There has been an explosion of interest in entrepreneurs in the popular media, as well as in business, policy, and education. But what do entrepreneurs do? What is entrepreneurship and why is it important? What is distinctive about entrepreneurs? And where do they come from? In this Very Short Introduction Paul Westhead and Mike Wright weave a pathway through the debates about entrepreneurship, providing a guide to the entrepreneurial process. They look at how the actions of entrepreneurs are shaped by the external environment and availability of resources, consider the types of organizations in which entrepreneurs can be found, and look at the diversity in their backgrounds, experience, and how they think and learn. Lastly, they consider the impact that entrepreneurs have on modern market economies and look at the future of entrepreneurship in our increasingly globalized world. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

This graduate-level book transforms the strategic process for entrepreneurs into a growth-oriented approach. The book is organized to flow in the following manner: understanding the entrepreneurial perspective; and the challenge of entrepreneurial growth; gaining an appreciation for strategic planning in emerging ventures; examining the growth options for emerging ventures; and finally a discussion of the emerging entrepreneurial issues confronting the economy today. Over 30 comprehensive cases will be available on the world wide web for professors and students using this text. Thus the twelve chapters (see outline) are presented as a framework to follow and relate back to as the cases are discussed. The writing style and format of each chapter is relatively shorter and more professional in nature. Professors can pick and choose the cases most appropriate and assign them to students from the web.

In the world of business, who you know is usually more important than what you know. While most research highlights the personal characteristics and expertise important to business success, this book demonstrates that networking is the core of entrepreneurship. Both counterintuitive and powerful, this perspective reframes entrepreneurial action by placing networking at the center of the process. Traditionally, networks have been regarded as facilitators of business, but Tom Elfring, Kim Klyver, and Elco van Burg argue that networking is actually the basis of entrepreneurial action, and conversely, that entrepreneurial action is networking. In developing an "entrepreneurship as networking" model, the book addresses the persistent problems that plague the dominant "individual-opportunity" approach in entrepreneurship. They describe the key dynamics, mechanisms, and practices of entrepreneurship as networking, and point at fruitful networking strategies for entrepreneurs. Thus, the authors provide an integrated and dynamic account of entrepreneurial agency that prioritizes interaction with the surrounding social environment. They also explain what a viable network is for entrepreneurs and how networking activities affect their endeavours. Their perspective sheds new light on the origins of opportunities and how entrepreneurs access and mobilize resources. The approach also explains how entrepreneurs build legitimacy and exploit the networks they work within. Offering a groundbreaking theory of entrepreneurial action as networking, Entrepreneurship as Networking opens up an entirely new research agenda.

This book aims to meet the needs of education and training in modern techniques of innovation and entrepreneurship, and focuses on the detailed presentation of successful business practices. As today's global economic landscape is changing rapidly, the ability of businesses to introduce new products and services to the market faster than their competitors is perhaps their most distinct competitive advantage. This becomes obvious by the significant market share that the most innovative companies gain while increasing profitability. Extensive research in this field has demonstrated that companies that are constantly innovating normally double their profits compared to others. Moreover, establishing successful practices and policies of innovation management, through which ideas evolve from conception through evaluation to implementation and commercialization, become the basis for economic growth at the firm, industry, national, regional, and global levels. Taking Greece as an example, this volume identifies systemic weaknesses in development of new products, risk capital, patenting, broadband penetration, lifelong training, investment in research on the part of firms, high-tech exports, and employment in medium-high-technology manufacturing that place the country at the bottom of the European Union in economic performance and threaten its potential to achieve sustainable growth. To address these weaknesses in Greece and similar countries around the world, the authors present a comprehensive

overview of the principles of innovation and entrepreneurship, with particular respect to their relationships to knowledge, learning, and creativity. Drawing from a strong theoretical foundation, and illustrated through in-depth case studies and examples from both private and public sectors, the authors present a framework for innovation management that integrates research, education, practical application, and policy. Specific topics include technology transfer, intellectual property rights management, the practice of knowledge management intellectual capital investment, business incubators, and Cooperation Research and Development Agreements (CRADAs).

**Entrepreneurship Policy: Theory and Practice** is the first book to fully analyze the construction of entrepreneurship policy, a rapidly-evolving area of policy about which little is known. From a study and assessment of the practices of governments in thirteen countries in Europe, North America and the Asia-Pacific, this book fully describes the policy area and shares new tools and methods for better understanding and explaining the why and how of an entrepreneurship policy approach. Unlike other research in the field of entrepreneurship where implications from research findings are used to suggest what policy actions should be taken to increase the level of entrepreneurship in an economy, this study is based on what entrepreneurship policy actions are being taken. This is a unique book in the field which points to the way forward both for policymakers and for the research community in terms of thinking about entrepreneurship policy and the complex issues surrounding its development.

**Entrepreneurship: Theory, Process, and Practice** Cengage Learning

Entrepreneurship has been seen as a phenomenon allowing economic development, job creation, increased productivity and innovation, but many studies do not include the causes of these events. Consequently, the objective of this book is to fill this gap by combining several studies from more practice-oriented perspectives. The various chapters presented here follow several approaches which researchers explore in different contexts and link to specific experiences in entrepreneurship. This book intends to contribute to better understanding of the phenomenon of entrepreneurship and innovation, and to show how these business practices can stimulate economic development in various countries and regions worldwide.

