws attention to corporate venturing, examining venture teams, intrapreneurs, market development and the role of shareholder value. It is no longer sufficient for businesses to grow simply by cutting costs and taking over competitors. To achieve true success, organisations must avoid an ageing product or service portfolio to bring new, innovative ideas to market. Corporate entrepreneurship is inherently risky and therefore requires a fresh approach to strategy. The approach Paul Burns offers will successfully overcome barriers to launching new ideas, internal challenges of managing creativity and show how to foster an entrepreneurial culture. This is the go-to textbook for all students studying Corporate Entrepreneurship, Intrapreneurship or Corporate Venturing at undergraduate, postgraduate or MBA level. The book is also essential reading for courses on Strategic Entrepreneurship and Innovation. New to this Edition: - Fully revised and updated content throughout with new four-part structure - Brand new case studies in every chapter, featuring some of the world's highest profile companies from across the globe - A greater focus on innovation, including a new chapter on this topic at the start of the book - New chapters on 'Developing a Business Model', 'Managing Change' and 'Managing Risk' - New on-page glossary with key terms highlighted in the text and defined in the margins - New Activities and Group Discussion topics at the end of each chapter

Ideal for students at any level, the chapters of this book invite you to ponder upon your reading through a series of 'reflective practice' activities. These, along with case studies, clearly defined chapter objectives, reflections, role-play activities and experiential exercises, allow you to both think actively about themes, concepts and issues and then apply them to a number of suggested scenarios. Perfect preparation for the up-and-coming entrepreneur!

Entrepreneurial Small Business (ESB) provides students with a clear vision of small business as it really is today. It focuses on the distinctive nature of small businesses that students might actually start versus high growth firms. The goal of the companies described in this textbook is personal independence with financial security; not market dominance with extreme wealth.

Traditional beliefs and models in small business are discussed, as well as the latest findings and best practices from academic and consulting arenas. Katz and Green recognize the distinction between entrepreneurs who aim to start the successor to Amazon.com and the pizza place around the corner. They discuss the challenges facing entrepreneurs, while keeping focused on the small businesses students plan to start.

Joblessness is the root cause of the global unrest threatening American security. Fostering entrepreneurship is the remedy. The combined weight of American diplomacy and military power cannot end unrest and extremism in the Middle East and other troubled regions of the world, Steven Koltai argues. Koltai says an alternative approach would work: investing in entrepreneurship and reaping the benefits of the jobs created through entrepreneurial startups. From 9/11 and the Arab Spring to the self-proclaimed Islamic caliphate, instability and terror breed where young people cannot find jobs. Koltai marshals evidence to show that joblessness—not religious or cultural conflict—is the root cause of the unrest that vexes American foreign policy and threatens international security. Drawing on Koltai's stint as senior adviser for Entrepreneurship in Secretary Hillary Clinton's State Department, and his thirty-year career as a successful entrepreneur and business executive, *Peace through Entrepreneurship* argues for the significant elevation of entrepreneurship in the service of foreign policy; not rural microfinance or mercantile trading but the scalable stuff of Silicon Valley and Sam Walton, generating the vast majority of new jobs in economies large and small. *Peace through Entrepreneurship* offers a nonmilitary, long-term solution at a time of disillusionment with Washington's "big development" approach to unstable and underdeveloped parts of the world—and when the new normal is fear of terrorist attacks against Western targets, beheadings in Syria, and jihad. Extremism will not be resolved by a war on terror. The answer, Koltai shows, is stimulating entrepreneurial economic opportunities for the virtually limitless supply of desperate, unemployed young men and women leading lives of endless economic frustration.

Innovation management is one of the most important and challenging aspects of modern business. Innovation can be a fundamental driver of competitiveness, but it can also be risky and create uncertainty. Small Business Management provides a balanced introduction to both entrepreneurship and small business management with a focus on achieving and maintaining a sustainable competitive advantage as a small organization. Current issues including global opportunities, service, quality and technology are highlighted throughout the text. The streamlined format allows instructors to cover the entire text of 18 chapters within a standard semester timeline without sacrificing important topics. The Fourth Edition features an increased emphasis on small business ownership by women and minority groups. The online Business Plan Guide and templates provide some of the most extensive information available on business planning. The text also includes a complete sample business plan.

How should we think about entrepreneurship? Should we focus on the psychology of people who become entrepreneurs or consider the groups that people belong to? Should we emphasize the incentives, context and environment that lead people to become entrepreneurial? This book presents different ways of thinking about entrepreneurship: instead of topics such as finance or opportunities, the book focuses on perspectives or ways of seeing. Written by leading experts, *Perspectives in Entrepreneurship* examines the emergence and development of entrepreneurship as an academic discipline. The book takes a critical look at the varying positions in the field and their overall contribution to entrepreneurship as a whole. *Perspectives in Entrepreneurship* is an essential text for upper level undergraduate and postgraduate students of entrepreneurship.

The secret to sustainable competitive advantage for large organizations in the changing business environment is not simply lowering costs or restructuring for efficiency. Companies need to be adaptable, flexible, speedy, creative, innovative and opportunistic. In short, they need to act in an entrepreneurial manner. *Corporate Entrepreneurship* is about the ability of a large organization to make the most of commercial opportunities, to innovate, to do things differently. It is about developing an organizational and strategic capability to not just manage change, but to embrace and action it. Paul Burns' innovative text considers the personal qualities of successful entrepreneurs and the manner in which they do business. He then demonstrates how these qualities can be replicated to form an organizational architecture that encourages entrepreneurship at all levels within a company. *Corporate Entrepreneurship* pulls together many themes (from leadership, culture, creativity, innovation, strategy, and marketing) in a coherent and accessible form.