**ENTREPRENEURSHIP: THEORY, PROCESS, PRACTICE, 10e**, combines a practical, step-by-step approach with a theoretical foundation to form a basic framework for understanding the theory, processes, and practice of entrepreneurship. Recognized for over 25 years as one of the leading books in the field, the aim of the text is to present the most current thinking in entrepreneurship, as well as to provide learners the opportunity to apply ideas and develop useful entrepreneurial skills. This edition has been updated to include current developments and issues in this explosive field. This open access book investigates the inter-relationship between the mind and a potential opportunity to explore the psychology of entrepreneurship. Building on recent research, this book offers a broad scope investigation of the different aspects of what goes

on in the mind of the (potential) entrepreneur as he or she considers the pursuit of a potential opportunity, the creation of a new organization, and/or the selection of an entrepreneurial career. This book focuses on individuals as the level of analysis and explores the impact of the organization and the environment only inasmuch as they impact the individual's cognitions. Readers will learn why some individuals and managers are able to identify and successfully act upon opportunities in uncertain environments while others are not. This book applies a cognitive lens to understand individuals' knowledge, motivation, attention, identity, and emotions in the entrepreneurial process.

Covering foundations of entrepreneurship and new venture creation for the Asia-Pacific entrepreneur, this book combines a solid theoretical foundation with a practical step-by-step approach to the process of entrepreneurship.

This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader's thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied separately, the book provides the reader with an overview of these elements and how they combine to create new value in the market. This edition is updated with recent international research, including research and examples from Europe, the US, and the Asia-Pacific region.

As the breadth and empirical diversity of entrepreneurship research have increased rapidly during the last decade, the quest to find a "one-size-fits-all" general theory of entrepreneurship has given way to a growing appreciation for the importance of contexts. This promises to improve both the practical relevance and the theoretical rigor of research in this field. Entrepreneurship means different things to different people at different times and in different places and both its causes and its consequences likewise vary. For example, for some people entrepreneurship can be a glorious path to emancipation, while for others it can represent the yoke tethering them to the burdens of overwork and drudgery. For some communities it can drive renaissance and vibrancy while for others it allows only bare survival. In this book, we assess and attempt to push forward contemporary conceptualizations of contexts that matter for entrepreneurship, pointing in particular to opportunities generating new insights by attending to contexts in novel or underexplored ways. This book shows that the ongoing contextualization of entrepreneurship research should not simply generate a proliferation of unique theories – one for every context – but can instead result in better theory construction, testing and understanding of boundary conditions, thereby leading us to richer and more profound understanding of entrepreneurship across its many forms. Contextualizing Entrepreneurship Theory will critically review the current debate and existing literature on contexts and entrepreneurship and use this to synthesize new theoretical and methodological frameworks that point to important directions for future research.

Entrepreneurship: Theory/Process/Practice focuses on Asia-Pacific entrepreneurial development with an overarching commitment to environmental and sustainable entrepreneurial practice as well as social and ethical responsibility. Its strong theoretical framework is coupled with an emphasis on the experiential, through a wealth of scenarios, case studies, feedback questionnaires and business plans. This edition has an emphasis on lean entrepreneurship and the business model canvas, which promotes experiential practice aligning with the online material.

This book takes an original approach to business models and entrepreneurship, resulting from a durable involvement with entrepreneurs and from experiments combining theory and practice. The authors present the generation, remuneration, and sharing business model, which relates to the value generation, its remuneration and the sharing of this remuneration. They also outline the role and the central place of the business model within the entrepreneurial process; the theoretical bases conventions theory, resource based view and stakeholder theory and the construction of the GRS model; the experiments conducted within teaching, practical, and theoretical frameworks; and the contribution of the business model to a theory of entrepreneurship theory. The book explains why the business model can be useful for entrepreneurs and why it is relevant to set it in place during the entrepreneurial process. Students and researchers who are interested in entrepreneurship will find this an important resource for developing a new business. Management coaches, often interested in the most recent developments of management research, will have no difficulty moving between the theory and practice set out in this book. Finally, curious entrepreneurs will read this study not to seek immediate solutions to a problem but to reflect on the topics addressed here that show that the business model is not just a fashion but is highly useful.

This book explores intra-team interaction in workplace settings devoted to technological breakthroughs and innovative entrepreneurship. The first set of studies to investigate these economically important institutions through the lens of talk-at-work, this book begins by discussing the ethnomethodological traditions of Conversation Analysis and institutional

interaction and linking them to innovation and entrepreneurship. The book offers rich and detailed empirical accounts of teams talking new technologies and new ventures into being. By focusing on the observable language of teams in action, the book reveals the situated practices that teams use to enact their work, including the means by which team members verbally grapple with the uncertainties inherent in doing work in uncharted domains. The book presents important findings about the conversational accomplishment of work and demonstrates the value of examining the practices of teams in action. A valuable contribution to studies of talk-in-interaction, as well as entrepreneurship-as-practice, this book can help to bridge the gap between scholarly investigations and the practical experiences of entrepreneurs. The author closes by considering the ways that practice-based studies of entrepreneurial work can improve issues of diversity and inclusion within the entrepreneurial ecosystem. This book is intended to serve as an invaluable sourcebook for scholars and students interested in innovation, entrepreneurship, and organizations as well as those focused on applied Conversation Analysis. The book's insights are presented in a richly detailed manner while remaining accessible to readers who are new to the methodologies and activity contexts.

This innovative book will be a useful and trusted reference throughout your career, no matter which company or industry you work within. CORPORATE INNOVATION & ENTREPRENEURSHIP, 3E, International Edition is a one-of-a-kind book for the emerging business arena of entrepreneurship and innovation. Built on years of research and experience, the book employs a clear and informative how-to approach and features sections and chapters organized according to a summary model of the corporate entrepreneurship process. Social Entrepreneurship: Theory and Practice is about the creative ways in which social entrepreneurs solve pressing and insurmountable social problems. Theories of social change are presented to help demystify the 'magic' of making an immense, yet durable and irreversible, social impact. Utilizing case studies drawn from various fields and all over the world, the authors document how social entrepreneurs foster bottom-up change that empowers people and societies. They also review the specific personality traits of social entrepreneurs and introduce the new kind of leadership they represent. This book will be valuable to undergraduate, graduate and postgraduate students, while remaining accessible to non-academic readers thanks to its clear language, illustrative case studies and guidelines on how to become a

successful social entrepreneur.

Identifying opportunities is essential to successful entrepreneurial activity; but good opportunities may be missed if entrepreneurs fail to understand when and where to search for them, or appreciate the significance of timing and place in their search. This book identifies and addresses three problems which face aspiring entrepreneurs. The first is finding a promising idea to exploit; the second is to know when to stop searching, or pursue a more promising search; and the third is to understand how the entrepreneur can locate him or herself in time and space to most economically locate a discovery. As well as developing original theories to solve these problems, this book offers practical solutions, which aspiring entrepreneurs can learn and implement through theory-based activities, giving them an opportunity to practice while gaining an understanding of both why and how these approaches work. Showing how timing becomes more salient than time, and place more important than space, this book combines theoretical and practical guidance which will be of great interest to entrepreneurship researchers, educators, students and aspiring entrepreneurs.

This is the 2nd edition of Technological Innovation. Profiting from technological innovation requires scientific and engineering expertise, and an understanding of how business and legal factors facilitate commercialization. This volume presents a multidisciplinary view of issues in technology commercialization and entrepreneurship.

Together with the development of transformative technologies that epitomize globalization, the ongoing movements of people across borders and other socio-economic pressures are creating a fast-changing business environment that is difficult for business to understand, let alone control. Dominant social expectations that immigrants should seek to adopt an assimilationist socialization path towards the host country's mainstream are contradicted by minority ethnic group resilience. There is no evidence that these groups naturally disappear within the cultural and behavioural contexts of their adopted countries. Since ethnic minority consumers cannot be expected to assimilate, then they maintain some significant degree of unique ethnicity related consumer characteristics that convert into threats and opportunities for business. The inherent socialisation process also provides opportunities for ethnic entrepreneurship and for proliferation of ethnic minority business. Following from the extensive examination of scholarly perspectives of ethnic marketing theory, there is an acknowledged and marked divide between theoretical exhortations and what is done in practice, a relative oversight of the implications of mixed embedded markets, and a propinquity to overlook the crucial role played by ethnic entrepreneurship and ethnic networks. Opportunity valuations are difficult to enact due to a lack of intelligence about ethnic markets. Variable sentiment about the future of ethnic marketing links to different predictions on how the drivers of globalization will impact on the acculturation paths of ethnic minorities. Keeping a focus on the ethnic group as the unit of analysis, combining ethnic marketing and ethnic entrepreneurship theories provides intelligence about contemporary ethnic marketing and practice perspectives. The ultimate objective is to reduce the theory-practice divide through the development of a collaborative framework between business and scholars that converts into theory-in-use.

This timely book provides a fresh perspective on contemporary research in the field of entrepreneurship and small business, considering both theory and application.

Teaching Entrepreneurship advocates teaching entrepreneurship using a portfolio of practices, including play, empathy, creation,

experimentation, and reflection. Together these practices help students develop the competency to think and act entrepreneur. This innovative book takes seriously the ordinary activities of entrepreneurship and maps out new pathways for scholars to understand the nature, properties, and implications of studying practices for entrepreneurship studies. Entrepreneurship is neither an art nor a science, but a bundle of practices, as Peter Drucker once observed. Curiously however, academic research on entrepreneurship mostly abstracts away from practical activity. In contrast, *Entrepreneurship As Practice* takes ordinary activities of entrepreneurship seriously by mapping out new pathways for scholars to consider the everyday practices through which entrepreneurship occurs. Each chapter draws on contemporary theories of practice to illuminate the nature, properties, and implications of studying the practices of entrepreneurship. The chapters in this book were originally published as a special issue of the journal *Entrepreneurship & Regional Development*.

How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers.
